## WATER TANK MAINTENANCE CONTRACT

This agreement entered into by and between the City of Grain Valley, Missouri, hereinafter known as the Owner, and Utility Service Co., Inc., hereinafter known as the Company.

The Owner agrees to employ the Company to provide the professional service needed to maintain its **500,000** gallon ground storage reservoir located at **405 James**.

This agreement outlines the Company's responsibility for the care and maintenance of the above described water storage tank. Care and maintenance shall include the following:

The Company will annually inspect and service the tank beginning in the year **2005**. The tank and tower will be thoroughly inspected to assure that the structure is in a sound water tight condition.

Biennially, beginning with the first washout/inspection in **2007**, the tank will be completely drained and cleaned to remove all mud, silt, and other accumulations that might be harmful to the tank or its contents. This cleaning will utilize high-pressure equipment with chemical injection. After cleaning is completed, the interior will be thoroughly inspected and disinfected prior to returning to service.

The Company shall furnish all specialized services including engineering and inspection services needed to maintain and repair the tank and tower during the term of this contract. These repairs include steel replacement, steel parts, expansion joints, water level indicators, sway rod adjustments, manhole covers/gaskets, and other component parts of the tank or tower.

The Company will clean and repaint the interior and/or exterior of the tank at such time as complete repainting is needed. The need for interior painting to be determined by the thickness of the existing liner and its protective condition. The need for exterior painting to be determined by the appearance and protective condition of the existing paint.

When painting is needed, all products and procedures will be equal to, or exceed the requirements of the Missouri Department of Natural Resources, the American Water Works Association, and the Steel Structures Painting Council as to surface preparation, coating materials, and disinfection.

When interior renovation is needed, procedures as outlined in A.W.W.A.-D102 specifications for cleaning and coating of potable water tanks will be followed. Only material approved for use in potable water tanks will be used on any interior surface area.

At the time the exterior requires painting, the Company agrees to utilize a coating system, which best suits the site conditions, environment, and general location of the tank.

The Company will install an anti-climb device on the access ladder to prevent unauthorized persons from climbing the tower.

A lock will be installed on the roof hatch of the tank to prevent any unauthorized entry to the water tank. Keys to the tank will be retained by the Owner and the Company.

The Company will provide emergency service to handle any problems with the tank at no additional cost to the Owner. Reasonable travel time must be allowed for the repair unit to reach the tank site.

The Company will furnish relief valves, if needed, to install in the water system so the Owner can pump direct and maintain water pressure while the tank is being serviced.

The Company will furnish current certificates of insurance coverage to the Owner at the time any work is performed, or upon renewal of any policy.

The Owner shall have the right to continue this contract for an indefinite period of time providing the Annual fee is paid in accordance with the terms of payment. A base fee of \$ 9,388.00 has been established for this tank in 2008. See Addendum No. 1 for years 2005 through 2007.

In Year 2011 and each third year thereafter, the annual fee will be adjusted to reflect the current cost of service. The adjustments, either up or down, shall be limited to a maximum of 5% annually.

It is agreed that future mandated environmental, health, or safety requirements which cause significant changes in the cost of tank maintenance will be just cause for modification of this agreement. The Company is accepting this tank under program based upon existing structure and components [ANY MODIFICATIONS TO THE TANK, INCLUDING ANTENNA INSTALLATIONS, SHALL BE APPROVED BY UTILITY SERVICE CO., INC. PRIOR TO IMPLEMENTATION AND MAY WARRANT AN INCREASE IN THE ANNUAL FEE]. This contract does not include the cost for containment or disposal of any hazardous waste materials, nor resolution to operational problems due to cold weather, Acts of God, structural damage due to antenna installations or other attachments for which the tank was not originally designed, or other conditions which are beyond the Owners and Company control.

This contract is subject to cancellation by the Owner only if intent to cancel is received by Company ninety [90] days prior to the anniversary date. Notice of Cancellation to be delivered by registered mail and signed by three [3] authorized voting officials of the Owner's management and/or Commissioners.

This Agreement signed this 22 day of March, 2005.

The Owner agrees to employ the Company to provide the professional service needed to maintain its 774,000 gallon water storage tank located at 405 James Rolla Drive.

This agreement outlines the Company's responsibility for the care and maintenance of the above described water storage tank. Care and maintenance shall include the following:

The Company will annually inspect and service the tank beginning in the year 2007. The tank will be thoroughly inspected to ensure that the structure is in a sound, water tight condition.

