Ordinance #2456

- *The Motion was Seconded by Alderman West*
 - Plat is for 12 residential structures, an office and a clubhouse; previously approved as a Planned Unit Development by the Board of Aldermen
- *Bill No. B19-03 was voted upon with the following voice vote:*
 - *Aye: Bamman, Headley, Stratton, Totton, West*
 - *Nay: None*
 - *Abstain: None*

-Bill No. B19-03 BECAME ORDINANCE #2456: 5-0-

Bill No. B19-04: An Ordinance Amending Section 505.011 of the Code of Ordinances of the City of Grain Valley, Missouri, Pertaining to Definitions Permitting Towers, Related Tower Structures, and Equipment for Wireless Communications in the Right-Of-Way

City Attorney Jim Cook read **Bill No. B19-04** for its first reading by title only

- *Alderman Totton moved to accept the first reading of Bill No. B19-04 bringing it back for a second reading by title only*
- *The Motion was Seconded by Alderman Headley*
 - Update brings the Municipal Code in line with recently passed state legislation
 - Alderman Totton asked for information on where towers would be placed; this ordinance is strictly a change in language
 - Alderman Bamman asked if there was an interest in limiting overhead powerlines and cables or ordinances which require these to be underground; franchise agreements define what is allowed and if a company was forced to put lines underground the City would be financially responsible
- *Bill No. B19-04 was voted upon with the following voice vote:*
 - *Aye: Bamman, Headley, Stratton, Totton, West*
 - *Nay: None*
 - *Abstain: None*

-Bill No. B19-04 Approved for a Second Reading: 5-0-

**AN ORDINANCE AMENDING SECTION 505.011 OF THE CODE OF
ORDINANCES OF THE CITY OF GRAIN VALLEY, MISSOURI, PERTAINING TO
DEFINITIONS PERMITTING TOWERS, RELATED TOWER STRUCTURES, AND
EQUIPMENT FOR WIRELESS COMMUNICATIONS IN THE RIGHT-OF-WAY.**

WHEREAS, Chapter 505, Code of Ordinances, City of Grain Valley, Missouri (“City”) identifies the permitting within public right-of-ways;

WHEREAS, by passage of House Bill 1991, Section 67.1830, RSMo has been updated to modify provisions relating to towers and equipment for wireless structures;

WHEREAS, the Board of Aldermen of the City has determined it to be in the best interest of the citizens of the City to amend Section 505.011 to reflect the recent changes to Section 67.1830, RSMo.;

NOW THEREFORE, BE IT ORDAINED by the Board of Aldermen of the City of Grain Valley, Missouri as follows:

SECTION 1: Chapter 505, Streets, Sidewalks and Public Places, Section 505.011 of the City of Grain Valley, Missouri Municipal Code of Ordinance is amended to read as the following:

Section 505.011- Definitions.

As used in this Article, the following terms shall have the following meanings unless otherwise stated or reasonably required by the context and other forms of any defined word shall have a parallel meaning.

CONSTRUCTION

To construct, install, erect, build, affix or otherwise place any fixed structure, towers and related tower structures, wireless communications equipment, material or object in, on, under, through or above any public right-of-way, utility easement or public place.

EXCAVATION

Any cutting, digging, excavating, tunneling, boring, grading or other alteration of the surface or subsurface material or earth of any public right-of-way, utility easement and/or public place.

FULL STREET CUT PERMIT

Any excavation that extends from one (1) side of the street to beyond the centerline from which the excavation started.

HALF STREET CUT PERMIT

Any excavation from the centerline of the street in one (1) direction to the limits of the right-of-way.

PAVED SURFACE

Portland cement concrete pavement, asphalt concrete surfacing, double asphalt surface treatment, roads with base of AB-3, surface asphalt treatment roads of soil base, or any bituminous surface of any base in the public right-of-way.

PUBLIC PLACE

Any land that has been deeded, leased, purchased or under the jurisdiction of the City for use by the public.

PUBLIC RIGHT-OF-WAY

Street, highway, road, alley, right-of-way and other land dedicated to or otherwise subject to public use, whether improved by paving, curbing, guttering or otherwise improved or not.

RIGHT-OF-WAY USER

A person owning or controlling a facility in the right-of-way that is used or intended to be used for providing utility services and who has a right under law, franchise or ordinance to use the public right-of-way.

UTILITY EASEMENT

Any land that been designated by a plat registered with the County Recorder's office or land otherwise subject to public use for the purpose of placing public utilities in, on or above the ground.

**CITY OF GRAIN VALLEY
BOARD OF ALDERMEN AGENDA ITEM**

MEETING DATE	2/11/2019	
BILL NUMBER	B19-05	
AGENDA TITLE	AN ORDINANCE BY THE BOARD OF ALDERMEN OF THE CITY OF GRAIN VALLEY, MISSOURI AUTHORIZING THE CITY ADMINISTRATOR TO AMEND THE 2019 BUDGET TO ALLOCATE FUNDING FROM THE GENERAL FUND RESERVES FOR THE PLANNING AND DESIGN OF A MUNICIPAL COMPLEX	
REQUESTING DEPARTMENT	Administration	
PRESENTER	Ryan Hunt, City Administrator	
FISCAL INFORMATION	Cost as recommended:	\$200,000
	Budget Line Item:	From: General Fund Reserves To: 100-09-76900
	Balance Available:	\$2.7 million
	New Appropriation Required:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
PURPOSE	To allocate the needed funding to cover the planning and design costs for the municipal complex	
BACKGROUND	An estimate was made for the cost of architectural services in the FY2019 budget but an amendment is needed now that the actual amount has been received.	
SPECIAL NOTES	\$80,000 is needed for this phase of the planning and design but additional money is being allocated to the building and grounds fund to cover costs associated with the Construction Manager. That company has not yet been identified.	

ANALYSIS	After selecting a firm and coming to terms on the scope of the project, an additional \$80,000 was needed to cover the cost of the initial planning and design services.
PUBLIC INFORMATION PROCESS	N/A
BOARD OR COMMISSION RECOMMENDATION	N/A
DEPARTMENT RECOMMENDATION	Staff Recommends Approval

AN ORDINANCE BY THE BOARD OF ALDERMEN OF THE CITY OF GRAIN VALLEY, MISSOURI AUTHORIZING THE CITY ADMINISTRATOR TO AMEND THE 2019 BUDGET TO ALLOCATE FUNDING FROM THE GENERAL FUND RESERVES FOR THE PLANNING AND DESIGN OF A MUNICIPAL COMPLEX

WHEREAS, the Board of Aldermen of the City of Grain Valley understand the importance of effectively planning and designing a future municipal complex; and

WHEREAS, the Board of Aldermen and City Staff recognize the critically important task of keeping an accurate accounting of finances, year by year; and

WHEREAS, 2019 budget needs to be amended to properly assign the funding for the planning and design of the municipal complex.

NOW THEREFORE, BE IT ORDAINED by the Board of Aldermen of the City of Grain Valley, Missouri as follows:

SECTION 1: The City Administrator is hereby authorized to amend the 2019 budget to allocate funding from reserves to fund the planning and design of the municipal complex Those amounts are as follows:

Project	Line Item	Allocation From Reserves
Municipal Complex	100-09-76900	\$200,000

**A RESOLUTION BY THE BOARD OF ALDERMEN OF THE CITY OF GRAIN VALLEY,
MISSOURI AUTHORIZING THE CITY ADMINSTRATOR TO PURCHASE A 2019
CHEVROLET COLORADO WORK TRUCK FOR USE BY THE CODES ENFOREMENT
OFFICER**

WHEREAS, the Board of Aldermen of the City of Grain Valley, Missouri is dedicated to employee and public safety; and

WHEREAS, the replacement of this vehicle is past scheduled replacement per the Vehicle and Equipment Replacement Program (VERP); and

WHEREAS, the Board of Alderman has set the funds aside for this purchase in the 2019 Fiscal Year Budget via Ordinance #2452; and

WHEREAS, the purchase of this capital item via solicitation of bids falls within the specified guidelines of the City's Purchasing Policy.

NOW THEREFORE, BE IT RESOLVED by the Board of Aldermen of the City of Grain Valley, Missouri as follows:

SECTION 1: The City Administrator is hereby authorized to purchase a 2019 Chevrolet Colorado Work Truck as quoted from Mollé Chevrolet.

PASSED and APPROVED, via voice vote, (-) this __ Day of _____, 2019.

Mike Todd
Mayor

INTENTIONALLY LEFT BLANK

Memorandum

To: Rick Arroyo, Director of Community Development; Ryan Hunt, City Administrator
CC: Ken Murphy, Assistant City Administrator
From: Andrew Woltz, Mechanic
Date: 02/01/2019
Re: Codes Enforcement Truck

The current truck used by the Codes Enforcement Officer is past due for replacement per the VERP (Vehicle and Equipment Replacement Program) by four years as 10 years or 100,000 miles is the target replacement. The current 2005 model year vehicle was pushed back due to the lower mileage and is now experiencing transmission issues and severe rust on the outside of the truck bed.

The proposed replacement is a small work truck similar to the current truck to help accommodate the various daily duties of the Codes Enforcement Officer. Going from a four-wheel drive V-8 engine to a rear wheel drive four cylinder engine will help reduce overall operating costs and environmental impact.

INTENTIONALLY LEFT BLANK

Memorandum

To: Rick Arroyo, Director of Community Development; Ryan Hunt, City Administrator
CC: Ken Murphy, Assistant City Administrator
From: Andrew Woltz, Mechanic
Date: 02/01/2019
Re: Engineering Inspector Truck

This truck is for the Engineering Inspector which currently shares a sedan with the Director of Community Development. With a sedan, the Engineering Inspector has limited access to job sites to safely transport the needed tools and documents to properly inspect the various aspects of infrastructure additions and improvements.

A four-wheel drive work truck was chosen as the ideal vehicle for the Engineering Inspector's daily job duties to safely go onto jobsites throughout the City.

SPONSORED BY
ALDERMAN STRATTON

A RESOLUTION BY THE BOARD OF ALDERMEN OF THE CITY OF GRAIN VALLEY, MISSOURI AUTHORIZING THE CITY ADMINISTRATOR TO APPLY FOR GRANT FUNDING THROUGH THE RECREATIONAL TRAILS PROGRAM (RTP) FOR THE GRAIN VALLEY TRAIL SYSTEM

WHEREAS, the City of Grain Valley, Missouri is dedicated to providing a more walkable, livable community through the development of a City Trail System that provides health and wellness opportunities for citizens; and

WHEREAS, the Missouri Department of Natural Resources, Division of State Parks provides funding opportunities like the Recreational Trails Program (RTP) for projects such as this; and

WHEREAS, this project will provide a critical pedestrian connection between two existing trails on the east side of Dillingham Road; and

NOW THEREFORE, BE IT RESOLVED by the Board of Aldermen of the City of Grain Valley, Missouri as follows:

SECTION 1: The City Administrator is hereby authorized to apply for funding for the Dillingham Connector Trail through the Recreational Trails Program (RTP), grant round fiscal year 2019.

PASSED and APPROVED, via voice vote, (-) this __ Day of _____, 2019.

Mike Todd
Mayor

ATTEST:

Theresa Osenbaugh
City Clerk

[R19-06]

INTENTIONALLY LEFT BLANK

MEMORANDUM

To: Mayor & Board of Aldermen
CC: Ryan Hunt, City Administrator
Ken Murphy, Assistant City Administrator
From: Shannon Davies, Director
Date: February 5, 2019
Subject: Recreational Trails Program (RTP) Grant Application

Mayor & Board:

Back in December of 2017, we completed a section of trail on Dillingham Road from Duncan Road north to Persimmon Drive. With the new building development at Rosewood Hills in 2018, the developer was required to install a trail on Dillingham Road from Hedgewood Drive north, half-way to Pink Hill Road.

Currently, there is no pedestrian connection (sidewalk or trail) on Dillingham Road from Persimmon Drive north to Hedgewood Drive. This project would provide that missing link and offer a connection between these two existing trails. This link would also provide safe, pedestrian connectivity for kids walking to and from Prairie Branch Elementary.

Also, this trail project is currently identified in both the Grain Valley Trails Master Plan and the Capital Improvement Program (CIP).

This is a 2019 budgeted project. However, the City would like to apply for Recreational Trails Program (RTP) funding for this particular project to help offset some of the costs the City would incur.

Shannon Davies
Director of Parks and Recreation

SPONSORED BY
ALDERMAN STRATTON

A RESOLUTION BY THE BOARD OF ALDERMEN OF THE CITY OF GRAIN VALLEY, MISSOURI AUTHORIZING THE CITY ADMINISTRATOR TO PURCHASE TWENTY-FOUR (24) PICNIC TABLES FOR THE GRAIN VALLEY PARK SYSTEM

WHEREAS, the City of Grain Valley, Missouri recognizes the importance of having quality amenities and facilities within the Grain Valley Park System; and

WHEREAS, the existing picnic tables in Armstrong Park and some ancillary parks have reached their useful life and are experiencing increased maintenance expenses; and

WHEREAS, the Americans with Disabilities Act (ADA) requires public amenities and facilities to be accessible to individuals with disabilities; and

NOW THEREFORE, BE IT RESOLVED by the Board of Aldermen of the City of Grain Valley, Missouri as follows:

SECTION 1: The City Administrator is hereby authorized to purchase twenty-four (24) picnic tables from Fry & Associates for the Grain Valley Park System.

PASSED and APPROVED, via voice vote, (-) this __ Day of _____, 2019.

Mike Todd
Mayor

ATTEST:

Theresa Osenbaugh
City Clerk

INTENTIONALLY LEFT BLANK

MEMORANDUM

To: Mayor & Board of Aldermen
CC: Ryan Hunt, City Administrator
Ken Murphy, Assistant City Administrator
From: Shannon Davies, Director
Date: February 5, 2019
Subject: Picnic Table Purchase

Mayor & Board:

This purchase is for 24, perforated steel picnic tables with plasti-coat covering:

- 14, 8-foot Tables Standard
- 7, 8-foot Tables ADA Accessible
- 3, 4-seat Tables for new, small shelters

Our existing picnic tables are wooden with metal frames. With wooden planks, we have to annually re-paint/stain them. Also, wooden plank table-top and seating makes it easy for vandals to write graffiti and/or carve in to the tables. Likewise, they are susceptible to being burned, rotting and warping.

The new tables are 100% perforated steel with plasti-coat covering. They are a heavier table with no flat surfaces, which makes it virtually impossible for graffiti. Likewise, they are not susceptible to warping, rusting, rotting or being burned. We will also never have to paint these tables.

These picnic tables will replace the tables in Shelters #1, #2, and #3 in Armstrong Park. We will now also have ADA accessible tables at all shelters in both Armstrong Park and Monkey Mountain Park.

ADDITIONAL TERMS & CONDITIONS OF SALE

1. Use & Maintenance. Customer agrees to regularly inspect and maintain the Equipment, and to provide, inspect and maintain appropriate safety surfacing under and around the Equipment, in accordance with Miracle's product literature and the most current Consumer Product Safety Commission Handbook for Public Playground Safety.
2. Default, Remedies & Delinquency Charges. Customer's failure to pay any invoice when due, or its failure to otherwise comply with the terms of this Quote, shall constitute a default under all unsatisfied invoices ("Event of Default"). Upon an Event of Default, Miracle shall have all remedies available to it at law or equity, including, without limitation, all remedies afforded a secured creditor under the Uniform Commercial Code. Customer agrees to assist and cooperate with Miracle to accomplish its filing and enforcement of mechanic's or other liens with respect to the Equipment or its location or its repossession of the Equipment, and Customer expressly waives all rights to possess the Equipment after an Event of Default. All remedies are cumulative and not alternative, and no exercise by Miracle of a remedy will prohibit or waive the exercise of any other remedy. Customer shall pay all reasonable attorneys fees plus any costs of collection incurred by Miracle in enforcing its rights hereunder. Subject to any limitations under law, Customer shall pay to Miracle as liquidated damages, and not as a penalty, an amount equal to 1.5% per month of any payment that is delinquent in such month and is not received by Miracle within ten (10) days after the date on which due.
3. Limitation of Warranty/ Indemnity. MIRACLE MAKES NO EQUIPMENT WARRANTIES EXCEPT FOR THOSE STANDARD WARRANTIES ISSUED WITH THE EQUIPMENT, WHICH ARE INCORPORATED HEREIN BY THIS REFERENCE. MIRACLE SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND ANY LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. CUSTOMER AGREES TO DEFEND, INDEMNIFY AND SAVE MIRACLE HARMLESS FROM ALL CLAIMS OF ANY KIND FOR DAMAGES OF ANY KIND ARISING OUT OF CUSTOMERS ALTERATION OF THE EQUIPMENT, ITS FAILURE TO MAINTAIN THE EQUIPMENT, ITS FAILURE TO PROPERLY SUPERVISE EQUIPMENT USE, OR ITS FAILURE TO PROVIDE AND MAINTAIN APPROPRIATE TYPES AND DEPTHS OF SAFETY SURFACING BENEATH AND AROUND THE EQUIPMENT IN ACCORDANCE WITH MIRACLES INSTALLATION AND OWNERS MANUALS AND THE MOST CURRENT CONSUMER PRODUCT SAFETY COMMISSION HANDBOOK FOR PUBLIC PLAYGROUND SAFETY.
4. Restrictions. Until all amounts due hereunder are paid in full, Customer shall not: (i) permit the Equipment to be levied upon or attached under any legal process; (ii) transfer title to the Equipment or any of Customer's rights therein; or (iii) remove or permit the removal of the Equipment to any location not specified in this Quote.
5. Purchase Money Security Interest. Customer hereby grants, pledges and assigns to Miracle, and Miracle hereby reserves a purchase money security interest in, the Equipment in order to secure the payment and performance in full of all of Customer's obligations hereunder. Customer agrees that Miracle may file one or more financing statements, in order to allow it to perfect, acquire and maintain a superior security interest in the Equipment.
6. Choice of Law and Jurisdiction. All agreements between Customer and Miracle shall be interpreted, and the parties' obligations shall be governed, by the laws of the State of Missouri without reference to its choice of law provisions. Customer hereby consents to the personal jurisdiction of the state and federal courts located in the city and county of St. Louis, Missouri.
7. Title; Risk of Loss; Insurance. Miracle Retains full title to all Equipment until full payment is received by Miracle. Customer assumes all risk of loss or destruction of or damage to the Equipment by reason of theft, fire, water, or any other cause, and the occurrence of any such casualty shall not relieve the Customer from its obligations hereunder and under any invoices. Until all amounts due hereunder are paid in full, Customer shall insure the Equipment against all such losses and casualties.
8. Waiver; Invalidity. Miracle may waive a default hereunder, or under any invoice or other agreement between Customer and Miracle, or cure such a default at Customer's expense, but shall have no obligation to do either. No waiver shall be deemed to have taken place unless it is in writing, signed by Miracle. Any one waiver shall not constitute a waiver of other defaults or the same kind of default at another time, or a forfeiture of any rights provided to Miracle hereunder or under any invoice. The invalidity of any portion of this Quote shall not affect the force and effect of the remaining valid portions hereof.
9. Entire Agreement; Amendment; Binding Nature. This fully-executed Quote, as supplemented by Change Orders and invoices containing exact amounts of estimates provided herein, constitutes the complete and exclusive agreement between the parties. A Change Order is a written instrument signed by the Customer and Miracle stating their agreement as to any amendment in the terms of this Quote. Customer acknowledges that Change Orders may result in delays and additional costs. The parties agree that all Change Orders shall include appropriate adjustments in price and time frames relating to any requested amendments. Upon full execution, this Quote shall be binding upon and inure to the benefit of the parties and their successors and assigns.
10. Counterparts; Electronic Transmission. This Quote, any invoice, and any other agreement between the parties, may be executed in counterparts, each of which shall constitute an original. The facsimile or other electronic transmission of any signed original document and retransmission of any signed facsimile or other electronic transmission shall be the same as the transmission of an original. At the request of either party, the parties will confirm facsimile or other electronically transmitted signatures by signing an original document.

MEMORANDUM

TO: RICK ARROYO, DIRECTOR OF COMMUNITY DEVELOPMENT

FROM: PATRICK MARTIN, MAINTENANCE SUPERINTENDENT

SUBJECT: 2019 ANNUAL METER REPLACEMENT PROGRAM

DATE: JANUARY 23RD, 2019

In order to provide a reliable, high quality water supply system, Public Works continually upgrades and improves our water system and facilities. The Annual Water Meter Replacement Program is an important part of upgrading our water system.

Water meters are the devices used to measure the amount of water delivered to customers. Replacing old water meters helps ensure the City can accurately track both individual water usage for billing purposes and also monitor and evaluate community water demands.

The Meter Replacement Program is normally scheduled to start in the early spring, and continue through the year. For the Meter Replacement Program Public Works will attempt to contact the resident at the time of installation if nobody is home and we cannot make contact a letter will be hung on the door to each water customer explaining what work was performed at their residence. After receiving their letter, each customer is encouraged to call with any questions or to understand the change out process.

BOARD OF ALDERMEN AGENDA ITEM**

MEETING DATE	2/11/2019	
BILL NUMBER	R19-10	
AGENDA TITLE	<p>A RESOLUTION BY THE BOARD OF ALDERMEN OF THE CITY OF GRAIN VALLEY, MISSOURI AUTHORIZING THE CITY ADMINISTRATOR TO ENTER INTO AN AGREEMENT WITH SAPP DESIGN ASSOCIATES, ARCHITECTS P.C. FOR ARCHITECTURAL SERVICES RELATED TO PLANNING AND DESIGN OF A MUNICIPAL COMPLEX</p>	
REQUESTING DEPARTMENT	Administration	
PRESENTER	Ken Murphy, Assistant City Administrator/Ryan Hunt, City Administrator	
FISCAL INFORMATION	Cost as recommended:	\$380,000
	Budget Line Item:	280-88-79910 - \$300,000 100-09-76900 - \$80,000
	Balance Available:	280-88-79910 - \$300,000 100-09-76900 - \$236,000
	New Appropriation Required:	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
PURPOSE	To begin the planning process relative to constructing a municipal complex at the Sni-A-Bar Farms property at the northwest corner of Sni-A-Bar and Buckner Tarsney	
BACKGROUND	A RFQ was issued for architectural services related to the planning and design of a municipal complex on the City owned property. There were six firms who responded to the RFQ. The firms were Sapp Design, SFS, Clark-Enerson, Archimages, PGAV and Convergence Design.	

SPECIAL NOTES	Sapp Design will be tasked with all phases of evaluating the site as well as our needs to come up with design proposals for the complex. This will entail a large amount of public involvement to ensure we get a complex that meets our needs and is approved by the public.
ANALYSIS	After listening to the presentations from the three firms and evaluating their responses to a set of questions, it was determined that Sapp Design was the firm that best met our needs. They have a strong track record of working with public entities on projects similar to ours. They also have a strong team put together utilizing other firms that specialize in certain areas. Ollson Associates will be utilized for civil and structural engineering services and Ochsner Hare & Hare will be the landscape architect consultant. Mechanical and electrical engineering will be handled by Branch Patterson. Helix Architecture & Design will be an architectural consultant on the project. Sapp and Helix have worked together on a number of projects like this which was another strong selling point. The recreational consultant will be Ballard King and Associates and the aquatic consultant will be Larkin Aquatics. Staff felt that the team constructed by Sapp will allow for all aspects of planning and design to be studied and properly planned for to ensure at the end of the day, the municipal complex will meet all the needs of the City.
PUBLIC INFORMATION PROCESS	Notice of RFQ was published and placed on the website

 **AIA[®] Document B133[™] – 2014****Standard Form of Agreement Between Owner and Architect, Construction Manager as Constructor Edition**

AGREEMENT made as of the 1st day of January in the year Two Thousand Nineteen (2019)

BETWEEN the Architect's client identified as the Owner:

City of Grain Valley
711 South Main Street
Grain Valley, Missouri 64029

and the Architect:

Sapp Design Associates, Architects P.C.
3750 S. Fremont Avenue
Springfield, Missouri 65804
Missouri Certificate of Authority #000607

for the following Project:

(Paragraphs deleted)

The Owner owns a sixty-eight (68) acre land parcel located at the Northwest corner of SNI-A-BAR and Buckner Tarsney roads in the City of Grain Valley, Missouri. The Owner intends to develop a new Municipal Complex at this location which may consist of a new City Hall, Community Center, Aquatics Facilities, and support facilities. The Owner is working with the Mid-Continent Public Library district to provide a portion of this property for a new branch library. 'Exhibit A' attached further describes other aspects of the proposed project.

The Construction Manager (if known):

(Name, legal status, address and other information)

To-be-determined

The Owner and Architect agree as follows.

ADDITIONS AND DELETIONS:

The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

This document is intended to be used in conjunction with AIA Documents A201[™]–2007, General Conditions of the Contract for Construction; A133[™]–2009 Standard Form of Agreement Between Owner and Construction Manager as Constructor where the basis of payment is the Cost of the Work Plus a Fee with a Guaranteed Maximum Price; and A134[™]–2009 Standard Form of Agreement Between Owner and Construction Manager as Constructor where the basis of payment is the Cost of the Work Plus a Fee without a Guaranteed Maximum Price. AIA Document A201[™]–2007 is adopted in this document by reference. Do not use with other general conditions unless this document is modified.

ARTICLE 1 INITIAL INFORMATION

§ 1.1 This Agreement is based on the Initial Information set forth in this Section 1.1.

This agreement is based on the initial information contained in the Exhibit 'A' Request for Qualifications document, RFQ#2018-01. For the purposes of the Owner and the anticipated multiple projects and delivery methodology being utilized the Architects scope of services will be provided in the three categories as follows:

Phase I Pre-design & Master Planning Services:

The Architect will assist the owner with a variety of services during this phase in order to make preparations for the delivery of the Phase II Schematic Design & Campaign Process. The following is a representation of those services;

- a.) Project and Process alignment
- b.) Assist with CMr selection
- c.) Building/Complex Programming
- d.) Budget Overview
- e.) Site Analysis
- f.) Site Master Planning
- g.) Financial Feasibility/Operational Analysis (Ballard-King, see Exhibit 'C')
- h.) Conceptual Design
- i.) Community Meetings (2 sessions)

Phase II Basic Schematic Design Services:

Upon general completion of Phase I services the Architect should have the information necessary to proceed with the

Init.

Basic Services identified in Article 3.3 Schematic Design. Prior to starting this Phase, an amendment to the agreement will be required to properly identify the projects, services scope and associated Architectural fee relative to the conclusions from Phase I. The following is a representation of these services;

- a.) Schematic Design (75% - 100% completion)
- b.) Campaign process assistance
- c.) Community presentation (1)
- d.) Renderings, Graphics, VR and publications materials

Phase III Basic Architectural Services:

Upon authorization from the Owner, the Architect will provide the remaining balance of Basic Architectural Services as identified in Article 3.3, 3.4, 3.5, and 3.6. Prior to starting this Phase, an amendment to the agreement will be required to properly identify the projects, services, scope, and associated Architectural fee relative to the conclusions from Phase I and Phase II. The following is a representation of these services;

- a.) Remaining Basic services; Schematics Design, Design Development and Construction Administration

§ 1.1.1 The Owner's program for the Project:

(Paragraph deleted)

The Phase I scope of services identified in this agreement will include assisting the Owner in developing the project program criteria, and other project parameters which are unknown in totality at the date of agreement.

§ 1.1.2 The Project's physical characteristics:

(Paragraph deleted)

Once this information is determined for the project/projects, then an amendment will be executed to identify those physical characteristics.

§ 1.1.3 The Owner's budget for the Cost of the Work, as defined in Section 6.1:

(Paragraph deleted)

The Phase I services include assisting the Owner and Construction Manager to identify the cost parameters of the work.

§ 1.1.4 The Owner's anticipated design and construction schedule:

- .1 Design phase milestone dates, if any:
 - Phase I Service, with a duration of approximately nine (9) months.
 - Phase II Service, unknown, to-be-determined.
 - Phase III Service, unknown, to-be-determined.

- .2 Commencement of construction:
 - Phase III, Unknown, to-be-determined

- .3 Substantial Completion date or milestone dates:
(Paragraphs deleted)

Phase III, Unknown, to-be-determined

§ 1.1.5 The Owner intends to retain a Construction Manager pursuant to the following agreement:

- AIA Document A133–2009, Standard Form of Agreement Between Owner and Construction Manager as Constructor where the basis of payment is the Cost of the Work Plus a Fee with a Guaranteed Maximum Price.
- AIA Document A134–2009, Standard Form of Agreement Between Owner and Construction Manager as Constructor where the basis of payment is the Cost of the Work Plus a Fee without a Guaranteed Maximum Price.

Init.

§ 1.1.6 The Owner's requirements for accelerated or fast-track scheduling or phased construction are set forth below:
(Paragraph deleted)

Unknown, to-be-determined

§ 1.1.7 Other Project information:

(Paragraph deleted)

Unknown, to-be-determined

§ 1.1.8 The Owner identifies the following representative in accordance with Section 5.5:

Ryan Hunt, City Administrator

Ken Murphy, Assistant City Administrator

§ 1.1.9 The persons or entities, in addition to the Owner's representative, who are required to review the Architect's submittals to the Owner are as follows:

(Paragraph deleted)

To-be-determined

§ 1.1.10 The Owner will retain the following consultants:

(List name, legal status, address and other information.)

.1 Construction Manager:

To-be-determined

.2 Cost Consultant (if in addition to the Construction Manager):

(Paragraphs deleted)

Not Applicable

.3 Land Surveyor:

To-be-determined

(Paragraphs deleted)

.3 Geotechnical Engineer:

To-be-determined

.5 Civil Engineer:

Ollson Associates (retained by Architect)

1801 McGee Street, #101

Kansas City, Missouri 64108

.6 Other consultants:

(List any other consultants retained by the Owner, such as a Project or Program Manager, or scheduling consultant.)

Landscape Architect (retained by Architect):

Ochsner Hare & Hare

1801 McGee Street, #101

Kansas City, Missouri 64108

§ 1.1.11 The Architect identifies the following representative in accordance with Section 2.3:

(List name, address and other information.)

Michael Sapp, Project Administrator

James Stufflebeam, Project Team Leader

Kristi Beattie, Project Manager

§ 1.1.12 The Architect will retain the consultants identified in Sections 1.1.12.1 and 1.1.12.2:

(Paragraph deleted)

§ 1.1.12.1 Consultants retained under Basic Services:

.1 Structural Engineer:

Ollson Associates
1801 McGee Street, #101
Kansas City, Missouri 64108

.2 Mechanical Engineer:

Branch Pattern
7400 College Blvd. #150
Overland Park, Kansas 66210

.3 Electrical Engineer:

Branch Pattern
7400 College Blvd. #150
Overland Park, Kansas 66210

§ 1.1.12.2 Consultants retained under Additional Services:

To be determined

§ 1.1.13 Other Initial Information on which the Agreement is based:

Other Consultants retained by the Architect includes;

Architectural Consultant:

Helix Architecture & Design, Inc.
1629 Walnut
Kansas City, Missouri 64108

Recreational Consultant:

Ballard-King and Associates
2743 East Ravenhill Circle
Highlands Ranch, CO 80126

Aquatics Consultant:

Larkin Aquatics
9001 State Line Road #200
Kansas City, Missouri 64114

§ 1.2 The Owner and Architect may rely on the Initial Information. Both parties, however, recognize that such information may materially change and, in that event, the Owner and the Architect shall appropriately adjust the schedule, the Architect's services and the Architect's compensation.

ARTICLE 2 ARCHITECT'S RESPONSIBILITIES

§ 2.1 The Architect shall provide the professional services as set forth in this Agreement.

§ 2.2 The Architect shall perform its services consistent with the professional skill and care ordinarily provided by architects practicing in the same or similar locality under the same or similar circumstances. The Architect shall perform its services as expeditiously as is consistent with such professional skill and care and the orderly progress of the Project.

Init.

§ 2.3 The Architect shall provide its services in conjunction with the services of a Construction Manager as described in the agreement identified in Section 1.1.5. The Architect shall not be responsible for actions taken by the Construction Manager.

§ 2.4 The Architect shall identify a representative authorized to act on behalf of the Architect with respect to the Project.

§ 2.5 Except with the Owner's knowledge and consent, the Architect shall not engage in any activity, or accept any employment, interest or contribution that would reasonably appear to compromise the Architect's professional judgment with respect to this Project.

§ 2.6 Insurance. The Architect shall maintain the following insurance for the duration of this Agreement. If any of the requirements set forth below exceed the types and limits the Architect normally maintains, the Owner shall reimburse the Architect for any additional cost as set forth in Section 11.8.3.

§ 2.6.1 Commercial General Liability with policy limits of not less than **Two Million Dollars and No/Cents (\$2,000,000.00)** for each occurrence and **Four Million Dollars and No/Cents (\$4,000,000.00)** in the aggregate for bodily injury and property damage.

§ 2.6.2 Automobile Liability covering vehicles owned by the Architect and non-owned vehicles used by the Architect with a combined single limit of **One Million Dollars and No/Cents (\$1,000,000.00)** in the aggregate for bodily injury and property damage along with any other statutorily required automobile coverage.

§ 2.6.3 The Architect may achieve the required limits and coverage for Commercial General Liability and Automobile Liability through a combination of primary and excess liability insurance, provided such primary and excess insurance policies result in the same or greater coverage as those required under Sections 2.6.1 and 2.6.2.

§ 2.6.4 Workers' Compensation at statutory limits and Employers Liability with policy limits of not less than **One Million Dollars and No/Cents (\$1,000,000.00)** each accident.

§ 2.6.5 Professional Liability covering negligent acts, errors and omissions in the performance of professional services, with policy limits of not less than **Two Million Dollars and No/Cents (\$2,000,000.00)** per claim and **Two Million Dollars and No/Cents (\$2,000,000.00)** in the aggregate.

(Paragraph deleted)

§ 2.6.7 The Architect may provide to the Owner certificates of insurance evidencing compliance with the requirements in this Section 2.6 if requested.

ARTICLE 3 SCOPE OF ARCHITECT'S BASIC SERVICES

§ 3.1 The Architect's Basic Services consist of those described in Article 3 and include services from Consultants identified in Article 1.1.12 and Article 1.1.13. Services not set forth in this Article 3 are Additional Services unless identified otherwise.

§ 3.1.1 The Architect shall manage the Architect's services, consult with the Owner and the Construction Manager, research applicable design criteria, attend Project meetings, communicate with members of the Project team and report progress to the Owner.

§ 3.1.2 The Architect shall coordinate its services with those services provided by the Owner, the Construction Manager, and the Owner's consultants. The Architect shall be entitled to rely on the accuracy and completeness of services and information furnished by the Owner, the Construction Manager, and the Owner's consultants. The Architect shall provide prompt written notice to the Owner if the Architect becomes aware of any error, omission or inconsistency in such services or information.

§ 3.1.3 As soon as practicable after the date of this Agreement, the Architect shall submit to the Owner a schedule of the Architect's services for inclusion in the Project schedule prepared by the Construction Manager. The schedule of the Architect's services shall include design milestone dates, anticipated dates when cost estimates or design reviews may occur, and allowances for periods of time required (1) for the Owner's review, (2) for the Construction Manager's

Init.

review, (3) for the performance of the Construction Manager's Preconstruction Phase services, (4) for the performance of the Owner's consultants, and (5) for approval of submissions by authorities having jurisdiction over the Project.

§ 3.1.4 The Architect will submit information to the Construction Manager and participate in revising the Project schedule as it relates to the Architect's services. The Architect will review and approve, or take other appropriate action upon, the portion of the Project schedule relating to the performance of the Architect's services.

§ 3.1.5 Once the Owner and Architect agree to the time limits established by the Project schedule, the Owner and Architect shall not exceed them, except for reasonable cause.

§ 3.1.6 The Architect shall not be responsible for an Owner's directive or substitution, or for the Owner's acceptance of non-conforming work, made without the Architect's approval.

§ 3.1.7 The Architect shall, at appropriate times, in coordination with the Construction Manager, contact the governmental authorities required to approve the Construction Documents and the entities providing utility services to the Project. In designing the Project, the Architect shall respond to applicable design requirements imposed by such governmental authorities and by such entities providing utility services.

§ 3.1.8 The Architect shall assist the Owner and Construction Manager in connection with the Owner's responsibility for filing documents required for the approval of governmental authorities having jurisdiction over the Project.

§ 3.2 Evaluation of the Construction Manager's Guaranteed Maximum Price Proposals or Control Estimate

§ 3.2.1 Prior to the Owner's acceptance of the Guaranteed Maximum Price proposal or Control Estimate, as applicable, the Architect shall consider the Construction Manager's requests for substitutions and, upon written request of the Construction Manager, provide clarification or interpretations pertaining to the Drawings, Specifications, and other documents submitted by the Architect. The Architect and Construction Manager shall include the Owner on all communications related to substitution requests, clarifications, and interpretations.

§ 3.2.2 During one of the design phases, the Owner will receive Guaranteed Maximum Price proposals or Control Estimate, as appropriate, from the Construction Manager. The Architect shall assist the Owner in reviewing the Construction Manager's proposal or estimate. The Architect's review is not for the purpose of discovering errors, omissions, or inconsistencies; for the assumption of any responsibility for the Construction Manager's proposed means, methods, sequences, techniques, or procedures; or for the verification of any estimates of cost or estimated cost proposals. In the event that the Architect discovers any inconsistencies or inaccuracies in the information presented, the Architect will notify the Owner and Construction Manager.

§ 3.2.3 Upon authorization by the Owner, and subject to Section 4.3.1.15, the Architect shall update the Drawings, Specifications, and other documents to incorporate the agreed upon assumptions and clarifications contained in the Guaranteed Maximum Price Amendment or Control Estimate.

§ 3.3 Schematic Design Phase Services

§ 3.3.1 The Architect shall review the program and other information furnished by the Owner and Construction Manager, and shall review current laws, codes, and regulations applicable to the period of Architect's execution of phased services.

§ 3.3.2 The Architect shall prepare a preliminary evaluation of the Owner's program, schedule, budget for the Cost of the Work, Project site, and other Initial Information, each in terms of the other, to ascertain the requirements of the Project. The Architect shall notify the Owner of (1) any inconsistencies discovered in the information, and (2) other information or consulting services that may be reasonably needed for the Project.

§ 3.3.3 The Architect shall present its preliminary evaluation to the Owner and Construction Manager and shall discuss with the Owner and Construction Manager alternative approaches to design and construction of the Project. The Architect shall reach an understanding with the Owner regarding the requirements of the Project.

§ 3.3.4 Based on the Project requirements agreed upon with the Owner, the Architect shall prepare and present to the Owner and Construction Manager, for the Owner's approval, a preliminary design illustrating the scale and relationship of the Project components.

Init.

§ 3.3.5 Based on the Owner's approval of the preliminary design, the Architect shall prepare Schematic Design Documents for the Owner's approval and the Construction Manager's review. The Schematic Design Documents may consist of drawings and other documents including a site plan, if appropriate, and preliminary building plans, sections and elevations; and may include some combination of study models, perspective sketches, or digital modeling. Preliminary selections of major building systems and construction materials shall be noted on the drawings or described in writing.

(Paragraph deleted)

§ 3.3.5.2 The Architect shall consider with the Owner and the Construction Manager the value of alternative materials, building systems and equipment, together with other considerations based on program and aesthetics in developing a design for the Project that is consistent with the Owner's schedule and budget for the Cost of the Work.

§ 3.3.6 The Architect shall submit the Schematic Design Documents to the Owner and the Construction Manager. The Architect shall meet with the Construction Manager to review the Schematic Design Documents.

§ 3.3.7 Upon receipt of the Construction Manager's review comments and cost estimate at the conclusion of the Schematic Design Phase, the Architect shall take action as required under Section 6.4, identify agreed upon adjustments to the Project's size, quality, or budget, and request the Owner's approval of the Schematic Design Documents. If revisions to the Schematic Design Documents are required to comply with the Owner's budget for the Cost of the Work at the conclusion of the Schematic Design Phase, the Architect shall incorporate the required revisions in the Design Development Phase.

§ 3.3.8 In the further development of the Drawings and Specifications during this and subsequent phases of design, the Architect shall be entitled to rely on the accuracy of the estimates of the Cost of the Work, which are to be provided by the Construction Manager under the Construction Manager's agreement with the Owner.

§ 3.4 Design Development Phase Services

§ 3.4.1 Based on the Owner's approval of the Schematic Design Documents, and on the Owner's authorization of any adjustments in the Project requirements and the budget for the Cost of the Work pursuant to Section 5.4, the Architect shall prepare Design Development Documents for the Owner's approval and Construction Manager's review. The Design Development Documents shall be based upon information provided, and estimates prepared by, the Construction Manager and shall illustrate and describe the development of the approved Schematic Design Documents and shall consist of drawings and other documents including plans, sections, elevations, typical construction details, and diagrammatic layouts of building systems to fix and describe the size and character of the Project as to architectural, structural, mechanical and electrical systems, and such other elements as may be appropriate. The Design Development Documents shall also include outline specifications that identify major materials and systems and establish in general their quality levels.

§ 3.4.2 Prior to the conclusion of the Design Development Phase, the Architect shall submit the Design Development Documents to the Owner and the Construction Manager. The Architect shall meet with the Construction Manager to review the Design Development Documents.

§ 3.4.3 Upon receipt of the Construction Manager's information and estimate at the conclusion of the Design Development Phase, the Architect shall take action as required under Sections 6.5 and 6.6 and request the Owner's approval of the Design Development Documents.