Biennially, beginning with the first washout/inspection in 2007, the tank will be completely drained and cleaned to remove all mud, silt, and other accumulations that might be harmful to the tank or its contents. This cleaning will utilize high pressure equipment with chemical injection. After cleaning is completed, the interior will be thoroughly inspected and disinfected prior to returning to service.

The Company will install an anti-climb device on the access ladder to prevent unauthorized persons from climbing the tower.

A lock will be installed on the roof hatch of the tank to prevent any unauthorized entry to the water tank. Keys to the tank will be retained by the Owner and the Company.

The Company will provide emergency service to handle any problems with the tank at no additional cost to the Owner. Reasonable travel time must be allowed for the repair unit to reach the tank site.

The Company will furnish current certificates of insurance coverage to the Owner at the time any work is performed or upon renewal of any policy.

The Owner shall have the right to continue this contract for an indefinite period of time providing the annual fee is paid in accordance with the terms of payment. A base fee of **\$2,250.00 plus all applicable taxes** has been established for this tank. **This base fee begins in Year 2007.**

In year **2010** and each third year thereafter, the annual fee will be adjusted to reflect the current cost of service. The adjustments, either up or down, shall be limited to a maximum of 5% annually.

It is agreed that future mandated environmental, health, or safety requirements which cause significant changes in the cost of tank maintenance will be just cause for modification of this agreement. The Company is accepting this tank under program based upon existing structure and components. *Any modifications to the tank, including antenna installations, shall be approved by Utility Service Co. Inc. prior to implementation and may warrant an increase in the annual fee.* This contract does not include the cost for containment or disposal of any hazardous waste materials, nor resolution to operational problems due to cold weather, Acts of God, structural damage due to antenna installations or other attachments for which the tank was not originally designed, or other conditions which are beyond the Owners and Company control.

This contract is subject to cancellation by the Owner only if intent to cancel is received by the Company ninety (90) days prior to the anniversary date. Notice of Cancellation is to be delivered by registered mail and signed by three (3) authorized voting officials of the Owner's management and/or Commissioners. ## WATER TANK MAINTENANCE CONTRACT

This agreement entered into by and between City of Grain Valley hereinafter known as the Owner, and Utility Service Co., Inc. hereinafter known as the Company.

The Owner agrees to employ the Company to provide the professional service needed to maintain its 500,000 gallon water storage tank located at Tier Road.

This agreement outlines the Company's responsibility for the care and maintenance of the above described water storage tank. Care and maintenance shall include the following:

The Company will annually inspect and service the tank beginning in the year 2007. The tank and tower will be thoroughly inspected to ensure that the structure is in a sound, watertight condition.

Biennially, beginning with the first washout/inspection in 2009, the tank will be completely drained and cleaned to remove all mud, silt, and other accumulations that might be harmful to the tank or its contents. This cleaning will utilize high pressure equipment with chemical injection. After cleaning is completed, the interior will be thoroughly inspected and disinfected prior to returning to service.

The Company shall furnish specialized services including engineering and inspection services needed to maintain and repair the tank and tower during the term of this contract. These repairs include steel replacement, steel parts, expansion joints, water level indicators, sway rod adjustments, manhole covers/gaskets, and other component parts of the tank or tower.

The Company will clean and repaint the interior and/or exterior of the tank at such time as complete repainting is needed. The need for interior painting is to be determined by the thickness of the existing liner and its protective condition. The need for exterior painting is to be determined by the appearance and protective condition of the existing paint.

When painting is needed, all products and procedures will be equal to, or exceed the requirements of the Missouri Department of Natural Resources, the American Water Works Association, and the Steel Structures Painting Council as to surface preparation, coating materials, and disinfection.

When interior renovation is needed, procedures as outlined in A.W.W.A.-D102 specifications for cleaning and coating of potable water tanks will be followed. Only material approved for use in potable water tanks will be used on any interior surface area.

At the time the exterior requires painting, the Company agrees to utilize a coating system which best suits the site conditions, environment, and general location of the tank.

The Company will install an anti-climb device on the access ladder to prevent unauthorized persons from climbing the tower.

A lock will be installed on the roof hatch of the tank to prevent any unauthorized entry to the water tank. Keys to the tank will be retained by the Owner and the Company.

The Company will provide emergency service to handle any problems with the tank at no additional cost to the Owner. Reasonable travel time must be allowed for the repair unit to reach the tank site.

The Company will furnish relief valves, if needed, to install in the water system so the Owner can pump direct and maintain water pressure while the tank is being serviced.

The Company will furnish current certificates of insurance coverage to the Owner at the time any work is performed or upon renewal of any policy.