§ 3.5 Construction Documents Phase Services

§ 3.5.1 Based on the Owner's approval of the Design Development Documents, and on the Owner's authorization of any adjustments in the Project requirements and the budget for the Cost of the Work, the Architect shall prepare Construction Documents for the Owner's approval and the Construction Manager's review. The Construction Documents shall illustrate and describe the further development of the approved Design Development Documents and shall consist of Drawings and Specifications setting forth in detail the quality levels of materials and systems and other requirements for the construction of the Work. The Owner and Architect acknowledge that in order to construct the Work the Construction Manager will provide additional information, including Shop Drawings, Product Data, Samples and other similar submittals, which the Architect shall review in accordance with Section 3.6.4.

§ 3.5.2 The Architect shall incorporate into the Construction Documents the design requirements of governmental authorities having jurisdiction over the Project.

§ 3.5.3 During the development of the Construction Documents, if requested by the Owner, the Architect shall assist the Owner and Construction Manager in the development and preparation of (1) the Conditions of the Contract for Construction (General, Supplementary and other Conditions) and (2) a project manual that includes the Conditions of the Contract for Construction and Specifications and may include sample forms.

§ 3.5.4 Prior to the conclusion of the Construction Documents Phase, the Architect shall submit the Construction Documents to the Owner and the Construction Manager. The Architect shall meet with the Construction Manager to review the Construction Documents.

§ 3.5.5 Upon receipt of the Construction Manager's information and estimate at the conclusion of the Construction Documents Phase, the Architect shall take action as required under Section 6.7 and obtain the Owner's approval of the Construction Documents.

§ 3.6 Construction Phase Services

§ 3.6.1 General

§ 3.6.1.1 The Architect shall provide administration of the Contract between the Owner and the Construction Manager as set forth below and in AIA Document A201™–2007, General Conditions of the Contract for Construction. If the Owner and Construction Manager modify AIA Document A201–2007, those modifications shall not affect the Architect's services under this Agreement unless the Owner and the Architect amend this Agreement.

§ 3.6.1.2 Subject to Section 4.3, the Architect's responsibility to provide Construction Phase Services commences upon the Owner's acceptance of the Construction Manager's Guaranteed Maximum Price proposal, the Owner's approval of the Construction Manager's Control Estimate, or the Owner's issuance of a Notice to Proceed to the Construction Manager. Subject to Section 4.3, the Architect's responsibility to provide Construction Phase Services terminates on the date the Architect issues the final Certificate for Payment.

§ 3.6.1.3 The Architect shall advise and consult with the Owner and Construction Manager during the Construction Phase Services. The Architect shall have authority to act on behalf of the Owner only to the extent provided in this Agreement. The Architect shall not have control over, charge of, or responsibility for the construction means, methods, techniques, sequences or procedures, or for safety precautions and programs in connection with the Work, nor shall the Architect be responsible for the Construction Manager's failure to perform the Work in accordance with the requirements of the Contract Documents. The Architect shall not have control over or charge of, and shall not be responsible for, acts or omissions of the Construction Manager or of any other persons or entities performing portions of the Work.

§ 3.6.2 Evaluations of the Work

§ 3.6.2.1 The Architect shall visit the site at intervals appropriate to the stage of construction, or as otherwise required in Section 4.3.3, to become generally familiar with the progress and quality of the portion of the Work completed, and to determine, in general, if the Work observed is being performed in a manner indicating that the Work, when fully completed, will be in accordance with the Contract Documents. However, the Architect shall not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work. On the basis of the site visits, the Architect shall keep the Owner reasonably informed about the progress and quality of the portion of the Work completed, and report to the Owner (1) known deviations from the Contract Documents and from the most recent construction schedule, and (2) defects and deficiencies observed in the Work.

§ 3.6.2.2 The Architect has the authority to reject Work that does not conform to the Contract Documents. Whenever the Architect considers it necessary or advisable, the Architect shall have the authority to require inspection or testing of the Work in accordance with the provisions of the Contract Documents, whether or not such Work is fabricated, installed or completed. However, neither this authority of the Architect nor a decision made in good faith either to exercise or not to exercise such authority shall give rise to a duty or responsibility of the Architect to the Construction Manager, Subcontractors, material and equipment suppliers, their agents or employees or other persons or entities performing portions of the Work.

§ 3.6.2.3 The Architect shall interpret and decide matters concerning performance under, and requirements of, the Contract Documents on written request of either the Owner or Construction Manager. The Architect's response to such requests shall be made in writing within any time limits agreed upon or otherwise with reasonable promptness.

§ 3.6.2.4 Interpretations and decisions of the Architect shall be consistent with the intent of and reasonably inferable from the Contract Documents and shall be in writing or in the form of drawings. When making such interpretations and decisions, the Architect shall endeavor to secure faithful performance by both Owner and Construction Manager, shall not show partiality to either, and shall not be liable for results of interpretations or decisions rendered in good faith. The Architect's decisions on matters relating to aesthetic effect shall be final if consistent with the intent expressed in the Contract Documents.

§ 3.6.2.5 Unless the Owner and Construction Manager designate another person to serve as an Initial Decision Maker, as that term is defined in AIA Document A201-2007, the Architect shall render initial decisions on Claims between the Owner and Construction Manager as provided in the Contract Documents.

§ 3.6.3 Certificates for Payment to Construction Manager

§ 3.6.3.1 The Architect shall review and certify the amounts due the Construction Manager and shall issue certificates in such amounts. The Architect's certification for payment shall constitute a representation to the Owner, based on the Architect's evaluation of the Work as provided in Section 3.6.2 and on the data comprising the Construction Manager's Application for Payment, that, to the best of the Architect's knowledge, information and belief, the Work has progressed to the point indicated and that the quality of the Work is in accordance with the Contract Documents. The foregoing representations are subject (1) to an evaluation of the Work for conformance with the Contract Documents upon Substantial Completion, (2) to results of subsequent tests and inspections, (3) to correction of minor deviations from the Contract Documents prior to completion, and (4) to specific qualifications expressed by the Architect.

§ 3.6.3.2 The issuance of a Certificate for Payment shall not be a representation that the Architect has (1) made exhaustive or continuous on-site inspections to check the quality or quantity of the Work, (2) reviewed construction means, methods, techniques, sequences or procedures, (3) reviewed copies of requisitions received from Subcontractors and material suppliers and other data requested by the Owner to substantiate the Construction Manager's right to payment, or (4) ascertained how or for what purpose the Construction Manager has used money previously paid on account of the Contract Sum.

§ 3.6.3.3 The Architect shall maintain a record of the Applications and Certificates for Payment during course of the construction.

§ 3.6.4 Submittals

§ 3.6.4.1 The Architect shall review the Construction Manager's submittal schedule. The Architect's action in reviewing submittals shall be taken in accordance with the approved submittal schedule or, in the absence of an approved submittal schedule, with reasonable promptness while allowing sufficient time in the Architect's professional judgment to permit adequate review.

§ 3.6.4.2 In accordance with the Architect-approved submittal schedule, the Architect shall review and approve or take other appropriate action upon the Construction Manager's submittals such as Shop Drawings, Product Data and Samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. Review of such submittals is not for the purpose of determining the accuracy and completeness of other information such as dimensions, quantities, and installation or performance of equipment or systems, which are the Construction Manager's responsibility. The Architect's review shall not constitute approval of safety precautions or, unless otherwise specifically stated by the Architect, of any construction means, methods, techniques, sequences or procedures. The Architect's approval of a specific item shall not indicate approval of an assembly of which the item is a component.

§ 3.6.4.3 If the Contract Documents specifically require the Construction Manager to provide professional design services or certifications by a design professional related to systems, materials or equipment, the Architect shall specify the appropriate performance and design criteria that such services must satisfy. The Architect shall review shop drawings and other submittals related to the Work designed or certified by the design professional retained by the Construction Manager that bear such professional's seal and signature when submitted to the Architect. The Architect

Init.

shall be entitled to rely upon the adequacy, accuracy and completeness of the services, certifications and approvals performed or provided by such design professionals.

§ 3.6.4.4 Subject to the provisions of Section 4.3, the Architect shall review and respond to requests for information about the Contract Documents. The Architect shall set forth in the Contract Documents the requirements for requests for information. Requests for information shall include, at a minimum, a detailed written statement that indicates the specific Drawings or Specifications in need of clarification and the nature of the clarification requested. The Architect's response to such requests shall be made in writing within any time limits agreed upon, or otherwise with reasonable promptness. If appropriate, the Architect shall prepare and issue supplemental Drawings and Specifications in response to requests for information.

§ 3.6.4.5 The Architect shall maintain a record of submittals and copies of submittals supplied by the Construction Manager in accordance with the requirements of the Contract Documents during construction.

§ 3.6.5 Changes in the Work

§ 3.6.5.1 The Architect may authorize minor changes in the Work that are consistent with the intent of the Contract Documents and do not involve an adjustment in the Contract Sum or an extension of the Contract Time. Subject to the provisions of Section 4.3, the Architect shall prepare Change Orders and Construction Change Directives for the Owner's approval and execution in accordance with the Contract Documents.

§ 3.6.5.2 The Architect shall maintain records relative to changes in the Work during construction.

§ 3.6.6 Project Completion

§ 3.6.6.1 The Architect shall conduct observations to determine the date or dates of Substantial Completion and the date of final completion; issue Certificates of Substantial Completion; receive from the Construction Manager and forward to the Owner, for the Owner's review and records, written warranties and related documents required by the Contract Documents and assembled by the Construction Manager; and issue a final Certificate for Payment based upon a final observation indicating the Work complies with the requirements of the Contract Documents.

§ 3.6.6.2 The Architect's observations shall be conducted with the Owner to check conformance of the Work with the requirements of the Contract Documents and to verify the accuracy and completeness of the list submitted by the Construction Manager of Work to be completed or corrected.

§ 3.6.6.3 When the Work is found to be substantially complete, the Architect shall inform the Owner about the balance of the Contract Sum remaining to be paid the Construction Manager, including the amount to be retained from the Contract Sum, if any, for final completion or correction of the Work.

§ 3.6.6.4 The Architect shall forward to the Owner the following information received from the Construction Manager: (1) consent of surety or sureties, if any, to reduction in or partial release of retainage or the making of final payment; (2) affidavits, receipts, releases and waivers of liens or bonds indemnifying the Owner against liens; and (3) any other documentation required of the Construction Manager under the Contract Documents.

§ 3.6.6.5 Upon request of the Owner, and prior to the expiration of one year from the date of Substantial Completion, the Architect shall, without additional compensation, conduct a meeting with the Owner to review the facility operations and performance.

ARTICLE 4 ADDITIONAL SERVICES

§ 4.1 Additional Services listed below are not included in Basic Services but may be required for the Project. The Architect shall provide the listed Additional Services only if specifically designated in the table below as the Architect's responsibility, and the Owner shall compensate the Architect as provided in Section 11.2.

(Designate the Additional Services the Architect shall provide in the second column of the table below. In the third column indicate whether the service description is located in Section 4.2 or in an attached exhibit. If in an exhibit, identify the exhibit.)

Services	Responsibility (Architect, Owner or Not Provided)	Location of Service Description (Section 4.2 below or in an exhibit attached to this document and identified below)
§ 4.1.1 Assistance with selection of the Construction Manager	Owner/Architect	4.2 and 11.2
§ 4.1.2 Programming and Master Planning	Owner/Architect	4.2 and 11.2
<i>(Row deleted)</i>		
§ 4.1.3 Multiple preliminary designs	Architect	4.2 and 11.2
§ 4.1.4 Measured drawings	Architect	4.2 and 11.2
§ 4.1.5 Existing facilities surveys	Not Provided	
§ 4.1.6 Site Evaluation and Planning	Owner/Architect	4.2 and 11.2
§ 4.1.7 Building Information Modeling	Not Provided	
§ 4.1.8 Civil engineering	Architect	4.2 and 11.2
§ 4.1.9 Landscape design	Architect	4.2 and 11.2
§ 4.1.10 Architectural Interior Design, Furniture, and Furnishings	Architect	4.2 and 11.2
<i>(Row deleted)</i>		
§ 4.1.11 Value Analysis	Not Provided	
§ 4.1.12 Detailed cost estimating	Owner	
§ 4.1.13 On-site project representation	Not Provided	
§ 4.1.14 Conformed construction documents	Not Provided	
§ 4.1.15 As-Designed Record drawings	Architect	4.2 and 11.2
<i>(Row deleted)</i>		
§ 4.1.16 As-Constructed Record drawings	Not Provided	
§ 4.1.17 Post occupancy evaluation	Architect	4.2 and 11.2
§ 4.1.18 Facility Support Services	Not Provided	
§ 4.1.19 Tenant-related services	Not Provided	
§ 4.1.20 Coordination of Owner's consultants	Owner/Architect	4.2 and 11.2
§ 4.1.21 Building Technology Design and Planning	Owner/Architect	4.2 and 11.2
<i>(Row deleted)</i>		
§ 4.1.22 Security Evaluation and Planning	Owner/Architect	4.2 and 11.2
§ 4.1.23 Basic Commissioning	Architect	4.2 and 11.2
§ 4.1.24 Extensive sustainable design services	Not Provided	
§ 4.1.25 LEED® Certification	Not Provided	
§ 4.1.26 Historic Preservation	Not Provided	
<i>(Row deleted)</i>		

§ 4.2 Insert a description of each Additional Service designated in Section 4.1 as the Architect's responsibility, if not further described in an exhibit attached to this document.

- 4.1.1 Construction Manager Selection:** The Architect will assist the Owner with review of a 'Request for Qualification' document, solicitation process, interviewing of candidates, fee analysis, and contract agreement overview.
- 4.1.2 Programming/Master Planning:** The Architect will assist the Owner in developing a program document and will provide services necessary to provide a Site Development Master Plan as part of the Phase I, Pre-design services.
- 4.1.3 Multiple Designs:** The Architect may provide up to a maximum of three (3) preliminary design options for the Owner's review and selection of a preferred design that is to be used to develop the Schematic Design.
- 4.1.4 Measured Drawings:** The Architect will perform services as deemed necessary to collect existing building information for drawing as-built documents for use in developing the Construction documents.

Init.

- 4.1.6 Site Evaluation and Master Planning:** The Architect will assist the Owner in evaluating the proposed property as part of the Phase I Master Planning services.
- 4.1.8 Civil Engineering:** The Architect will provide Basic Civil Engineering Services as deemed necessary.
- 4.1.9 Landscape Design:** The Architect will provide basic landscape parameters in the construction documents as required to meet planning and zoning criteria.
- 4.1.10 Architectural Interior Design:** The Architect will provide the services of an Interior Designer for the selection of Finishes, Furniture, Art Work, and Accessories.
- 4.1.15 As-Designed Record Drawings:** The Architect will only provide record drawings for the Architectural and Engineering documents as designed along with any additional documents they executed during the construction phase.
- 4.1.17 Post Occupancy Warranty:** The Architect will assist the Owner with any necessary and reasonable Contractor warranty work during the one-year post-construction cycle as will be specified in the Project Manual document.
- 4.1.20 Coordination of Owner's Consultants:** The Architect will work with the Owner in coordinating each of their Consultant's work during the course of the project.
- 4.1.22 Security Planning:** The Architect will provide assistance in coordinating Owner's Vendors/Specialists documentation that is required to be part of the Architect's base bid packet.

§ 4.3 Additional Services may be provided after execution of this Agreement, without invalidating the Agreement. Except for services required due to the fault of the Architect, any Additional Services provided in accordance with this Section 4.3 shall entitle the Architect to compensation pursuant to Section 11.3 and an appropriate adjustment in the Architect's schedule.

§ 4.3.1 Upon recognizing the need to perform the following Additional Services, the Architect shall notify the Owner with reasonable promptness and explain the facts and circumstances giving rise to the need. The Architect shall not proceed to provide the following services until the Architect receives the Owner's written authorization:

- .1 Services necessitated by a change in the Initial Information, previous instructions or recommendations given by the Construction Manager or the Owner, approvals given by the Owner, or a material change in the Project including, but not limited to, size, quality, complexity, the Owner's schedule or budget for Cost of the Work, or bid packages in addition to those listed in Section 1.1.6;
- .2 Making revisions in Drawings, Specifications, or other documents (as required pursuant to Section 6.6 and 6.7), when such revisions are required because the Construction Manager's estimate of the Cost of the Work, Guaranteed Maximum Price proposal, or Control Estimate exceeds the Owner's budget, except where such excess is due to changes initiated by the Architect in scope, capacities of basic systems, or the kinds and quality of materials, finishes, or equipment;
- .3 Services necessitated by the Owner's request for extensive sustainable design alternatives, such as unique system designs, in-depth material research, energy modeling, or LEED® certification;
- .4 Changing or editing previously prepared Instruments of Service necessitated by the enactment or revision of codes, laws or regulations, or official interpretations;
- .5 Services necessitated by decisions of the Owner or Construction Manager not rendered in a timely manner or any other failure of performance on the part of the Owner or the Owner's consultants or contractors;
- .6 Preparing digital data for transmission to the Owner's consultants and contractors, or to other Owner authorized recipients;
- .7 Preparation of design and documentation for alternate bid or proposal requests proposed by the Owner or Construction Manager;
- .8 Preparation for, and attendance at, a public presentation, meeting or hearing during Phase III services;

Init.

- .9 Preparation for, and attendance at a dispute resolution proceeding or legal proceeding, except where the Architect is party thereto;
- .10 Evaluation of the qualifications of bidders or persons providing proposals;
- .11 Consultation concerning replacement of Work resulting from fire or other cause during construction;
- .12 Assistance to the Initial Decision Maker, if other than the Architect;
- .13 Services necessitated by replacement of the Construction Manager or conversion of the Construction Manager as constructor project delivery method to an alternative project delivery method;
- .14 Services necessitated by the Owner's delay in engaging the Construction Manager; and
- .15 Making revisions in Drawings, Specifications, and other documents resulting from substitutions included in the agreed to assumptions and clarifications contained in the Guaranteed Maximum Price Amendment or Control Estimate.

§ 4.3.2 To avoid delay in the Construction Phase, the Architect shall provide the following Additional Services, notify the Owner with reasonable promptness, and explain the facts and circumstances giving rise to the need. If the Owner subsequently determines that all or parts of those services are not required, the Owner shall give prompt written notice to the Architect, and the Owner shall have no further obligation to compensate the Architect for those services:

- .1 Reviewing a Construction Manager's submittal out of sequence from the submittal schedule agreed to by the Architect;
- .2 Responding to the Construction Manager's requests for information that are not prepared in accordance with the Contract Documents or where such information is available to the Construction Manager from a careful study and comparison of the Contract Documents, field conditions, other Owner-provided information, Construction Manager-prepared coordination drawings, or prior Project correspondence or documentation;
- .3 Preparing Change Orders, and Construction Change Directives that require evaluation of the Construction Manager's proposals and supporting data, or the preparation or revision of Instruments of Service;
- .4 Evaluating an extensive number of Claims as the Initial Decision Maker;
- .5 Evaluating substitutions proposed by the Owner or Construction Manager and making subsequent revisions to Instruments of Service resulting therefrom; or
- .6 To the extent the Architect's Basic Services are affected, providing Construction Phase Services 60 days after (1) the date of Substantial Completion of the Work for each project or (2) the anticipated date of Substantial Completion, identified in Initial Information, whichever is earlier.

§ 4.3.3 The Architect shall provide Construction Phase Services exceeding the limits set forth below as Additional Services. When the limits below are reached, the Architect shall notify the Owner:

- .1 Up to **Two (2)** reviews of each Shop Drawing, Product Data item, sample and similar submittals of the Construction Manager for each project.
- .2 Up to **Two (2)** visits to the site per month by the Architect over the duration of the Project during construction for each project.
- .3 Up to **Two (2)** inspections for any portion of the Work to determine whether such portion of the Work is substantially complete in accordance with the requirements of the Contract Documents for each project.
- .4 Up to **Two (2)** inspections for any portion of the Work to determine final completion.

§ 4.3.4 If the services covered by this Agreement have not been completed within **Thirty-Six (36)** months of the date of this Agreement, through no fault of the Architect, extension of the Architect's services beyond that time shall be compensated as Additional Services.

ARTICLE 5 OWNER'S RESPONSIBILITIES

§ 5.1 Unless otherwise provided for under this Agreement, the Owner shall provide information in a timely manner regarding requirements for and limitations on the Project, including a written program which shall set forth the Owner's objectives, schedule, constraints and criteria, including space requirements and relationships, flexibility, expandability, special equipment, systems and site requirements. Within 15 days after receipt of a written request from the Architect, the Owner shall furnish the requested information as necessary and relevant for the Architect to evaluate, give notice of or enforce lien rights.

§ 5.2 The Owner shall retain a Construction Manager to provide services, duties, and responsibilities as described in the agreement selected in Section 1.1.5.

§ 5.3 The Owner shall furnish the services of a Construction Manager that shall be responsible for creating the overall Project schedule. The Owner shall adjust the Project schedule, if necessary, as the Project proceeds.

§ 5.4 The Owner shall establish and periodically update the Owner's budget for the Project, including (1) the budget for the Cost of the Work as defined in Section 6.1; (2) the Owner's other costs; and, (3) reasonable contingencies related to all of these costs. The Owner shall furnish the services of a Construction Manager that shall be responsible for preparing all estimates of the Cost of the Work. If the Owner significantly increases or decreases the Owner's budget for the Cost of the Work, the Owner shall notify the Architect. The Owner and the Architect shall thereafter agree to a corresponding change in the budget for the Cost of the Work or in the Project's scope and quality.

§ 5.4.1 The Owner acknowledges that accelerated, phased or fast-track scheduling provides a benefit, but also carries with it associated risks. Such risks include the Owner incurring costs for the Architect to coordinate and redesign portions of the Project affected by procuring or installing elements of the Project prior to the completion of all relevant Construction Documents, and costs for the Construction Manager to remove and replace previously installed Work. If the Owner selects accelerated, phased or fast-track scheduling, the Owner agrees to include in the budget for the Project sufficient contingencies to cover such costs.

§ 5.5 The Owner shall identify a representative authorized to act on the Owner's behalf with respect to the Project. The Owner shall render decisions and approve the Architect's submittals in a timely manner in order to avoid unreasonable delay in the orderly and sequential progress of the Architect's services.

§ 5.6 The Owner shall furnish surveys to describe physical characteristics, legal limitations and utility locations for the site of the Project, and a written legal description of the site. The surveys and legal information shall include, as applicable, grades and lines of streets, alleys, pavements and adjoining property and structures; designated wetlands; adjacent drainage; rights-of-way, restrictions, easements, encroachments, zoning, deed restrictions, boundaries and contours of the site; locations, dimensions and necessary data with respect to existing buildings, other improvements and trees; and information concerning available utility services and lines, both public and private, above and below grade, including inverts and depths. All the information on the survey shall be referenced to a Project benchmark.

§ 5.7 The Owner shall furnish services of geotechnical engineers, which may include but are not limited to test borings, test pits, determinations of soil bearing values, percolation tests, evaluations of hazardous materials, seismic evaluation, ground corrosion tests and resistivity tests, including necessary operations for anticipating subsoil conditions, with written reports and appropriate recommendations.

§ 5.8 The Owner shall coordinate the services of its own consultants with those services provided by the Architect. Upon the Architect's request, the Owner shall furnish copies of the scope of services in the contracts between the Owner and the Owner's consultants. The Owner shall furnish the services of consultants other than those designated in this Agreement, or authorize the Architect to furnish them as an Additional Service, when the Architect requests such services and demonstrates that they are reasonably required by the scope of the Project. The Owner shall require that its consultants maintain professional liability insurance and other liability insurance as appropriate to the services provided.

§ 5.9 The Owner shall furnish tests, inspections and reports required by law or the Contract Documents, such as structural, mechanical, and chemical tests, tests for air and water pollution, and tests for hazardous materials.

§ 5.10 The Owner shall furnish all legal, insurance and accounting services, including auditing services, that may be reasonably necessary at any time for the Project to meet the Owner's needs and interests.

§ 5.11 The Owner shall provide prompt written notice to the Architect and Construction Manager if the Owner becomes aware of any fault or defect in the Project, including errors, omissions or inconsistencies in the Architect's Instruments of Service.

§ 5.12 The Owner shall contemporaneously provide the Architect with any communications provided to the Construction Manager about matters arising out of or relating to the Contract Documents. Communications by and with the Architect's consultants shall be through the Architect.

§ 5.13 Before executing the Contract for Construction, the Owner shall coordinate the Architect's duties and responsibilities set forth in the Contract for Construction with the Construction Manager's services set forth in this Agreement. The Owner shall provide the Architect a copy of the executed agreement between the Owner and Construction Manager, including the General Conditions of the Contract for Construction. If there are any conditions and/or requirements of that agreement which effect the Architects contract of services and fees, then corresponding adjustments shall be executed in the Owner/Architect agreement.

§ 5.14 The Owner shall provide the Architect access to the Project site prior to commencement of the Work and shall obligate the Construction Manager to provide the Architect access to the Work wherever it is in preparation or progress.

ARTICLE 6 COST OF THE WORK

§ 6.1 For purposes of this Agreement, the Cost of the Work shall be the total cost to the Owner to construct all elements of the Project designed or specified by the Architect and shall include the Construction Managers' general conditions costs, overhead, and profit along with any bid alternates and construction allowances. The Cost of the Work does not include the compensation of the Architect, the compensation of the Construction Manager for Preconstruction Phase services, the costs of the land, rights-of-way, financing, or other costs that are the responsibility of the Owner.

§ 6.2 The Owner's budget for the Cost of the Work is provided in the Initial Information, and may be adjusted throughout the Project as required under Sections 5.4 and 6.4. Evaluations of the Owner's budget for the Cost of the Work represent the Architect's judgment as a design professional.

§ 6.3 The Owner shall require the Construction Manager to include appropriate contingencies for design, bidding or negotiating, price escalation, and market conditions in estimates of the Cost of the Work. The Architect shall be entitled to rely on the accuracy and completeness of estimates of the Cost of the Work the Construction Manager prepares as the Architect progresses with its Basic Services. The Architect shall prepare, as an Additional Service, revisions to the Drawings, Specifications or other documents required due to the Construction Manager's inaccuracies or incompleteness in preparing cost estimates. The Architect may review the Construction Manager's estimates solely for the Architect's guidance in completion of its services.

(Paragraphs deleted)

§ 6.4 If, prior to the conclusion of the Design Development Phase, the Construction Manager's estimate of the Cost of the Work exceeds the Owner's budget for the Cost of the Work, the Architect, in consultation with the Construction Manager, shall make appropriate recommendations to the Owner to adjust the Project's size, quality or budget, and the Owner shall cooperate with the Architect in making such adjustments.

§ 6.5 If the Construction Manager's estimate of the Cost of the Work at the conclusion of the Design Development Phase exceeds the Owner's budget for the Cost of the Work, the Owner shall

- .1 give written approval of an increase in the budget for the Cost of the Work;
- .2 in consultation with the Architect and Construction Manager, revise the Project program, scope, or quality as required to reduce the Cost of the Work; or
- .3 implement any other mutually acceptable alternative.

§ 6.6 If the Owner chooses to proceed under Section 6.5.2, the Architect, with additional compensation, shall incorporate the required modifications in the Construction Documents Phase as necessary to comply with the Owner's budget for the Cost of the Work at the conclusion of the Design Development Phase Services, or the budget as adjusted under Section 6.5.1. The Architect's modification of the Construction Documents shall be the limit of the Architect's responsibility as a Basic Service under this Article 6.

§ 6.7 After incorporation of modifications under Section 6.6, the Architect shall, as an Additional Service, make any required revisions to the Drawings, Specifications or other documents necessitated by the Construction Manager's subsequent cost estimates, the Guaranteed Maximum Price proposal, or Control Estimate that exceed the Owner's

budget for the Cost of the Work, except when the excess is due to changes initiated by the Architect in scope, basic systems, or the kinds and quality of materials, finishes or equipment.

ARTICLE 7 COPYRIGHTS AND LICENSES

§ 7.1 The Architect and the Owner warrant that in transmitting Instruments of Service, or any other information, the transmitting party is the copyright owner of such information or has permission from the copyright owner to transmit such information for its use on the Project. If the Owner and Architect intend to transmit Instruments of Service or any other information or documentation in digital form, they shall endeavor to establish necessary protocols governing such transmissions.

§ 7.2 The Architect and the Architect's consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and shall retain all common law, statutory and other reserved rights, including copyrights. Submission or distribution of Instruments of Service to meet official regulatory requirements or for similar purposes in connection with the Project is not to be construed as publication in derogation of the reserved rights of the Architect and the Architect's consultants.

§ 7.3 Upon execution of this Agreement, the Architect grants to the Owner a nonexclusive license to use the Architect's Instruments of Service solely and exclusively for purposes of constructing, using, maintaining, altering and adding to the Project, provided that the Owner substantially performs its obligations, including prompt payment of all sums when due, under this Agreement. The Architect shall obtain similar nonexclusive licenses from the Architect's consultants consistent with this Agreement. The license granted under this section permits the Owner to authorize the Construction Manager, Subcontractors, Sub-subcontractors, and material or equipment suppliers, as well as the Owner's consultants and separate contractors, to reproduce applicable portions of the Instruments of Service solely and exclusively for use in performing services or construction for the Project. If the Architect rightfully terminates this Agreement for cause as provided in Section 9.4, the license granted in this Section 7.3 shall terminate.

§ 7.3.1 In the event the Owner uses the Instruments of Service without retaining the authors of the Instruments of Service, the Owner releases the Architect and Architect's consultant(s) from all claims and causes of action arising from such uses. The Owner, to the extent permitted by law, further agrees to indemnify and hold harmless the Architect and its consultants from all costs and expenses, including the cost of defense, related to claims and causes of action asserted by any third person or entity to the extent such costs and expenses arise from the Owner's use of the Instruments of Service under this Section 7.3.1.

§ 7.4 Except for the licenses granted in this Article 7, no other license or right shall be deemed granted or implied under this Agreement. The Owner shall not assign, delegate, sublicense, pledge or otherwise transfer any license granted herein to another party without the prior written agreement of the Architect. Any unauthorized use of the Instruments of Service shall be at the Owner's sole risk and without liability to the Architect and the Architect's consultants.

ARTICLE 8 CLAIMS AND DISPUTES

§ 8.1 General

§ 8.1.1 The Owner and Architect shall commence all claims and causes of action, whether in contract, tort, or otherwise, against the other arising out of or related to this Agreement in accordance with the requirements of the method of binding dispute resolution selected in this Agreement within the period specified by applicable law, but in any case not more than **10 years after the date** of Substantial Completion of the Work. The Owner and Architect waive all claims and causes of action not commenced in accordance with this Section 8.1.1.

§ 8.1.2 To the extent damages are covered by property insurance, the Owner and Architect waive all rights against each other and against the contractors, consultants, agents and employees of the other for damages, except such rights as they may have to the proceeds of such insurance as set forth in AIA Document A201-2007, General Conditions of the Contract for Construction. The Owner or the Architect, as appropriate, shall require of the Construction Manager, contractors, consultants, agents and employees of any of them similar waivers in favor of the other parties enumerated herein.

(Paragraph deleted)

§ 8.1.4 The Architect and Owner waive consequential damages for claims, disputes or other matters in question arising out of or relating to this Agreement. This mutual waiver is applicable, without limitation, to all consequential damages due to either party's termination of this Agreement, except as specifically provided in Section 9.7.

§ 8.2 Mediation

§ 8.2.1 Any claim, dispute or other matter in question arising out of or related to this Agreement shall be subject to mediation as a condition precedent to binding dispute resolution. If such matter relates to or is the subject of a lien arising out of the Architect's services, the Architect may proceed in accordance with applicable law to comply with the lien notice or filing deadlines prior to resolution of the matter by mediation or by binding dispute resolution.

§ 8.2.2 The Owner and Architect shall endeavor to resolve claims, disputes and other matters in question between them by mediation which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of the Agreement. A request for mediation shall be made in writing, delivered to the other party to the Agreement, and filed with the person or entity administering the mediation. The request may be made concurrently with the filing of a complaint or other appropriate demand for binding dispute resolution but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order. If an arbitration proceeding is stayed pursuant to this section, the parties may nonetheless proceed to the selection of the arbitrator(s) and agree upon a schedule for later proceedings.

§ 8.2.3 The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

§ 8.2.4 If the parties do not resolve a dispute through mediation pursuant to this Section 8.2, the method of binding dispute resolution shall be the following:

(Check the appropriate box. If the Owner and Architect do not select a method of binding dispute resolution below, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, the dispute will be resolved in a court of competent jurisdiction.)

- Arbitration pursuant to Section 8.3 of this Agreement
- Litigation in a court of competent jurisdiction
- Other: *(Specify)*

(Paragraphs deleted)

ARTICLE 9 TERMINATION OR SUSPENSION

§ 9.1 If the Owner fails to make payments to the Architect in accordance with this Agreement, such failure shall be considered substantial nonperformance and cause for termination or, at the Architect's option, cause for suspension of performance of services under this Agreement. If the Architect elects to suspend services, the Architect shall give seven days' written notice to the Owner before suspending services. In the event of a suspension of services, the Architect shall have no liability to the Owner for delay or damage caused the Owner because of such suspension of services. Before resuming services, the Architect shall be paid all sums due prior to suspension and any expenses incurred in the interruption and resumption of the Architect's services. The Architect's fees for the remaining services and the time schedules shall be equitably adjusted.

§ 9.2 If the Owner suspends the Project, the Architect shall be compensated for services performed prior to notice of such suspension. When the Project is resumed, the Architect shall be compensated for expenses incurred in the interruption and resumption of the Architect's services. The Architect's fees for the remaining services and the time schedules shall be equitably adjusted.

§ 9.3 If the Owner suspends the Project for more than **Sixty (60)** cumulative days for reasons other than the fault of the Architect, the Architect may terminate this Agreement by giving not less than seven days' written notice.

§ 9.4 Either party may terminate this Agreement upon not less than seven days' written notice should the other party fail substantially to perform in accordance with the terms of this Agreement through no fault of the party initiating the termination.

Init.

§ 9.5 The Owner may terminate this Agreement upon not less than seven days' written notice to the Architect for the Owner's convenience and without cause.

§ 9.6 In the event of termination not the fault of the Architect, the Architect shall be compensated for services performed prior to termination, together with Reimbursable Expenses then due and all Termination Expenses as defined in Section 9.7.

§ 9.7 Termination Expenses are in addition to compensation for the Architect's services and include expenses directly attributable to termination for which the Architect is not otherwise compensated, plus an amount for the Architect's anticipated profit on the value of the services not performed by the Architect.

§ 9.8 The Owner's rights to use the Architect's Instruments of Service in the event of a termination of this Agreement are set forth in Article 7 and Section 11.9.

ARTICLE 10 MISCELLANEOUS PROVISIONS

§ 10.1 This Agreement shall be governed by the law of the place where the Project is located, except that if the parties have selected arbitration as the method of binding dispute resolution, the Federal Arbitration Act shall govern Section 8.3.

§ 10.2 Terms in this Agreement shall have the same meaning as those in AIA Document A201-2007, General Conditions of the Contract for Construction, except as modified in this Agreement. The term "Contractor" as used in A201-2007 shall mean the Construction Manager.

§ 10.3 The Owner and Architect, respectively, bind themselves, their agents, successors, assigns and legal representatives to this Agreement. Neither the Owner nor the Architect shall assign this Agreement without the written consent of the other.

§ 10.4 If the Owner requests the Architect to execute certificates, the proposed language of such certificates shall be submitted to the Architect for review at least 14 days prior to the requested dates of execution. If the Owner requests the Architect to execute consents reasonably required to facilitate assignment to a lender, the Architect may execute all such consents that are consistent with this Agreement, provided the proposed consent is submitted to the Architect for review at least 14 days prior to execution. The Architect shall not be required to execute certificates or consents that would require knowledge, services or responsibilities beyond the scope of this Agreement.

§ 10.5 Nothing contained in this Agreement shall create a contractual relationship with or a cause of action in favor of a third party against either the Owner or Architect.

§ 10.6 Unless otherwise required in this Agreement, the Architect shall have no responsibility for the discovery, presence, handling, removal or disposal of, or exposure of persons to, hazardous materials or toxic substances in any form at the Project site.

§ 10.7 The Architect shall have the right to include photographic or artistic representations of the design of the Project among the Architect's promotional and professional materials. The Architect shall be given reasonable access to the completed Project to make such representations. However, the Architect's materials shall not include the Owner's confidential or proprietary information if the Owner has previously advised the Architect in writing of the specific information considered by the Owner to be confidential or proprietary. The Owner shall provide professional credit for the Architect in the Owner's promotional materials for the Project.

§ 10.8 If the Architect or Owner receives information specifically designated by the other party as "confidential" or "business proprietary," the receiving party shall keep such information strictly confidential and shall not disclose it to any other person except to (1) its employees, (2) those who need to know the content of such information in order to perform services or construction solely and exclusively for the Project, or (3) its consultants and contractors whose contracts include similar restrictions on the use of confidential information.

Init.

ARTICLE 11 COMPENSATION

§ 11.1 For the Architect's Basic Services described under Article 3, the Owner shall compensate the Architect as follows:

The Architects Compensation structure and rates are identified for each of the Phased Services below:

PHASE I; PRE-DESIGN & MASTER PLANNING SERVICES:

The Architects compensation structure will be on an hourly rate basis utilizing the rates shown in paragraph 11.7. Compensation for the Architects consultants shall be the hourly amount invoiced to the Architect plus Ten Percent (10%). The approximate estimated value of Phase I services is around Three Hundred Eighty Thousand Dollars and No/Cents (\$380,000.00) plus any reimbursable expenses. If at any time it is determined that the fee may exceed the estimated value then the Architect will notify the Owner in advance of reaching that amount.

PHASE II; SCHEMATIC DESIGN AND CAMPAIGN ASSISTANCE:

Compensation for Services will be on a percentage of construction cost basis or a fixed lump sum fee basis. Upon the Owner's authorization of this Phase, the parties will negotiate the fee approach and the fee value. A contract amendment will be executed to formalize those terms.

PHASE III; BASIC ARCHITECTURAL SERVICES:

Compensation for Basic Services will be on a percentage of construction cost basis for all items designed, coordinated and/or specified by the Architect and is inclusive of the Construction Managers fees, contractors base bid, all bid alternates, profit, overhead, bonds and insurance cost. At the conclusion of Phase II services the fee rate will be determined upon the identification of the actual projects scope, schedule and the actual level of required services for Phase III. A contract amendment will be issued to authorize the Architects performance of services and the associated fee value.

§ 11.2 For Additional Services designated in Section 4.1, the Owner shall compensate the Architect as follows:

- 4.1.1 **Construction Manager and Owner Project Manager Selection:** This service will be provided as a Basic Service through the compensation value for Phase I Service in 11.1
- 4.1.2 **Programming/Master Planning Updates:** This service will be provided as a Basic Service through the compensation value for Phase I Service in 11.1
- 4.1.3 **Multiple Designs:** This service will be provided as a Basic Service through the compensation value in 11.1 for Phase II.
- 4.1.4 **Measured Drawings:** This service will be provided as a Basic Service through the compensation value in 11.1 for Phase I.
- 4.1.6 **Site Evaluation and Planning:** This service will be provided as a Basic Service through the compensation value for Phase I Service in 11.1.
- 4.1.8 **Civil Engineering:** This service will be provided as a Basic Service through the compensation value in 11.1.
- 4.1.9 **Landscape Design:** This service will be provided as a Basic Service through the compensation value in 11.1.
- 4.1.10 **Architectural Interior Design:** This service will be provided as a Basic Service through the compensation value for Phase II Service in 11.1.
- 4.1.15 **As-Designed Record Drawings:** This service will be provided as a Basic Service through the compensation value for Phase II Service in 11.1.
- 4.1.17 **Post Occupancy Warranty:** This service will be provided as a Basic Service through the compensation value for Phase II Service in 11.1.

- 4.1.20 Coordination of Owner's Consultants:** This service will be provided as a Basic Service through the compensation value in Phase I and Phase II Services in 11.1.
- 4.1.21 Building Technology:** This service will be provided as a Basic Service through the compensation value for Phase II Service in 11.1
- 4.1.22 Security Planning:** This service will be provided as a Basic Service through the compensation value in Phase II Service in 11.1.
- 4.1.23 Basic Commissioning:** This service will be provided as a Basic Service through the compensation value for Phase II Service in 11.1

§ 11.3 For Additional Services that may arise during the course of the Project, including those under Section 4.3, the Owner shall compensate the Architect as follows:
(Paragraph deleted)

The fee for Additional Services will be based on utilizing the Architect's current basic hourly rates in place at the time services were performed, see Article 11.7 for hourly rates.

Option – A lump sum, percentage fee or other fee formats may be utilized for any single specific additional services where hourly basis is not preferred by either party.

§ 11.4 Compensation for Phase I Service and any Additional Services of the Architect's consultants when not included in Sections 11.2 or 11.3, shall be the amount invoiced to the Architect plus **Ten percent (10%)**, or as otherwise stated below:

§ 11.5 Where compensation for Basic Services is based on a stipulated sum or percentage of the Cost of the Work, the compensation for each phase of services shall be as follows:

Schematic Design Plate	Twenty	Percent	(20%)
Design Development Phase	Twenty-Five	Percent	(25%)
Construction Documents Phase	Thirty-Five	Percent	(35%)
Construction Phase	Twenty	Percent	(20%)
Total Basic Compensation	One Hundred	Percent	(100%)

The Owner acknowledges that with an accelerated Project delivery, multiple bid package process, or Construction Manager as constructor project delivery method, the Architect may be providing its services in multiple Phases simultaneously. Therefore, the Architect shall be permitted to invoice monthly in proportion to services performed in each Phase of Services as appropriate.