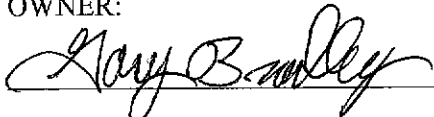

The Owner shall have the right to continue this contract for an indefinite period of time providing the annual fee is paid in accordance with the terms of payment. A base fee of **\$20,850.00 plus all applicable taxes** has been established for this tank. **This base fee begins in Year 2011. See Addendum No. 1 for Years 2007, 2008, 2009, and 2010.**

In year **2014** and each third year thereafter, the annual fee will be adjusted to reflect the current cost of service. The adjustments, either up or down, shall be limited to a maximum of 5% annually.

It is agreed that future mandated environmental, health, or safety requirements which cause significant changes in the cost of tank maintenance will be just cause for modification of this agreement. The Company is accepting this tank under program based upon existing structure and components. *Any modifications to the tank, including antenna installations, shall be approved by Utility Service Co. This contract is subject to cancellation by the Owner only if intent to cancel is received by the Company ninety (90) days prior to the anniversary date. Notice of Cancellation is to be delivered by registered mail and signed by three (3) authorized voting Officials of the Owner's management and/or Commissioners. **To: The City of Grain Valley Mayor and Board of Alderman**

**Subject: Planning and Zoning Commission Appointment**

I am interested in being considered for appointment to the City of Grain Valley Planning and Zoning Commission. I have lived in Grain Valley for the past eight years with my wife and two children and have enjoyed watching the town grow over that time. With my experience, I feel that I would be an excellent candidate for this position and would like the opportunity to become more involved with the township and community. I became interested in this position after reading the 'Newly Adopted Grain Valley Comprehensive Plan 2014' that was published on the city website. The City of Grain Valley has great ambitions for growth and development and I would like to be a part of it. Please refer to attached résumé for experience and qualifications. Personal and Professional references can be provided upon request.

Thank you,

**Client:** State of Missouri Veteran's Home, Warrensburg, Missouri and Cameron, Missouri

**Project:** Facility HVAC Stabilization and Energy Conservation Upgrades

**Role:** Project Lead, Designer, Sealed Drawing Set

**Description:** The State of Missouri Veteran's Commission operates retirement homes for veterans throughout the state. The Warrensburg and Cameron sites are identical and both had difficulty meeting the cooling set point and dehumidifying the air. After review of the last mechanical upgrade drawings set and a site survey, I determined one major design issue and several controls issues. The client also wanted to take this opportunity to add some energy conservation technologies.

The major design issue was a bypass path around each water cooled and air cooled chillers. This resulted in dilution of the chilled water supply, raising the temperature of the water leaving the chiller plant and reducing the cooling ability throughout the building. The facility has 7 base building air handlers that provided the outdoor air requirements to the terminal fan coils in each resident room and office, however the common/gathering areas only have terminal reheat coils. The existing controls sequence of operation for the air handlers only tempered the outdoor air to 80°F and relied on the fan coils to meeting the indoor set point. Because the common/gathering areas do not have any means of cooling the air, on a hot humid day, the common/gathering areas were not conditioned.

I design a new chilled water system eliminating the bypass paths, put variable frequency drives on the chilled water pumps and used the system differential pressure as feedback for speed control and put variable frequency drives on the base building air handlers and controlled the fan speed to maintain a slightly positive indoor building pressure with respect to outdoors to reduce infiltration. I also wrote a new sequence of operation for the air handlers to reset the discharge air set point depending on outdoor air conditions and added flow meters to the chilled water piping to determine staging of the chillers based on system demand. Lastly I added electromagnetic water treatment modules and centrifugal sediment separators to the condenser water to reduce the amount of chemicals needed to maintain good condenser water.

**Client:** US Bank Data Center, Olathe, Kansas

**Role:** Project Lead, Commissioning Agent, Script Development

**Description:** The Uptime Institute has defined classifications for data centers called Tier Ratings. These ratings determine the ability the data center has to reduce the possibility of losing power or cooling to the critical equipment. Tier II is redundant components, Tier III is concurrent maintainability and Tier IV is fault tolerant. Each Tier rating encompasses all the characteristics of any lower Tier rating. For this project, I reviewed all the drawings and control sequence to ensure they meet the Tier rating applied for, I developed level 4 function tests and level 5 integrated system commissioning scripts and the final report with findings and recommendations. I also represented my firm in the commissioning meeting and onsite during the testing.