§ 11.6 When compensation is based on a percentage of the Cost of the Work and any portions of the Project are deleted or otherwise not constructed, compensation for those portions of the Project shall be payable to the extent services are performed on those portions, in accordance with the schedule set forth in Section 11.5 based on (1) the Owner-accepted Guaranteed Maximum Price Amendment or Control Estimate, as applicable, or (2) if the Guaranteed Maximum Price proposal or Control Estimate has not been accepted by the Owner, the most recent estimate of the Cost of the Work prepared by the Construction Manager for such portions of the Project. The Architect shall be entitled to compensation in accordance with this Agreement for all services performed whether or not the Construction Phase is commenced.

§ 11.7 The hourly billing rates for services of the Architect and the Architect's consultants, if any, are set forth below. The rates shall be adjusted in accordance with the Architect's and Architect's consultants' normal review practices.

Rates shown reflect fiscal year January 1, 2019 through December 31, 2019 for Sapp Design Associates Architects, P.C..

(Table deleted)

§ 11.8 Compensation for Reimbursable Expenses

§ 11.8.1 Reimbursable Expenses are in addition to compensation for Basic and Additional Services and include expenses incurred by the Architect and the Architect's consultants directly related to the Project, as follows:

- .1 Transportation and authorized out-of-town travel and subsistence;
- .2 Long distance services, dedicated data and communication services, teleconferences, Project Web sites, and extranets;
- .3 Fees paid for securing approval of authorities having jurisdiction over the Project;
- .4 Printing, reproductions, plots, standard form documents;
- .5 Postage, handling and delivery;
- .6 Renderings, models, mock-ups, professional photography, and presentation materials requested by the Owner;
- .7 Architect's consultants' expense of professional liability insurance dedicated exclusively to this Project, or the expense of additional insurance coverage or limits if the Owner requests such insurance in excess of that normally carried by the Architect's consultants;
- .8 All taxes levied on professional services and on reimbursable expenses;
- .9 Site office expenses; and
- .10 Other similar Project-related expenditures.

§ 11.8.2 For Reimbursable Expenses the compensation shall be the expenses incurred by the Architect and the Architect's consultants plus **Ten percent (10%)** of the expenses incurred.

§ 11.8.3 If the insurance requirements listed in Section 2.6 exceed the types and limits the Architect normally maintains and the Architect incurred additional costs to satisfy such requirements, the Owner shall reimburse the Architect for such costs as set forth below:

To-be-determined at the time of any request from Owner.

§ 11.9 Compensation for Use of Architect's Instruments of Service

If the Owner terminates the Architect for its convenience under Section 9.5, or the Architect terminates this Agreement under Section 9.3, the Owner shall pay a licensing fee as compensation for the Owner's continued use of the Architect's Instruments of Service solely for purposes of completing, using and maintaining the Project as follows:

To-be-determined at the time of any request from the Owner.

§ 11.10 Payments to the Architect

§ 11.10.1 An initial payment of **Twenty Thousand Dollars and No/Cents (\$20,000.00)** shall be made upon execution of this Agreement and is the minimum payment under this Agreement. It shall be credited to the Owner's account in the final Phase I invoice.

Init.

§ 11.10.2 Unless otherwise agreed, payments for services shall be made monthly in proportion to services performed. Payments are due and payable upon presentation of the Architect's invoice. Amounts unpaid **Sixty (60)** calendar days after the invoice date shall bear interest at the rate entered below, or in the absence thereof at the legal rate prevailing from time to time at the principal place of business of the Architect.

(Paragraph deleted)

Current legal rate for each monthly period that an invoice is outstanding.

§ 11.10.3 The Owner shall not withhold amounts from the Architect's compensation to impose a penalty or liquidated damages on the Architect, or to offset sums requested by or paid to contractors for the cost of changes in the Work unless the Architect agrees or has been found liable for the amounts in a binding dispute resolution proceeding.

§ 11.10.4 Records of Reimbursable Expenses, expenses pertaining to Additional Services, and services performed on the basis of hourly rates shall be available to the Owner at mutually convenient times.

ARTICLE 12 SPECIAL TERMS AND CONDITIONS

Special terms and conditions that modify this Agreement are as follows:

12.1 Any delays in the continuous sequence of authorized Basic and Additional Services during Phase III Services not the fault of the Architect, exceeding Thirty (30) consecutive calendar days (during the performance of the listed phases or after the completion of a Phase) shall adjust the basic compensation Article 11.1 on the basis of the percentage of construction cost as follows:

Schematic Design	(.25%)
Design Development	(.25%)
Construction Documents	(determined at that time, but no less than .5%)

12.2 The following services are specifically excluded from the basic compensation of this contract. Reference Article 4 for other services are additional and/or optional services:

- a. Any public or private on-site utility infrastructure and roadway coordination and design.
- b. Environmental assessments and impact studies.
- c. Geotechnical Engineering Services.
- d. Special inspection testing and certifications.
- e. Building and Regulatory Permit Fees.
- f. Construction Staking.
- g. Providing Structural Building Calculations.
- h. Traffic Engineering.
- i. Land Surveying.
- j. Selection and specifying Security Systems, Phone Systems, Data, Technology System.

12.3 Special investigations, Analysis and/or Testing: The basic compensation rate in paragraph 11.2.1 does not include any special investigations, code analysis and/or testing of the existing structure and systems. Any services of this type and may be required by the local code authority or deemed necessary by the Architect, will be an additional service and billed according to article 11.3.

12.4 If, due to the Architect's error, any required item or component of the projects is omitted from the Architect's construction documents, the Architect shall not be responsible for paying the cost to add such item or component to the extent that such item or component would have been otherwise necessary to the project or otherwise adds value or betterment to the project. In no event will the Architect be responsible for any cost or expense that provides betterment, upgrade, or enhancement of the project. However, if due to the Architect's error and/or omission from the construction documents occur then the Architect under the basic fee value will provide the necessary services and documents required for the Contractor to incorporate that element.

12.5 In the event of any litigation arising from or related to this Agreement or the services provided under this Agreement, the prevailing party shall be entitled to recover from the non-prevailing party all reasonable costs incurred, including staff time, court costs, attorney's fees and all other related expenses in such litigation. In

Init.

the event of a non-adjudicative settlement of litigation between the parties or a resolution of a dispute by mediation, the term "prevailing party" shall be determined by that process.

- 12.6** Notwithstanding any other provisions of the Agreement, neither party shall be liable to the other for any consequential damages incurred due to the fault of the other party, regardless of the nature of this fault or whether it was committed by the Owner or the Architect, their employees, agents, subconsultants, or subcontractors. Consequential damages include, but are not limited to, loss of use and loss of profit.
- 12.7** To the fullest extent permitted by law, and notwithstanding any other provision of this Agreement, the total liability, in the aggregate, of the Architect and the Architect's officers, directors, partners, employees and subconsultants, and any of them to the Owner and anyone claiming by or through the Owner, for any and all claims, losses, costs or damages, including attorney's fees and costs and expert-witness fees and costs of any nature whatsoever or claims expenses resulting from or in any way related to the Project or the Agreement from any cause or causes shall not exceed the total coverages outlined in Article 2.6. It is intended that this limitation apply to any and all liability or cause of action however alleged or arising, unless otherwise prohibited by law.

ARTICLE 13 SCOPE OF THE AGREEMENT

§ 13.1 This Agreement represents the entire and integrated agreement between the Owner and the Architect and supersedes all prior negotiations, representations or agreements, either written or oral. This Agreement may be amended only by written instrument signed by both Owner and Architect.

§ 13.2 This Agreement is comprised of the following documents listed below:

- .1 AIA Document B133™–2014, Standard Form Agreement Between Owner and Architect, Construction Manager as Constructor Edition
- .2 AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, if completed, or the following:

(Paragraph deleted)

- .3 Other documents:
Exhibit 'A' Request for Qualifications, RFQ 2018-01
Exhibit 'B' Preliminary Schedule
Exhibit 'C' Market Analysis & Operations Plan scope of work outline

This Agreement entered into as of the day and year first written above.

**2018 REQUEST FOR QUALIFICATIONS FOR ARCHITECTURAL SERVICES
RFQ #2018-01**

The City of Grain Valley (referred to as the "City") hereby gives notice of their intent to contract for architectural services in connection with the design and construction of a new municipal complex and will accept sealed qualifications from qualified persons, contractors or firms interested in providing the following:

**SIX (6) SIGNED UNBOUND QUALIFICATIONS
& ONE (1) ELECTRONIC VERSION
MUST BE RECEIVED BY:
4:00 P.M. October 22, 2018**

PLEASE MARK YOUR SUBMITTAL "SEALED QUALIFICATION ARCHITECTURAL SERVICES" AND SEND IT TO:

**City of Grain Valley
Attention: Ken Murphy, Assistant City Administrator
711 Main St.
Grain Valley, Missouri 64029
816-847-6290**

The City reserves the right to reject any and all qualifications, to waive technical defects, and to select the qualification(s) deemed most advantageous to the City.

The undersigned certifies that he/she has the authority to bind this company in an agreement to supply the service or commodity in accordance with all terms and conditions specified herein. Please type or print the information below. Respondent is **REQUIRED** to complete, sign and return this form with their submittal.

General Conditions

PART I**GENERAL INFORMATION**

Firms will be responsible for all costs incurred in preparing or responding to this RFQ.

The City will select a firm to provide the required services based upon the Statements of Qualification received and the availability of the firm determined most qualified to provide the required services by the City's timelines for completion.

The City is exempt from Federal and State taxes and will execute the required exemption certificates.

The City is a political subdivision of the state of Missouri and any information submitted to the City is subject to release as provided for by Missouri Public Records Law. The City will take reasonable efforts to protect any information marked "confidential," to the extent allowed by Missouri Public Records Law. Confidential information must be submitted in a separate envelope, sealed and marked "Confidential Information" and will be returned to the proposer upon request, after the determination of a list of qualified firms. It is understood, however, that the City will have no liability for disclosure of such information. Any proprietary or otherwise sensitive information contained in or with any submittal is subject to potential disclosure. All other materials and documents submitted in response to the RFQ become the property of the City and will not be returned.

PROJECT BACKGROUND

The City of Grain Valley, Missouri (City) is in Eastern Jackson County along Interstate 70. Grain Valley is one of the fastest growing cities in Missouri. The 2010 US Census Population was 12,854 and is now estimated to be approximately 14,000. Grain Valley's Comprehensive Plan anticipates continued residential and commercial development through 2035, when the City is expected to be close to 32,000 people.

Grain Valley has seen a substantial amount of growth and redevelopment around the I-70 interchange and in the City's industrial parks. This growth is expected to continue as the population continues to grow and Grain Valley becomes more appealing for commercial development.

In 2014, DesignWorkshop completed a Comprehensive Plan to serve as a guide for future growth and development of the Grain Valley community. It outlines the vision of the community for future land use, parks and open space, transportation, and utilities. The full report can be reviewed online at: <https://www.cityofgrainvalley.org/wp-content/uploads/CompPlanReducedSize.pdf>

Shortly after Grain Valley's municipal building at 711 S. Main was opened in 2001, city leaders noticed they had a problem; the town was growing at such a fast pace they would have to expand or replace their new facility.

Since 2001, Grain Valley's population has swelled over 160 percent to about 14,000 residents. If that pace continues, and there is little reason to believe it won't, the town's population will triple in the next three decades.

The city must ensure there is enough space for a growing staff and city services as population continues to increase. Knowing there is a strain on existing facilities, city officials began looking for a building site where they could put a new, expandable municipal building, plus parks and recreational facilities.

Even though most future growth in Grain Valley is projected to the north the spacious site on the city's south end seemed like an attractive spot for the city's needs.

When William Rockhill Nelson died in April 1915, he left Sni-A-Bar Farm to a 30-year trust for the benefit of the people of Kansas City. The land was eventually purchased in the 1980's by a local developer. Ultimately, the property was foreclosed, split into three sections, and owned by different financial institutions. The remaining parcels totaled 113 acres.

The City of Grain Valley was able to purchase 40 acres of the largest parcel from Great Southern Bank, leaving 45 acres to a private owner, who would oversee stream and wetland mitigation. The owner's effort in that area is coordinated with the Army Corps of Engineers.

A central parcel of 11 acres, plus all the property's buildings, was purchased from the Bank of Lexington. The buildings include a guest house and a main house which meanders on the property with multiple additions, totaling about 30,000 square feet.

The final 17-acre parcel on the south side of the city's property was purchased in 2016 from the Bank of Odessa.

The name Sni-A-Bar is a bit of a mouthful, so city officials began using a different moniker for reference. It's called the Sni-A-Bar Property in all the legal documents but around city hall it's referred to as the Ponderosa.

The main house is a fascinating structure; it extends in multiple additions from an original, century-old structure of only about 900 square feet. It includes lush wooden paneling, a large kitchen, a quarter-mile-long tunnel in the basement that stretches to the Blue Branch Creek and its own indoor tower with a 1,000-gallon wooden tank, which provided gravity-fed water for drinking and bathing.

The big house prompted city officials to ask themselves about its value as a historic structure. Many of the features of the house that tied it to the early days of Sni-A-Bar Farm have been negated by ongoing additions that continued at least as recently as 2010.

The house has significance considering the history. The decision the city must make is, is the historic structure significant enough to put money into restoring it? Do we restore the original part of the house or do we start over with the property with new construction?

The City has partnered with the Mid-Continent Public Library to do site evaluations for a joint community project.

PROJECT SCOPE OF WORK

Various engineering services will be required within the Scope of Work of this RFQ. Firms must include their selection for the civil, structural, and M.E.P. engineering firm(s) within their qualifications. The municipal complex will include a City Hall, Community Center, Mid-Continent Public Library and possible aquatic center.

Following written notice by the City to proceed with work, the professional services of the architect/engineer shall include the general architectural, interior design, space needs, site layouts and engineering services required to analyze needs and develop recommendations as may be needed by the City during the term of the contract. The services required for the project may include, but are not limited to:

- Meet with the City Administrator or his designee to coordinate the project.
- Provide planning, programming, and design services for the project.
- Facilitate the design planning process through information gathering meetings.
- Perform site review and civil engineering studies as needed to establish the basis for the conceptual design.
- Develop a conceptual design for the project which will include, at a minimum, a proposed site plan, conceptual floor plan, conceptual rendering, budget estimates, approximate construction costs, and information on building massing and materials.
- Provide architectural, interior design, engineering and other services as needed for the design of the project.

The City's preliminary construction timetable is as follows and should be viewed as a relative or sample timeline. The Board may desire to compress or alter the timetable. Facility sizes may be adjusted as necessary due to budget estimates.

TENTATIVE SCHEDULE

- Deadline for receipt of Firm Qualifications and Response to RFQ – October 22, 2018 at 4:00pm
- Notification of interviews with City Administration – November 5, 2018
- Interviews – Week of November 19th and 26th
- Negotiated architectural fees and contract to City Administration – December 3, 2018
- City Administration recommendation to the Board of Aldermen December 10, 2018

PART II

STATEMENTS OF QUALIFICATION

Statements of qualifications should include the following:

1. Information regarding the firm's history;
2. Identification of the architect(s)/engineer(s) in charge of the project, as well as any other personnel assigned to the project, together with the education, technical training, and experience of these individuals;
3. The firm's experience in designing substantially similar projects i.e., design and construction of municipal buildings, etc.;
4. Availability of the firm's staff and other equipment and resources to achieve completion of the project on the time-line proposed.
5. Include a list of all current municipal design and construction projects, including projects for which the firm has submitted statements of qualification and is being considered to provide design services, and the status of each (i.e., what stage of design and/or construction, the estimated dates for completion of design and construction, and the staff assigned to each of the listed projects);
6. Past performance as reflected in evaluations of previous and current clients with respect to factors such as control of costs, quality of work, and meeting deadlines. The firm should include a list of three relevant projects

involving similar work, which the firm has designed during the past five years. Three of these projects should be the firm's most recent projects. The following information should be included for each project:

- a. Project owner, name of project and location;
 - b. Brief description of the project;
 - c. Year completed or anticipated completion date,
 - d. Construction cost;
 - e. Change order history for the project;
 - f. Other relevant information about the project and the firm's services;
 - g. Reference contact person and phone number;
7. The designated Project Manager will be identified and introduced and will be part of any presentations made to the City as part of the selection process.
8. Provide specific information on project budget development and the firm's experience with working with architects/engineers of record to refine project estimates over the past 5 years.
9. Explain the firm's experience, approach and specific expertise in planning for the client's use of technology.
10. The firm's practices with respect to site visits and project oversight.
11. Describe experiences with different building delivery models (CMR, DBB, DB, Multi-Prime, etc.) and preferred methods.
12. Description of the steps the firm will take to coordinate design and work on the project with the City with respect to maintaining the construction schedule and close-out of the project.
13. List a maximum of three (3) specific and unique qualities that set your firm apart from others as it relates to this project.
14. Any notable awards or certifications.

SUBMISSION REQUIREMENTS

The deadline for receipt of firm qualifications and responses to RFQ is Monday, October 22, 2018, at 4:00 PM.

Please prepare six (6) copies of the qualifications to be submitted. In addition, please submit an electronic copy of the qualifications in either in DOCX or PDF file format. The electronic copy shall be placed on a flash drive or CD and hand delivered or mailed with the hard copy. Mark the envelope in which the submittals are enclosed as "Qualifications for Architectural Services" and deliver to:

Ken Murphy, Assistant City Administrator
City of Grain Valley
711 S Main St
Grain Valley, MO 64029

It is the intent of this RFQ to describe the required services in sufficient detail to secure comparable qualifications.

Appropriate questions from firms that are intended to clarify the contents of this RFQ must be submitted in writing and directed to Ken Murphy, at the address listed above or kmurphy@cityofgrainvalley.org . Otherwise, contact with anyone in the City of Grain Valley or its Mayor/Board of Aldermen regarding the RFQ will disqualify the candidate from consideration.

LICENSE/PERMIT REQUIREMENTS

- The awarded individual or firm shall obtain a City of Grain Valley Occupational License within fifteen (15) calendar days of the date of the notification of award.
- The awarded individual or firm shall obtain any City of Grain Valley permits applicable to the work.

INSURANCE REQUIREMENT

Insurance Certificates evidencing the coverage described below shall be included in the qualifications.

- **Worker's Compensation Insurance** with statutory limits of not less than \$1,000,000 per accident.
- **Commercial General Liability Insurance** with a combined single limit of \$1,000,000 per occurrence. Successful bidder shall add the City of Grain Valley as an "additional insured" on a standard Commercial General Liability Policy during the course of construction.
- **Business Automobile Liability Insurance** with a combined single limit of not less than \$1,000,000 per occurrence.

EVALUATION & SELECTION

The City administrative staff will review and evaluate the qualifications in accordance with the evaluation criteria identified in Section VIII and rank the firms in order of their qualifications. Factors to be considered relative to the qualifications of the firm will include, but not be limited to, the firm's credentials, experience, capability to perform the work, and distance to the work site.

More specifically: the City will consider the following selection criteria to determine the most qualified firm for the project:

1. The specialized experience and technical competence of the team with respect to the design, construction, and remodeling of City and similar government facilities;
2. The capacity and capability of the team to perform the work, including specialized services, to complete the project;
3. The past record of performance of the firm with respect to such factors as control of costs, quality of work, and ability to meet schedules;
4. The ability to bring on local, national, or regional expertise to help create a team to create the best project solution;

5. The firm's proximity to and familiarity with the area in which this project is located with special consideration for firms located within the City limits

The three firms which appear to be the best qualified will be invited to participate in an oral interview with the City Administration to discuss more fully how their approach to this project satisfies the evaluation criteria. It is currently anticipated that firms invited to interview will be contacted no later than Monday, November 5, 2018 at 5 p.m. and interviews will be scheduled to be held the week of November 19th and 26th.

The City administrative staff will then begin the process of negotiating a contract for the work with the top-ranked firm using the parameters provided following the November presentation.

If the City administrative staff is unable to negotiate a satisfactory contract with the firm selected, staff will report to the Board that negotiations with that firm shall be terminated. The City administrative staff shall then undertake negotiations with another of the qualified firms selected. If there is a failing of accord with the second firm, negotiations with that firm shall be terminated. The City administrative staff shall then undertake negotiations with the third qualified firm.

If the City administrative staff is unable to negotiate a contract with any of the selected firms, the City administrative staff shall reevaluate the necessary architectural services, again compile a list of qualified firms and proceed in accordance with the Qualifications-Based Selection procedures as previously described.

The City reserves the right to reject any and all qualifications, to waive any irregularities in the qualifications received, and to accept the submittal deemed most advantageous to the best interest of the City.

The successful firm will be expected to present to the Board of Aldermen on December 10, 2018.

The contract will be awarded to the firm that the City Administration determines and recommends to the Board of Aldermen as the most qualified to provide the required services in a prompt, competent and professional manner.

ACCEPTANCE AND NOTIFICATION

Following approval by the Board of Aldermen of the City of Grain Valley, the City will notify the successful bidder of award and be requested to furnish the appropriate insurance certifications no later than fifteen (15) calendar days after the notice of award. Failure to comply with this requirement may be cause for cancellation of the award.

After the City receives and approves all required insurance and documentation, the City and successful bidder will execute the contract.

**PART III
GENERAL CONDITIONS
GOVERNING RESPONSES AND SUBSEQUENT CONTRACTS
City of Grain Valley, MO**

1. **SCOPE:** The following terms and conditions, unless otherwise modified by the City of Grain Valley within this document, shall govern the submission of qualifications and subsequent contracts. The City of Grain Valley reserves the right to reject any qualification that takes exception to these conditions.
2. **DEFINITIONS AS USED HEREIN:**
 - a. The term "request for qualification" means a solicitation of a formal, sealed qualification.
 - b. The term "respondent" means the person, firm, bidder or corporation who submits a formal sealed qualification.
 - c. The term "City" means City of Grain Valley, MO.
 - d. The term "Board of Aldermen" means the governing body of the City of Grain Valley, MO.
 - e. The term "contractor" means the respondent awarded a contract under this qualification.
3. **COMPLETING QUALIFICATION:** All information must be legible. Any and all corrections and/or erasures must be initialed. Each qualification must be signed in ink by an authorized representative of the respondent and required information must be provided. The contents of the qualification submitted by the successful respondent of this RFP will become a part of any contract award as a result of this solicitation.
4. **REQUEST FOR INFORMATION:** Any requests for clarification of additional information deemed necessary by any respondent to present a proper qualification shall be submitted in writing to the City of Grain Valley, 711 Main Street Grain Valley, MO 64029, referencing this RFP number, a minimum of five (5) calendar days prior to the qualification submission date. Any request received after the above stated deadline will not be considered. All requests received prior to the above stated deadline will be responded to in writing by the City in the form of an addendum addressed to all prospective respondents.
5. **CONFIDENTIALITY OF QUALIFICATION INFORMATION:** Each qualification must be submitted in or under cover of a sealed envelope to provide confidentiality of the information enclosed. The envelope should be sealed and clearly marked with RFP number and the name of the project.

All qualifications and supporting documents will remain confidential until a final contract has been executed. Information that discloses proprietary or financial information submitted in response to qualification statements will not become public information. This is in accordance with the Missouri Sunshine Law.
6. **SUBMISSION OF QUALIFICATION:** Qualifications are to be sealed and submitted to the City of Grain Valley, 711 Main Street Grain Valley, MO 64029, prior to the date and time indicated on the cover sheet. At such time, all qualifications received will be formally opened. The opening will consist of only the name and address recording of respondents.
7. **ADDENDA:** All changes, additions and/or clarifications in connection with this qualification will be issued by the Purchasing office in the form of a WRITTEN ADDENDUM. SUBMIT EQUAL NUMBER OF SIGNED ADDENDUM WITH THE NUMBER OF QUALIFICATIONS REQUIRED. Verbal responses and/or representations shall not be binding on the City.
8. **LATE QUALIFICATIONS AND MODIFICATION OR WITHDRAWALS:** Qualifications received after the date and time indicated on the cover sheet shall not be considered.

Qualifications may be withdrawn or modified in writing prior to the qualification submission deadline. Qualifications that are resubmitted or modified must be sealed and submitted to the Purchasing Office prior to the qualification submission deadline. Each respondent may submit only one (1) response to this qualification.
9. **BONDS:**

When a Bond is required it shall be executed with the proper sureties, through a company licensed to operate in the State of Missouri, and hold a current Certificate of Authority as an acceptable surety under 31 CFR Part 223 (and be listed on the current U.S. Department of the Treasury Circular 570 and have at least A Best's rating and a FPR9 or better financial performance rating per the current A.M. Best Company ratings.)
10. **NEGOTIATION:** The City reserves the right to negotiate any and all elements of this qualification.
11. **TERMINATION:** Subject to the provisions below, any contract derived from this Request For Qualification may be terminated by either party upon thirty (30) days advance written notice to the other party; but if any work or service hereunder is in progress, but not completed as of the date of termination, then said contract may be extended upon written approval of the City until said work or services are completed and accepted.
 - (a) **TERMINATION FOR CONVENIENCE**

In the event that the contract is terminated or cancelled upon request and for the convenience of the City, without the required thirty (30) days advance written notice, then the City shall negotiate reasonable termination costs, if applicable.
 - (b) **TERMINATION FOR CAUSE**

Termination by the City for cause, default or negligence on the part of the contractor shall be excluded from the foregoing provision; termination costs, if any, shall not apply. The thirty (30) days advance notice requirement is waived in the event of Termination for Cause.

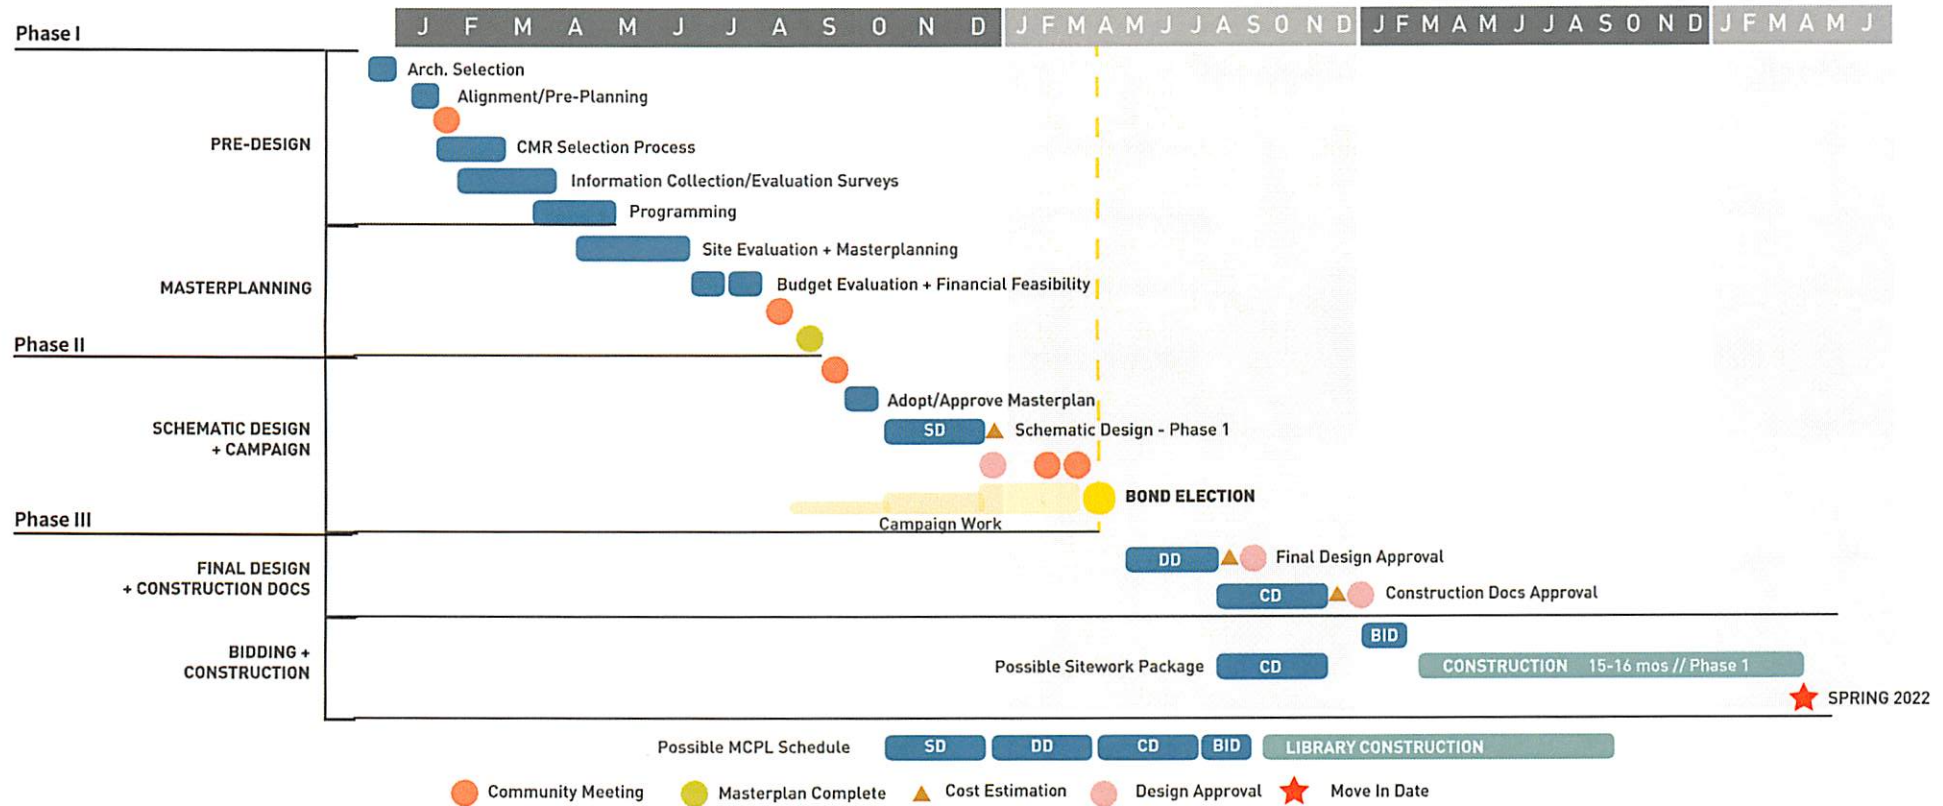

(c) TERMINATION DUE TO UNAVAILABILITY OF FUNDS IN SUCCEEDING FISCAL YEARS.

When funds are not appropriated or otherwise made available to support continuation of performance in a subsequent fiscal year, the contract shall be cancelled and the contractor shall be reimbursed for the reasonable value of any nonrecurring costs incurred but not amortized in the price of the supplies or services delivered under the contract.

12. **TAX EXEMPT:** The City and its Agencies are exempt from State and local sales taxes. Sites of all transactions derived from this qualification shall be deemed to have been accomplished within the State of Missouri.
13. **SAFETY:** All practices, materials, supplies, and equipment shall comply with the Federal Occupational Safety and Health Act, as well as any pertinent Federal, State and/or local safety or environmental codes.
14. **RIGHTS RESERVED:** The City reserves the right to reject any or all qualifications, to waive any minor informality or irregularity in any qualification, and to make award to the response deemed to be most advantageous to the City.
15. **RESPONDENT PROHIBITED:** Respondents are prohibited from assigning, transferring, conveying, subletting, or otherwise disposing of this qualification or any resultant agreement or its rights, title, or interest therein or its power to execute such agreement to any other person, company or corporation without the previous written approval of the City.
16. **DISCLAIMER OF LIABILITY:** The City, or any of its agencies, will not hold harmless or indemnify any respondent for any liability whatsoever.
17. **HOLD HARMLESS:** The contractor shall agree to protect defend, indemnify, and hold the Board of Aldermen, City of Grain Valley, MO, its officers, commissions, employees and agents free and harmless from and against any and all losses, penalties, damages, settlements, costs, charges, professional fees or other expenses or liabilities of every kind and character resulting from the error, omission or negligent act of the contractor, its agents, employees or representatives, in the performance of the contractor's duties under any agreement resulting from award of this qualification.
18. **LAW GOVERNING:** All contractual agreements shall be subject to, governed by, and construed according to the laws of the State of Missouri.
19. **ANTI-DISCRIMINATION CLAUSE:** No respondent on this request shall in any way, directly or indirectly discriminate against any person because of age, race, color, handicap, sex, national origin, or religious creed.
20. **DOMESTIC PRODUCTS**
The City of Grain Valley has adopted a formal written policy to encourage the purchase of products manufactured or produced in the United States. (City of Grain Valley Resolution No. 87-18, MO. State Statute No. 34.353, Section 3, (5).
21. **CONFLICTS:** No salaried officer or employee of the City, and no member of the Board of Aldermen shall have a financial interest, direct or indirect, in this contract. A violation of this provision renders the contract void. Federal conflict of interest regulations and applicable provisions of Sections 105.450 – 105.496 shall not be violated. Contractor covenants that it presently has no interest and shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance of services to be performed under this contract. The Contractor further covenants that in the performance of this contract no person having such interest shall be employed.
22. **DEBARMENT:** By submission of its response, the Contractor certifies that neither it nor its principals is presently debarred or suspended by any Federal Department or agency, including listing in the U.S. General Services Administrations List of Parties Excluded from Federal Procurement or Non-Procurement programs; or if the amount of this response is equal to in excess of \$100,000, that neither it nor its principals nor its subcontractors receiving sub-awards equal to or in excess of \$100,000 is presently disbarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from participation in this transaction by an Federal Department , agency or prevision of law. If the Contractor is unable to certify any of the statements in this certification, the responder must attach an explanation to its response.

Grain Valley Municipal Complex

BALLARD* KING
& ASSOCIATES LTD
 Recreation Facility Planning and Operation Consultants

Scope of Services

The following scope of services has been developed for SAPP Design Architects and the Grain Valley, MO project. We welcome the opportunity to customize the scope of services further if necessary.

Review Existing Information

B*K would like to review the following information at the beginning of the study.

- Completed Studies/Surveys
- Program Guides
- Recreation Facilities & Park Locations
- Department Budget
- Full-Time Staff Organizational Chart
- Department Mission/Vision & Cost Recovery Goals
- Existing Partnership Agreements

Market Assessment

The purpose of the market assessment is to determine any gaps in facilities and services in the surrounding area. Collection of this data helps confirm the facility program that has been identified. The market assessment will include:

- Identification of Service Areas
 - Primary
 - Secondary
- Demographic Analysis
 - Median Age
 - Median Income
 - Household Budget Spending Potential
 - Recreation & Entertainment Spending Potential
 - Age Distribution
 - Age Group Growth Projections
 - Race & Ethnicity
 - Tapestry
- Participation Statistics
 - National Sporting Goods Association
 - Current Activities Offered
 - Potential Future Activities
 - Development of a Unique Participation Percentage

BALLARD* KING
& ASSOCIATES LTD
Recreation Facility Planning and Operation Consultants

- National Endowment for the Arts
 - Identification of Programs
- Participation History
- Trends (national & regional)
 - Facility
 - Programming
 - Cost Recovery
- Identification of Other Service Providers
 - Government, Private, Non-Profit
 - Facility Size & Services
 - User Fees
 - Facility Utilization
 - Staff Structure

Partnership Evaluation

B*K would propose being on-site for two days for a combination of focus groups, stakeholder meetings, or public meetings.

BALLARDKING***
& ASSOCIATES LTD
Recreation Facility Planning and Operation Consultants

Facility & Program Verification

Based on all information collected and the proposed master plan, B*K will provide verification in the following areas.

- Outdoor Spaces & Indoor Spaces
 - Existing Facilities
 - Renovation Opportunities
 - Additions
 - Future Facilities
 - Spaces
 - Square Foot Allocation
 - Finishes
- Recreation Programs, Leagues, Enrichment
 - Existing Programs
 - Opportunities
 - Threats
 - Expansion/Contraction
 - Future Programs
 - Facility Dependency
 - Partnership Opportunities
 - Implementation

Operational Ranges

B*K will develop a series of operational ranges based on the master plan and resulting recommendations. The operational ranges will focus on the following areas:

- Hours of Operation
- Memberships (if applicable)
- Programs & Program Delivery
- Rentals
- Maintenance & Custodial
- Staff
- Potential Non-Tapped Revenue Identification
- Emerging Markets & Adaptation
- Recommendations by Area
- Implementation Time-Line (if applicable)
- Financial Impact

“The City has contracted with Helix Architecture + Design on many projects. The Kansas City Police Headquarters Renovation + Expansion and the Kansas City Police Leon Mercer Jordan East Patrol Station + Crime lab are just the most recent projects. We have experienced quality architecture and innovative design with Helix Architecture + Design. The programming, planning and detail to the architecture elements was outstanding. We were pleased with the attention to function of the spaces and the planning ability to design the areas to meet our changing needs.”

Eric Bosch, City Architect, City of Kansas City, Mo.

Re: City of Grain Valley

The associated team of Sapp Design & Helix is excited to submit this qualification packet. We bring a remarkable team of experts, architectural & interior designers, and highly recognized consultants all of which have a broad depth of local knowledge of the Kansas City regional construction marketplace.

A public space such as this will affect all demographics in a community. To participate in the creation of an engaging municipal complex and to see the transformational effect it can have on a community is an amazingly rewarding opportunity and one in which we take great pride.

Our team brings the following key strengths that distinguish us from the competition:

Knowledge: We are honored to be an integral part of the Mid-Continent Public Library Districts framework with their latest bond projects. As part of MCPL’s master plan, our team conducted several site analysis with the City of Grain Valley and MCPL as far back as 2014. This previous work and our current working relationship has given us an in-depth appreciation and understanding your site and the opportunities for shared facilities/ infrastructure. Moving forward on these capital projects would be seamless and a rewarding process.

Team Expertise: Our associated team brings significant resources and talent. Sapp Design is a leading and recognized award-winning firm specializing in Civic, Municipal, Educational and Recreational projects for over 30 years. Helix, is one of Kansas City’s leading design firms, consistently recognized by the city’s premier institutions for their exceptional service, design excellence and commitment to delivering projects that enhance our community. The firm brings architectural and interior design excellence to the team.

Quality Civic Architecture: Our Team has designed several city halls and a multitude of government facilities including municipal court buildings, administrative offices, police stations, public works facilities, and other ancillary support facilities.

Client and Public Ownership: Our design process is a user-friendly approach that involves frequent meetings with your representatives and community groups. We believe it is important to allow the user groups and stakeholders to participate in the design decisions.

Capacity: Sapp Design & Helix are familiar colleagues and are working together on all MCPL Library projects. Together we bring a capacity of 50 people for the architectural and Interiors disciplines. In concert with our engineering consultants, the entire team capacity is 305 people strong!

Coordination: Sapp Design & Helix along with our consulting team are all Autodesk® Revit based. This means we work in 3D models throughout the entire process and coordinate live on the cloud with all team members. Together we will all see in real time the progression of the project and be able to coordinate and collaborate immediately.

Construction/Regional: The entire A/E team has worked on multiple high profile projects in the Kansas City area and regionally. Together we bring a broad depth of experience in the various types of construction methodologies being explored by The City of Grain Valley

With our expert team, we will facilitate a collaborative client and construction advisor design process. We are prepared to start immediately and look forward to developing a long-term relationship with The City of Grain Valley.

Respectfully,

 Michael J. Sapp, AIA, NCARB

Sapp Design Architects

Architecture & Interior Design

During the last 30+ years, Sapp Design Associates Architects has grown to be one of Southwest Missouri's largest and most stable firms. Over 70% of our staff are licensed architects 10 of which are LEED Accredited Professionals. Our work has been published nationally and awarded locally by public juries. 95% of our work comes from public tax dollars. Our ability to generate great design solutions at an economical cost has gained us a 70% annual repetitive client base, some of which have been with us 20+ years.

SDA was formed by Michael Sapp, who in 1986 laid the foundation for what would become one of Missouri's premier commercial architectural firms. Today, the Sapp Design Team brings the collective experience of over 300 years to the table, resulting in projects that are not only great in design but truly do meet the needs and budget of the client. SDA has a diverse portfolio of public and private projects that are a testimony to the vast knowledge and innovative thinking our designers apply to every project. Because SDA knows there is much more to a project than a "great design," many in-house services ranging from Master Planning to facilitating community forums are available to make your project a complete success.

Sapp Design is ranked among the largest architectural firms in Southwest, Missouri and named a Choice Employer. Even though our projects do not afford a gold-plated budgets, we still make a big splash, with a history of award winning designs, judged by both public and professional juries. Our projects have been Nationally published projects in Metal Architecture, American School & University, Learning by Design, American Libraries, The Library journal and College Planning & Management. It is this track record that has generated an extensive list of long-term repeat clients who have become an integral part of our continual growth and success.

SDAARCHITECTS.COM

Helix Architecture + Design

Founded in Kansas City, Missouri, in 1992, Helix Architecture + Design is an integrated architecture and design firm that focuses on people instead of structures. Over the last 25 years our firm's portfolio of work has centered on civic, academic, corporate and cultural facilities throughout the greater Kansas City area.

We are a studio environment with a genuine passion for discovery and an unwavering belief that great design can change people's lives for the better. We blur the edges of architecture and interior design to create thoughtful spaces for those who will inhabit them. Our personal commitment to remain connected to every project we create means we will never be the biggest, but you will always get our best.

Our interior designers and architectural staff work as an integrated team to develop holistic solutions for each project. As a firm that focuses on people-centered design, our approach begins and ends with creating a welcoming, memorable experience for the building users. We do not settle for what is expected. We look beyond to see what will set our clients and our projects apart.

Helix was named 2016 "Firm of the Year" by AIA Kansas City. The selection committee cited recent local and national design awards and the firm's leadership on key high-profile civic projects, such as the Kansas City Police Department's Leon Mercer Jordan East Patrol Campus as reasons for selection. In 2016 our renovation of the Kansas City Police Department Headquarters was named "Project of the Year" at AIA Kansas City's Design Excellence Awards, with one of the jury members commenting, "This is civic architecture at its finest." We have consistently ranked as one of the top 50 architects in the country for Design by Architect Magazine. In addition we have received over 150 awards recognizing design excellence, historic preservation and community impact throughout the history of our firm.

Olsson

Structural | Civil | Landscape

Olsson is a nationally-recognized, employee-owned engineering and design firm with a rich history of success. Founded in 1956 on the very mind-set that drives us today, Olsson exists to improve communities, like yours, making it more sustainable, better connected, and more efficient. Simply put, Olsson exists to leave the world better than we found it.

Though our philosophy hasn't changed since John E. Olsson opened our doors many years ago, we have certainly evolved, adding dozens of offices across eight states and developing a comprehensive list of services to best serve a comprehensive list of markets. We achieved Top 100 engineering firm status in 2018 (No. 98 on Engineering News-Record's Top 500 Design Firms national list), proving that tenacity, teamwork and a philanthropic mind-set is indeed a winning combination.

Type of Services Qualified to Perform and Assistance Expected Team based and purpose driven, Olsson has more than 1,100 team members in nearly 30 offices across eight states and offer a comprehensive list of services: planning & design, engineering, field services, environmental and technology.

Branch Pattern

Mechanical/Electrical

At BranchPattern we believe in supporting and prioritizing our clients. This perspective pushes our team to develop a strategy for empowering users before we begin implementing solutions for The City of Grain Valley (The City.) Only after this initial step has been taken can we develop a long-term technology design plan that drives continued customer satisfaction.

Our team includes a technology design group that has extensive experience working with civic institutions to implement technological solutions. Regional expertise on multiple facilities for nearly all local municipalities like Lenexa, Overland Park, Olathe, Lawrence, and Kansas City, Kansas as well as Kansas City, Missouri gives us great peer institution comparisons coupled with elite national experience on high profile projects with cities, states, and the federal governments that brings some inspirational and emulation targets allow us to find the best match between pie-in-the-sky vision and simple "make sure it works" systems.

Ballard King

Feasibility & Operations

As a company, Ballard*King & Associates has achieved over 25 years of success by listening and coaching our clients, and realizing that each client's needs are specific and unique. Our staff members have over 75 combined years of facility management and planning experience in the collegiate, public, non-profit and private sector. We have completed over 700 recreation facility projects in 48 states, of which more than 50 were master plan studies, and we have working relationships with more than 100 architects from coast-to-coast. We are frequently invited to speak at state and national industry conferences and have been honored to be the recipient of five Athletic Business Facilities of Merit Awards.

We are nationally respected as experts in the field of feasibility studies, master plans and operational audits. Our client base includes public agencies, colleges and universities, the non-profit sector and private entities. Our team members all have direct experience in the opening, operation and management of indoor and outdoor recreation facilities from full service recreation centers, to aquatic facilities and ice rinks. In addition, our staff has direct experience in the delivery of diverse recreation programs and services.

Public input, including community meetings, focus groups, stakeholder meetings and survey administration.

Feasibility studies for new or renovated recreation facilities with a strong emphasis on operations programs and organizational planning.

Operational assessments and audits for existing parks and recreation facilities and agencies, focusing on organizational and management practices.

Long range master plans for agencies with an emphasis on the development and management of facilities and recreation services.

Partnership and funding plans for recreation facilities and programs.

Benchmarking and best practices, including industry trends and research for parks and recreation agencies.

Economic impact studies of new and existing sports and recreation facilities.

Larkin Aquatics

Aquatics Design

For more than a half century, Larkin Aquatics, headquartered in Kansas City, Missouri, has specialized in the planning and design of municipal aquatic facilities. Since designing our first swimming pool in 1948, we have successfully completed hundreds of aquatic projects throughout the United States. We have helped scores of communities plan, design and construct successful swimming pool and aquatic park facilities.

As a Lamp Rynearson company, a full-service engineering firm made up of over 160 talented professionals, Larkin Aquatics specializes in the planning and design of recreation and aquatic facilities. We have the aquatic expertise on-staff necessary to provide a full range of quality services, from programming to preliminary design to final plans and specifications. Our dedicated staff of creative professionals is experienced with all facets of aquatic design including water treatment, structures, hydraulics, filtration, chemical treatment, coatings, piping, pumps, geotechnical concerns, lighting, concrete and electrical design. This experience positions us to satisfy your special needs for an aquatic facility and our engineering expertise enables us to manage the complex technical demands of pool design.

Choosing Larkin Aquatics as your expert ensures your new aquatic facility will not only be practical but will be attractive, innovative, enduring and manageable. Our engineers are available to listen to you and to serve your various needs. You will benefit from our creative ideas and our many years of public pool design experience.

ORGANIZED AROUND YOU

We are passionate advocates for joint-use community facilities. We have designed Municipal complexes that are partnerships between private & public entities. These have been successful in expanding program offerings to communities and to do it more cost effectively.

As a user-focused team, we will put you in the driver's seat, working one-on-one with our dedicated design team. Our mission is to make sure all of your goals, visions, and priorities are met first and foremost.

WHY TWO FIRMS?

The Associated team of Sapp Design & Helix brings together two innovative architectural firms. Sapp Design has completed several award-winning and published community recreation & aquatics centers

Helix is consistently recognized as a local design leader committed to delivering quality architectural solutions that enhance all aspects of our community. We have worked with many of the Kansas City's most prominent institutions on projects ranging from small renovations to high-profile new construction projects and will bring the same commitment to excellence to our work with Grain Valley.

About Our Team

Sapp & Helix have assembled a highly-qualified team to meet the diverse project needs that this contract presents. The team members identified within the submission are senior level leaders who will be guiding the overall design process. They not only bring experience with similar projects, but also have the workload capacity to provide responsive service and successfully achieve the concurrent project schedules that this contract presents. We will draw upon additional staff resources as needed to execute full project delivery. We are confident that our combined resources have the capacity to successfully execute all projects within this contract.

MICHAEL J. SAPP, AIA
President, Project Admin.
Sapp Design Architects

Michael Sapp has served for over thirty years as active President. Michael's comprehensive experience in all phases of architectural practices provides a keen eye on all business administration, marketing, client relations, facility master planning and design development activities. He continually monitors all aspects of each project to ensure that clients receives the highest quality services available.

Role: Project Principal

RICK MANIKTALA,
PE, LEED AP, CXA, DBIA, MBA
Principal | Lead Mechanical
BranchPattern

Rick’s multiple professional certifications are evidence of the expertise he draws from to oversee the design of complex high performance and technically challenging engineering projects. Rick is experienced in all building technologies, including TABS, UFAD and VRF. In the last five years, he has successfully led more than \$500 million in projects with varying levels of sustainability and difficulty. Rick is driven to discover optimal strategies for sophisticated energy use in buildings.

CARY SCHROEDER, SE
Structural Engineer
Olsson

Cary has a passion designing structural systems. He determines static and dynamic loading effects for infrastructure and facilities. He has studied and designed structures of all materials - steel, concrete, masonry, and wood.

Cary attentively works with teams within and outside of Olsson to achieve safe structural facilities for our clients. He thoroughly understands current national and local codes, including IBC (International Building Code), ASCE 7, AISC ASD and LRFD (Steel), ACI 318 (Concrete), ACI 530 (Masonry), and NDS (Timber) codes.

How does a community spark a downtown revival, provide much needed gathering space, expand city programs, and promote health and wellness – all on a very limited budget? One method is through “fusion.”

The Award-winning Carl Junction Community Center (American Institute of Architects 2012 Public Recognition Award) embodies a combination of different organizations working together to develop a multi-use structure that serves the growing needs of the community. This new 24,000 sq. ft. building, located in a bedroom community on the outskirts of Joplin, wholeheartedly exemplifies the emerging design paradigm known as a “Fusion-Facility.” As defined by Mills & Medici (2012), “fusion facilities bring together two or more programs previously housed in separate buildings into a single location.” This new facility configuration offers multiple benefits including new revenue sources, creative funding options, and lower initial construction costs. It not only integrates diverse interest groups, but is easily adaptable to accommodate future expansion and demonstrates sustainability and energy efficiency.

The property procured by the city of Carl Junction for the new Community Center was once a railroad spur line and industrial park. In 2003, a tornado tore through Carl Junction, destroying several structures including the industrial buildings in this area. Following the cleanup, the site was converted to a makeshift baseball field, built up with uncompacted fill dirt and debris.

The City of Carl Junction opted to build their new community center on this industrialized piece of property in order to address some of the issues that have plagued this site and those surrounding it, as well as take advantage of its location. A major benefit to the site was its connection to Main Street. It was important to the community that the new facility would help promote the revitalization of Main Street and create an impetus for the downtown revitalization efforts.

Because of the combined efforts of this small community of 7,500, the facility has become greater than the sum of its parts. The City was able to partner with the Senior Center and pool their resources to accomplish much more than they would have been able to do separately. Through a combination of integrated interests and needs, they were able to share spaces that would otherwise be unoccupied during much of the day if each organization were to build a separate facility. Therefore, the Community Center could be enhanced

with amenities instead of burdened with excessive, low-use square footage.

Housed within the building is a series of overlapping programmatic elements: Senior Center, Dining Hall, City Hall & Council Chambers, Record Storage, Recreation & Fitness, Event Space, Media Center, Indoor and Outdoor Classrooms, and Youth Lounge. The main lobby acts as a bonus gathering space, as well as a central control point to all of the activity spaces. It was sized to allow for plenty of display space and to house a replica of a prehistoric mammoth skeleton, which celebrates the community’s rich and intriguing history. Visibility to each space is important for supervision and creates a vigorous sense of action within the building.

The organizational layout was adopted from the grid-pattern of the town as it was bisected by the angled railroad line. All of the major activity centers are organized around the lobby and are designed with flexibility in mind. The senior center is occupied until the afternoon, at which point it becomes a rentable venue for evening activities, adult continuing education, or after-school programs. Community rooms can be expanded into the senior center for large events. Within the gymnasium, athletic rubberized flooring - in lieu of the traditional wood flooring - allows a variety of functions from tournaments to tradeshows without compromising the flooring material or the playability of the surface.

The fusing of activities goes beyond mere function. The facility’s interior materials are utilized to express the interweaving of uses and promote a user-friendly approach. The flooring patterns provide interest and flow to demonstrate the connectivity of all spaces within the building. Frosted glass was utilized on west-facing walls and at the clerestories to provide an abundance of natural light while diminishing possible glare – intolerable to senior citizens. The frosted clerestory glass emits light like a glowing beacon during evening events. Bright colors draw the eye through the interior storefronts and into the spaces beyond. The storefront glass enhances the idea of connectivity and activity while providing an acoustical separation.

Because of the Community Center’s significance to the

city of Carl Junction, it was important to provide durable, low-maintenance materials that could identify with the city’s history and endure for many years. The exterior materials consist of precast concrete, brick, cedar siding, and standing seam metal panels. The brick and standing seam metal panels relate to the adjacent Police Station and Fire Station, as well as the historical zinc mines upon which the community was founded. However, the cedar siding was selected as a durable, yet unique material, to create a sense of hierarchy amongst the Civic buildings.

As a publicly funded facility, open typically sixteen hours a day, it was critical that the building have low operating costs. Energy-conservation measures included utilizing regional materials, the installation of a ground-source heat pump system, super-insulating the exterior building envelope, capturing daylight and views, using high-efficiency lighting and occupancy sensors, low-flow plumbing fixtures, and a roof sloped appropriately for future installation of solar panels. Due to its energy saving strategies, the City has a much lower operating cost compared to a traditionally constructed building.

This award-winning building now terminates the vista from Main Street, and has become the focal point for the future Civic Campus. Since its opening, the Community Center has become a fusion-facility in its truest sense. It is a bustling, synergetic activity center full of students, adults, and senior citizens throughout the day. Demand for gym time is encouraging the City to explore future expansion options. Fitness memberships continue to grow. Senior citizens have begun operating a volunteer-staffed lending library from the Senior Center. The Chamber of Commerce has currently taken up residence in the spare spaces slated for future growth. And finally, “Claudia,” the prehistoric mammoth, has found a home within the display space at the main lobby.

Mills, David & Medici, Michael. “Fusion Facilities: 8 reasons to consolidate multiple functions under one roof.” Building Design & Construction. www.bdcnetwork.com. July 25, 2012.

Carl Junction Community Center

The Carl Junction Community Center is comprised of various organizations working together to develop a multi-use structure that will serve the needs of the entire community as it continues to grow. Housed within this building is a series of overlapping programmatic elements: Senior Center, Dining Hall, City Hall & Council Chambers, Recreation & Fitness, Event Space, Indoor & Outdoor Class Rooms, and Youth Lounges.

Due to the dynamic nature of the overlapping programmatic needs, it was necessary to provide a building that would become a visual icon and reflect the versatility of its functions. With a very modest budget, this building accomplished all the city's goals for their community Center: aesthetics, economy, flexibility and Sustainability.

It was important to provide durable, low-maintenance materials that could identify with the city's history and endure for many years. The exterior materials consist of regionally manufactured precast concrete, brick, cedar siding, and standing seam metal panels. The brick and standing seam metal panels relate to the adjacent Police Station and Fire Station, as well as the historical zinc mines upon which the community was founded. However, the cedar siding was selected as a durable, yet unique material, to create a sense of hierarchy amongst the Civic buildings.

As a publicly funded facility, open typically sixteen hours a day, it was critical that the building have low operating costs. Energy-conservation measures included utilizing regional materials, the installation of a ground-source heat pump system, super-insulating the exterior building envelope, capturing daylight and views, using high-efficiency lighting and occupancy sensors, low-flow plumbing fixtures, and a roof sloped appropriately for future installation of solar panels. Due to its energy saving strategies, the City has a much lower operating cost compared to a traditionally constructed building.

Ozark Community Center

Ozark Parks required a community center, indoor aquatics facility and outdoor sport recreation fields for baseball, softball and soccer for their fast-growing community. The Ozark Recreation Center is a performance-based facility that boasts energy-saving materials and methods that have been achieved through the utilization of regional products and conservation-friendly systems.

This new 67,250 s.f. Recreation Center houses community rooms, a double basketball court gymnasium with running track, a 10,000 s.f. fitness area, concessions, a juice bar, and locker rooms. The attached indoor aquatics include wet locker rooms, party rooms, an indoor outdoor water slide, recreation pool, and a separate four-lane lap pool.

The community rooms include a large, covered veranda while the indoor aquatics houses a 2,000 s.f. covered deck. The recreation center also boasts a pavilion on the roof of a FEMA shelter with access to built-in grilles and outdoor toilets for use as a trail head and destination location for the community.

Branson Recplex

The 44,000-square-foot Branson RecPlex is a state-of-the-art sports and recreation complex that has become a popular destination for national sports events.

Since opening its doors in 2005, the Branson RecPlex has hosted 12 national sports tournaments including both boys and girls USSSA World Series events and AAU National Championships.

The RecPlex has also been home to over 100 state and regional events in baseball, basketball, volleyball, swimming, tennis and martial arts. With manicured fields and clean, spacious gymnasiums, the Branson RecPlex is the perfect fit for any sports contest.

The outdoor facilities on this 42-acre complex include four baseball/softball fields designed for competition and tournament play include 200-person bleacher seating per field, warm-up areas, ticket booth, concession and restroom facilities. In addition, two large multi-use soccer fields with bleacher seating and concession and restroom facilities accompany the fields. The center includes 2 fullsize basketball or volleyball courts. The gymnasium features wood floors, glass backboards, practice goals, a divider curtain, electronic scoreboards and clocks and permanent bleacher seating. Other amenities include locker rooms, a lounge area, concessions and a game room.

The 12,250-sq.-ft. AquaPlex sits adjacent to the RecPlex and features 6 lanes for lap swimming and competition and large water slides.

Woodneath Library Center

Mid-Continent Public Library

The Woodneath Branch Library is the newest addition to the Mid-Continent Library District's collection of library facilities that cover the surrounding metropolitan areas of Kansas City, spanning three counties.

The new 35,000 square foot "destination" library will partially encompass the existing historic Elbridge Arnold "Woodneath" Homestead located at 8900 NE Flintlock Road in Kansas City, Clay County, Missouri. The original homestead, which is currently situated on a 33 acre site, was constructed circa 1855-1856 and is recorded with the local and federal historic registers.

The new library includes many amenities such as public meeting areas, an automated collection sorting system, a drive thru window, considerable computer resources, private study areas, and an area dedicated to food service. The collection areas are divided into spaces that serve appropriate age groups, with the individual areas separated by seating and reading areas. The children's library is themed in an agricultural setting to pay homage to the rich history of the homestead's past. This new facility is constructed using high efficiency mechanical and lighting systems, along with a high performance building envelope, and achieved a LEED Silver Certification.

Girl Scouts Camp Prairie Schooner Aquatic Center

Camp Prairie Schooner, located just northeast of Kansas City limits, serves the Girl Scouts of Northeast Kansas and Northwest Missouri. Helix was hired to transform their existing pool into a comprehensive aquatics center, and design a new all-season shower house to serve the camp year-round.

The new aquatics center is designed to engage girl scouts of all ages and abilities while celebrating the surrounding nature of the camp. The pool was expanded and redesigned, reforming the traditional rectangle into a much more organic shape, reminiscent of a pond or lake. A large rock-climbing wall incorporates more natural elements, while introducing opportunities for learn new skills and have more fun. Special coordination with artificial rock fabricators and the project's pool designer has resulted in this unique feature which allows scouts to climb the wall within the safety of the pool, allowing for girls to jump or fall safely into the water.

A new zero-entry feature brings the pool up to complete ADA compliance. The site plan also includes a new splash pad, and quadruples the gathering and instructional space surrounding the pool. Heated locker room, restrooms, indoor and outdoor showers to be utilized for swimmers are located on one end of the new shower house. The other end of the building provides much needed kayak storage and a small staff office.

Helix principal Doug Stockman has a long-standing relationship with the Girl Scouts of NE Kansas and Northwest Missouri, having designed of the Camp's award-winning cabins, located just down the trail. The design of the new shower house drew from the design of those buildings, and used the same materials in a cohesive manner.

Synergy Services Children's Center

The Children's Center, which provides temporary shelter for children in need, is designed to be an inviting open space that is reminiscent of a camp or cabin, as opposed to a traditional shelter.

The Children's Center began with a 2,500 square foot home on a six acre site generously donated to Synergy Services. With this gift, the goal to construct a 10,000 square foot center that could double bed capacity for the emergency shelter of children ages 0-12 began. Utilizing the existing home for an art studio, counseling spaces and offices, the new 7,500 square foot addition will house areas for sleep, eating and play.

The design of the addition is in response to the scale and height of the neighborhood around it while also creating a safe, inviting place for children to stay. This project will further Synergy Services mission to eliminate family violence, abuse and neglect by providing quality services for persons of all ages and continues our decade long relationship with Synergy Services.

By incorporating natural light, warm wood finishes and many connections to the surrounding nature the acreage provides, children will feel more at home in this safe, healing place.

Firm:	Helix Architecture + Design
Project Type:	Renovation / New Construction
Completed:	2017
Square Footage:	7,500 addition, 2,500 existing house
Cost:	\$3.5 million
Location:	Kansas City, Mo
Client:	Dennis Meier, Associate Executive Director Synergy Services (816) 587-4100 ext. 104 DMeier@synergyservices.org

Richard Bolling Federal Building Renovation

The renovation of the Richard Bolling Federal Building transformed an outdated structure into a high-performance “Class A” workspace.

Originally constructed in 1962, the Richard Bolling Federal Building has become a recognizable landmark on the Kansas City skyline. Helix is providing architectural, design, engineering, abatement and construction management services for the \$250 million modernization of this 18-story office building.

The project is designed under GSA’s “Design Excellence Program” with emphasis on improving the workplace environment for the building’s 4,000 occupants. The modernization of this government office building is also in design compliance with the US Green Building Council’s LEED Silver certification requirements. Environmental improvements to air, light and work space have positively effected the quality of life for all employees.

Helix systematically renovated the building over 15 years without displacing any of its tenants. The logistical precision of our work on this project has received acknowledgement by the government as a standard against which all other projects of its size are to be measured.

This project was awarded a national GSA Design Award for Modernization in 2008.

Firm:	Helix Architecture + Design
Project Type:	Renovation
Completed:	2015
Square Footage:	1,200,000
Cost:	\$250 million

Client:	General Services Administration, Heartland Region James Snedegar, RA, Regional Chief Architect 816.823.2279 james.snedegar@gsa.gov

Leon Mercer Jordan East Patrol Campus

City of Kansas City, Missouri

The Leon Mercer Jordan Campus, home of the East Patrol Division Station and Regional Crime Lab has had a significant economic impact on Kansas City's east-side citizens and businesses, while also benefiting taxpayers.

The Leon Mercer Jordan Campus provides modern facilities for police officers at the new East Patrol Division Station and gives police more tools to investigate crime at the new Regional Crime Lab. In addition to modern facilities for police officers the new East Patrol Division Station also houses a community conference room where neighborhood groups can convene meetings, a computer lab and a full gymnasium that are open to the public.

The design also incorporated many art pieces to be a part of the new campus. One of them is a result of the City's One Percent for Art program, a stand-alone piece outside the main public entrance of East Patrol where the artist involved local youths and neighbors in its creation.

KCMO established its commitment early on to leverage the project, to the greatest extent possible, to spark training, job, and contract opportunities for Certified Section 3 (low- or very-low income) Residents & Businesses; Certified Minority Business Enterprises and Certified Women Business Enterprises.

The project surpassed the established goals, achieving to date: 40% MBE/WBE participation for professional service contracts, 30% MBE/WBE participation for construction services, 16.6% Section 3 participation for construction services, 52% overall MBE/WBE/Section 3 participation on the East Patrol Crime Lab, 101 overall Section 3 new hires.

“It’s not just a police station. It’s a place where people can gather – where they can do homework, play a game of basketball or have a neighborhood meeting in a safe and supportive environment.”

DARRYL FORTE
POLICE CHIEF

KCPD Headquarters Renovation + Expansion

City of Kansas City, Missouri

Helix was selected by the City of Kansas City, Missouri and the Kansas City Police Department to lead the renovation of and addition to the downtown Police Headquarters building.

The purpose of the renovation was to reposition the facility, originally built in 1938, for another 70 years of service to the community, and to do so while respecting the character of the historic 100,000-square-foot structure.

In addition to repairing the core and shell of the building - including exterior masonry restoration, window and roof replacement, streetscape design and systems upgrades - Helix constructed a new building core outside the building and a Community Room addition to increase the usable area inside.

Beyond addressing space requirements, the Police Department wanted to create a welcoming yet "we mean business" first impression for visitors (PERCEPTION), and a facility suited for collaboration, efficiency, team-building, and celebration (PURPOSE). Central to the design, too, was the need to communicate the Department's rich history of community service through a dignified and at times monumental space.

“ We could not be happier with the aesthetics of the renovated building and the much improved work flow. The Community Room is a jaw dropping space that functions well for the monthly board meetings and has drawn new attention as a coveted meeting area for the city as well as the community.

MAJOR SHARON LANINGHAM
Kansas City Police Department

Blue Cross Blue Shield Kansas City Headquarters

Blue KC sought to transform its headquarters into a beacon for health and wellness initiatives through a multi-phased renovation project.

Five key objectives were identified in the renovation of Blue Cross Blue Shield's Kansas City Headquarters, including: improve the entry experience, promote Blue KC's brand and culture integration, promote health and wellness, welcome the public and provide space for collaboration.

Workspaces, both traditional and non-traditional, maximize flexibility and efficient use of space. The second floor is dedicated, in a large part, to work-from-home employees with shared workspaces and training spaces. Technology is integrated into conference rooms that help facilitate small-group work and ideation sessions. Executive offices were designed to provide a refined yet welcoming and comfortable space. As a part of renovation, BCBS KC opened all first floor amenities to the general public, including customer service, a gym, café and community conference.

Olsson Headquarters

As one of the region's top engineering firms, Olsson wanted the design of their new office space to facilitate collaboration and communication across their multidisciplinary team.

This new 80,000-square-foot office building for Olsson is located in Lincoln, Nebraska's historic Haymarket District. The building is a four story, developer led project and includes 40,000-square-foot of office space for Olsson Associates and their 215 employees.

The building wraps around a central courtyard that provides daylight and views throughout the building creating layers of interest both inside and out. Our scope of work included core and shell design as well as interior architecture, furniture selection/procurement and custom furniture design for Olsson Associates.

Firm:	Helix Architecture + Design

McCownGordon Headquarters

Helix is completing transforming this existing building on 9th and Main in downtown Kansas City, activating a prominent corner updating it into a modern Class A office.

McCownGordon Construction recently acquired an outdated office building in downtown Kansas City and hired Helix to transform it into an open, modern workplace environment. Prominently located at the corner of 9th and Main, along the new streetcar line, the renovation was designed to engage with the surrounding urban environment. Helix developed a concept that replaces the existing façade with an aluminum glass curtainwall, drastically increasing transparency from the outside and daylighting for the inside. With space for 225 associates, the new structure nearly doubles the firm's current office space. Efficient allocation of individual workspace allows for more real estate to be dedicated to employee amenities, including a fitness center, expanded conference and collaboration spaces and a rooftop patio.

Firm:	Helix Architecture + Design

Kansas City, Missouri Fire Station 36

Coined the “Fire Station of the Future” by the city and fire department, Helix created the universal prototype for all new fire stations to be built in Kansas City, Missouri.

In addition to creating one of the most efficient fire stations in the country, Helix streamlined the floor plan and paid special attention to user details. The station also emphasizes maintenance-free durability, increased privacy and state-of-the-art engine bays.

In March 2006, the project won a Kansas City, Missouri, Economic Development Corporation Cornerstone Award for its impact on the community.

Our DNA

For over three decades, the strength of our organization has evolved through successfully balancing SCOPE and BUDGET and delivering a project on or ahead of SCHEDULE.

When a firm's focus is with public project types, you must continually focus on being a good steward for the client. One of the ways we do this is by keeping the focus on clearly defined end goals and working backward. Most of our annual projects are complex and require reaching out to various critical resources to collaborate on how to overcome any potential challenges.

Critical Thinking + Strategic Planning

The success of many of our complex projects has been the direct result of bringing together the entire Client, Consultant, and Construction team as early as possible. The combined knowledge and expertise of this partnership will be able to identify protocols and processes necessary to help achieve ultimate success.

Technologies Role

You can never underestimate the significant role that state-of-the-art technology will play during each stage of Planning through Construction. A few tools our team utilize are BIM 360, virtual reality, and virtual scanning. We have found that all members of the partnership benefit from being able to continually visualize the evolution of the project through a 3-dimensional layered format. This process brings reality to the table from the start and helps minimize the need for any guesswork. This also allows each party to participate early in understanding and exploring infra-structure, super-structure, support systems, and constructibility all in the context of the clients Budget and Schedule requirements.

Success Stories

Many of our annual projects are complex multi-phased owner-occupied modernizations through renovations and additions. Their success story can be gleaned through the application of the strategies mentioned above. These current and completed projects have ranged from a few million to over \$80 million in scope. Various Construction Methodologies that have been used included Construction Management as Agent, Construction Management at Risk, Design-build and, Pre-Selected General Contractor at risks.

LAST 5 YEAR VOLUME

Our five year historical experience in designing projects within an established "design-not-to-exceed" budget is shown below. This successful track record reinforces the strength of our team's ability to balance a Client's program and budget at an early stage. It also reflects our A/E control strategies to maintain this focus throughout each phase of planning.

Bid-Built Facilities

Project Ranges	Project Budgets	Construction Cost	% of Difference
\$100,000.00 - \$1,000,000.00	\$ 21,250,000.00	\$ 21,675,250.00	1.96%
\$1,000,000.00 - \$5,000,000.00	\$ 98,492,562.00	\$ 95,341,277.00	-3.31%
\$5,000,000.00 - \$10,000,000.00	\$ 65,254,902.00	\$ 61,056,355.00	-6.88%
\$10,000,000.00 - \$20,000,000.00	\$ 76,104,108.00	\$ 73,359,120.00	-3.74%
\$20,000,000.00 - Up	\$ 101,291,746.00	\$ 95,599,739.00	-5.95%
Combined Totals	\$ 362,393,318.00	\$ 347,031,741.00	-4.43%

SAMPLE BUDGET SHEET

A) Program / Project: an abbreviated list of the program spaces/projects identified to be included in the proposed project. The total program square footage drives the budget so this is an area that is closely monitored and updated throughout the design process with the Owner as scope changes or design is further developed to realign square footage or budget as necessary.

Construction Cost: Typically a range is utilized on cost in the early stages of design since many design alternatives have not yet been established. This cost will continually be refined as materials, design, and other construction decisions are identified.

B) Contingency: Sapp Design always recommends a construction contingency be included in the budget from the beginning all the way through construction. Since we do not have that crystal ball that tells us what the construction market will do on bid day or what unforeseen or overlooked items may arise, or what upgrades the Owner may see and desire as the building is under construction, this construction contingency gives a "buffer" of resources to help maintain the overall budget.

C) Bid Alternates: We highly encourages identification of potential bid alternates to allow pre-decided and pre-designed options in the event of cost overruns due to a fluctuating bid market. Additionally, these bid alternates can be accepted as upgrades should the bids come in well under budget.

D) Soft Costs: This section of the budget sheet of typically non-construction related expenses is a critical component in identifying turnkey costs. This portion of the budget is many times forgotten or underfunded in early planning stages. As with hard construction costs, this section is a vital part of the overall budget and review on a regular basis along with collaboration with the Owner to identify potential soft costs is critical and typically include:

- a. FF&E; furniture, fixtures and equipment
- b. Professional services fees
- c. Special consultants
- d. Technology, infrastructure or systems
- e. Special decorations
- f. Printing costs
- g. Phone systems, AV equipment,
- h. Security systems
- i. Special equipment or athletic equip.
- j. Movable furniture, shelving, etc.
- k. Administrative costs
- l. Bonding costs
- m. Project expense contingency

PROBABLE COST OF WORK		DRAFT-FOR REVIEW Assumed bidding by Summer 2017.		SAPP DESIGN ARCHITECTS	
PROJECT: Name					
PHASE: Schematic Design-02					
DATE: January 10, 2018					
OPINION AND STUDY OF PROBABLE COSTS : ACTUAL COSTS MAY VARY: THIS IS NOT AN ESTIMATE OF ACTUAL OR FINAL COSTS.					
<i>Reference Notice to Owner, Item "I" below.</i>					
A. CONSTRUCTION BASE BID				PROBABLE RANGE	
THE ITEMS BELOW IN "A" ARE INTENDED TO BE UNDER THE G.C. CONTRACT					
1. NEW BUILDING A: (2 Classrooms unfinished)	15,000 S.F.	\$170 to \$190 /S.F.	\$	2,550,000 to \$	2,850,000
Assumes minimal lighting and HVAC in unfinished space					
2. NEW AG BUILDING: Metal Building Shell	7,000 S.F.	\$75 to \$90 /S.F.	\$	525,000 to \$	630,000
Metal roof and siding, insulated, conc. slab, unfinished interior. Includes gravel drive and parking area, water well, and septic system.					
3. MIDDLE SCHOOL IMPROVEMENTS					
KITCHEN SERVING LINE MODIFICATIONS	allowance	\$ 100,000 to \$ 120,000			
MEZZANINE STAIR MODIFICATIONS	allowance	\$ 50,000 to \$ 75,000			
TOTAL MIDDLE SCHOOL			lump sum allowance	\$ 150,000 to \$	195,000
4. SITE WORK: Grading, Storm Water Detention & Conveyance, Paving			lump sum allowance	\$ 150,000 to \$	200,000
As may be separate from Building Components above.					
TOTAL CONSTRUCTION BASE BID TARGET				A	\$ 3,375,000 to \$ 3,875,000
B. PROJECT CONTINGENCIES					
1. CONSTRUCTION CONTINGENCY				B	\$ 168,750 to \$ 193,750
(This amount allows for unanticipated conditions, misc. omissions, upgrades, etc.)					
C. BID ALTERNATES					
1. FINISH OUT AG BUILDING	allowance	\$ 100,000 to \$ 160,000			
2. HIGH SCHOOL STORAGE ADDITION (2,000 sf)	allowance	\$ 250,000 to \$ 350,000			
3. OTHERS, TBD	allowance	\$ - to \$ -			
4. Construction Contingency - Bid Alternates Only	allowance	\$ 17,500 to \$ 25,500			
TOTAL ALTERNATES: (Fees & services incl. in Project Expenses below.)					
				C	\$ 367,500 to \$ 535,500
TOTAL CONSTRUCTION COST - BASE BID ONLY (includes construction contingency)				A+B	\$ 3,543,750 to \$ 4,068,750
TOTAL CONSTRUCTION COST - BASE BID & ALTERNATES (includes construction contingency)				A+B+C	\$ 3,911,250 to \$ 4,604,250
D. PROJECT EXPENSES					
<i>Reference Notice to Owner, Item "III" below.</i>					
1. CONSULTANTS AND OTHER SERVICES: A/E, Geo-Tech, Survey, Construction Testing, and other as necessary.		allowance	\$	508,463 to \$	598,553
2. OTHER SPECIAL CONSULTANTS: Civil, Interior Designer, Landscape Arch., Acoustical, etc. as may be agreed upon.		allowance	\$	3,000 to \$	4,000
3. ADMINISTRATIVE COSTS					
Bid printing, Advertising, Building Permit, legal and accounting fees, financing costs, other as owner may determine.					
4. PROPERTY ACQUISITION					
5. OTHER					
6. LANDSCAPING ALLOWANCE (if not included in Site work above.)					
7. F.F.& E. (Furniture, Fixtures, and Equipment): <i>Reference Notice to Owner, Item "III" below.</i>		allowance	\$	337,500 to \$	387,500
a. AV Equipment					
b. Security System					
c. Phone System					
d. IT Equipment					
e. Special Decorations, Graphics, Artwork, Interior Signs, if not included in Construction					
f. Special Equipment					
g. Furniture (moveable furniture, shelving, etc.)					
h. Athletic Equipment					
i. Other					
8. OWNER PREP COSTS (moving, floor prep, staff costs, etc. as may be determined)					
9. BONDING COSTS / ELECTION					
10. PROJECT EXPENSE CONTINGENCY					
TOTAL PROJECT EXPENSES				D	\$ 848,963 to \$ 990,053
TOTAL PROJECT BUDGET (without Alternates)				A+B+D	\$ 4,392,713 to \$ 5,058,803
TOTAL PROJECT BUDGET (including All Alternates)				A+B+C+D	\$ 4,760,213 to \$ 5,594,303
E. OTHER PROJECT COMPONENTS (as Owner may determine)					
Other separate Capital Improvements not administered by Architect, e.g.: Land Cost, Road Costs, Abatement, Other Fees, Contingencies, or other special preparations or costs as Owner may wish to include in Project Budget.					
TOTAL OVERALL PROJECT BUDGET (without Alternates)				A+B+D+E	\$ 4,392,713 to \$ 5,058,803
TOTAL OVERALL PROJECT BUDGET (including All Alternates)				A+B+C+D+E	\$ 4,760,213 to \$ 5,594,303
NOTICE TO OWNER					
i. The preceding values are allowances only; actual costs may vary.					
ii. This Budget Study represents the Architect's understanding of the Owner's Budget, and is not intended to be used as a formal accounting tool.					
iii. FF&E values are speculative allowances only and must be confirmed by the Owner.					
iv. Project Expenses are intended to alert the Project Owner that other expenses beyond construction are generally required in order to complete the entire project. There may be additional items not listed here, and the Owner must identify and confirm all possible cost items, and the amounts to be budgeted.					
v. The Owner shall furnish all legal, insurance and accounting services, including auditing services, that may be reasonably necessary at any time for the Project to meet the Owner's needs and interests.					
vi. The Owner shall establish and periodically update the Owner's budget for the Project, including (1) the budget for the Cost of the Work as defined in Section 6 of the Agreement between Owner and Architect;					
vii. The Owner's other costs; and, (2) reasonable contingencies related to all of these costs. If the Owner significantly increases or decreases the Owner's budget for the Cost of the Work, the Owner shall notify the Architect. The Owner and the Architect shall thereafter agree to a corresponding change in the Project's scope and quality.					
viii. Also reference AIA B101 - Standard Form of Agreement between Owner and Architect.					

E) Other Project Costs: Depending on the project scope or type other costs such as land acquisition, City street extensions, extensions of off-site utilities, abatement, Owner contingencies, Fees, or other special preparations or costs Owner may wish to include in the budget

Our Job is to Catch and Solve Problems Before They Cost You Time and Money.

Our team of seasoned architects operate in a PROACTIVE approach to assure contractor performance with Quality Control and Contract Compliance. We apply “boots on the ground” mentality to identify potential issues at an early stage, and then conduct a discovery process followed by quick resolution. This unique process mitigates a multitude of construction issues and results in cost-effective solutions that maintain or accelerate the overall construction schedule.

Our clients, owner representatives, and general contractors have applauded our approach.

Site Supervision

Our full team of Architects and Engineers will provide “Boots on the Ground” supervision.

- We attend pre-construction conferences and advise and assist you and Contractor with project initiation.
- Thorough on-site observation, we verify work completed and materials stored to date, so monthly payment applications are verified.
- Our A/E Team will carefully observe the work of each Contractor whenever and wherever necessary, but not less than twice each month as construction progresses.
- Observations are to determine the quality and scope of work by the Contractors as compared with the construction contract documents. We will advise promptly as to deficient and defective work, actual or anticipated delays, and over payments to Contractor, which may be revealed through observation. A

written report of each site visit will be provided to you, together with appropriate comments and recommendations.

- During on-site observation, we will interpret and decide matters concerning performance by Contractors and their interpretations of contract documents when requested or as required to resolve Contractor disputes, claims, or other matters in question.
- During on-site observation, we may require inspection and testing or re-testing of the work in accordance with the contract documents, whenever appropriate.
- We conduct on-site supervision necessary to determine substantial completion and completion of corrections required by punch list.

Close-Out

After completion of the project, our team will complete the following:

- Collect from all Contractors and transmit to the Client all warranties, operations and maintenance manuals, record drawings, and other documents required by the construction contract.
- Our Team will prepare and provide record drawings based on information received from Contractors and documents prepared by Architect during construction. These drawings shall be prepared in the same manner as the original construction documents and submitted as “as built.”

Construction Administration

We follow a policy of requiring all contractors to utilize an electronic document sharing system (such as Submittal Exchange) which also is used to share and communicate schedules, submittal status, etc.; and which the Owner can have full access to as well, even via smart phone.

We will proactively advise and assist during the construction phase. Such services shall include, but not be limited to, the following:

- Attend pre-construction conferences. Advise and assist you and Contractor with project initiation.
- Prepare formal change orders, issue construction change directives, examine and advise concerning requests for change orders from the Contractor.
- Review shop drawings, samples, product data, etc. Submitted by the Contractor for compliance with specifications, fit, and function.
- Review all pay requests, verify work completed to date and materials stored to date. The Architect shall approve all pay requests as informed belief that the pay requests and supporting schedule of values are a reasonable and balanced basis for payment.
- Carefully observe the work of the Contractor whenever and wherever necessary but not less than twice each month as construction progresses. The purpose of such observations shall be to determine the quality and scope of work by the Contractor as compared with the construction contract documents.
- The Architect will advise promptly of deficient and defective work, actual or anticipated delays and over payments to Contractor which may be revealed by observation. Provide a written report of each site visit together with appropriate comments and recommendations following each observation. Interpret and decide matters concerning performance by Contractor, interpretations of contract documents when requested or the Contractor’s, disputes, claims, or other matters in question.
- The Architect may require testing or re-testing of the work in accordance with the contract documents whenever appropriate.
- Conduct such site observations necessary to determine substantial completion and completion of corrections required by punch list. Certify in writing when the Contractor has achieved substantial completion and when the project is ready for final acceptance.

Quality Control

Our team starts the construction process with QUALITY CONTROL during the design and the Construction document process, resulting in high quality documents which provides clarity to the builders, and helps to reduce errors and change orders. Contractors have consistently reported SDA’s documents to be among the best in the business.

Quality control is a goal that most professional organizations have. However, implementing a plan to assist in reaching the goal is sometimes talked about more than actually put into place. Over the last quarter century, we have established a proven process that will maintain the highest degree of quality control for your project.

- Familiarize personnel with guidelines and regulations
- Establish lines of communication
- Establish and maintain a completion schedule
- Constantly monitor design and production
- Hold weekly progress meetings
- Assign additional support staff
- Cost control estimates as a basis of control for each phase of work
- Provide the highest quality bidding and Construction Documents
- Provide continued close coordination of construction progress

Cost Control

Maintaining and adhering to your budget is one of our top priorities. Our construction estimates are established by:

- Our own updated computer cost control system
- Reference to national estimating guides such a Means Cost Data
- Conferring directly with local or regional contractors and sub-contractors
- Historical office project cost summaries
- Consultation with cost estimating organizations and specialist

Project Delivery

EXPERIENCE: Our Team has considerable experience with each of the various common Delivery Methods.

NEW LAW: The State of Missouri recently passed legislation to allow **CM at Risk (CMR)**, for projects over \$3M, and **Design Build (DB)**, for projects over \$7M) for public agencies.

DESIGN-BID-BUILD (DBB) as the more traditional Delivery Method is a tried and true methodology, and is the best method to achieve the lowest and best price on bid day. However, the biggest drawback is the inherently adversarial nature of the relationship with the builder. For DBB projects, our Team therefore always recommends language in the bid specs to permit Owners to make the Contractor's Qualifications a component of the contract award, and not by lowest bid alone. This method has been very successful for more straight-forward stand-alone projects.

CONSTRUCTION MANAGER AT RISK: Our Team has found CMR to be very beneficial to our clients on certain types of projects; the **CMR** becomes an agent and advocate for the