**Client:** Johnson County Crime Lab, Olathe, Kansas

**Project:** Emergency Power Generator Plant and Automatic Transfer Switch Commissioning

**Role:** Project Lead, Commissioning Agent, Script Development

**Description:** The Johnson County Police Department installed a new 500 kW diesel engine generator and automatic transfer switch to provide emergency power to the building during a power outage. For this project I commissioned the sequence of operation for the automatic transfer switch open and closed transition, and fault scenarios. I also connected independent power quality equipment and analyzed system response to validate that the generator met the specifications.

**Client:** Verizon Bedminster, New Jersey

**Project:** Data Center Electrical and Mechanical Upgrades

**Role:** Designer, Project Management

**Description:** Verizon has a three story office building with small data centers on each floor for different departments. The original design intent of the building was not for a data center, and they were power limited by the service entrance transformer. I worked with others on designing the new electrical and mechanical upgrades to meet their requirements. Specifically, I did an energy cost analysis comparing two cooling options. One option was to expand the already existing direct expansion modular units and the other was to install a completely new chiller water plant. The chilled water plant had significantly more energy saving potential and an estimated payback of 3 yrs if they put the entire building on it, they choose the chilled water plant. I worked with others on the concurrently maintainable design but drafted the entire chiller plant in 3D modeling with AutoCAD independently. I help develop the sequence of operations for all the mechanical equipment. I also worked on the electrical design. We added dedicated data center transformers with a new substation feed from the Utility company, a new emergency power generation plant with redundancy, paralleling gear, automatic transfer switches, Uninterruptable Power System with redundancy, and dual power paths to the critical loads.

PARKS & RECREATION  
APRIL 2016 BOA REPORT

**PRIOR MONTH:**

The Community Center hosted approximately 88 people at the senior luncheon which was held on Wednesday, March 2.

We held our 1<sup>st</sup> ever Painting Party on Thursday, March 24 and it was a huge success! Fourteen participants signed up, which was just one shy of the maximum allowed. This is very unusual for a 1<sup>st</sup> time program, so we are excited about the future of the Painting Party! Each student was provided with all of the supplies needed to create a 12x12 canvas painting of a Whimsical Tree. At the end, they got to take their canvas painting home to keep. Everyone had a great time!

On March 21, the Parks & Recreation Department went live with our new recreational cloud based software and for the most part, it has been a smooth transition. RecDesk allows us to register patrons for all programs, sell fitness & pool memberships, reserve facility rentals, and allow patrons to register for our programs online. We are excited to offer the convenience of online registration to our patrons and hope that we will see an increase in participation due to this ability!

GVAA's Spring Baseball/Softball season kicked-off this month. The park maintenance crew has been busy getting fields and field equipment ready for their team practices.

Park Maintenance installed 12 additional raised beds at our Community Garden. We increased our garden plots from 24 last year to 36 this year. In addition, they made and installed a new compost bin for the gardeners. A new message board and park benches will be installed this month.

**UPCOMING EVENTS/PROJECTS:**

Looking ahead, the Parks and Recreation Department will host a number of youth and adult events in April:

**Tot Time:** Ongoing Tuesdays & Thursdays, 10:30 am to 12:00 pm

**Aquafina Pitch, Hit & Run:** Saturday, April 2<sup>nd</sup>, 10:00am to 12:00pm

**Mini Munchkins:** Wednesday, April 6<sup>th</sup>, 6:30pm to 7:30pm

**Storybook Trail:** Will be posted at Armstrong Park Trail/Track from April 8<sup>th</sup> through the 17<sup>th</sup>

**Preschool Players – Instructional Soccer:** Saturdays from April 9<sup>th</sup> through May 14<sup>th</sup>, 9:00am & 10:00am

**Star Wars Lego Engineering Camp:** April 15<sup>th</sup> & 16<sup>th</sup>, 9:00am – Noon & 1:00pm – 4:00pm

**Community Garden:** Registration for a garden plot is currently underway. As of April 1<sup>st</sup>, 20 of the 36 garden plots available had been reserved.

With spring upon us, our Park Maintenance Department is busy mowing, prepping athletic fields, and making sure our park restrooms and shelters are routinely cleaned and well-maintained. The department currently has one full-time Park Maintenance Worker position open that they are trying to get filled as quickly as possible.

The Parks & Recreation Department will open the Grain Valley Aquatic Center on Saturday, May 28, and we are excited about the upcoming 2016 season! Please remember, board members and employees of the City of Grain Valley receive a free season pass to the aquatic center, and immediate family members receive a 50% discount. Please call 847-6232 if you have any questions, or stop by Jim Meyer's office to receive your pass!
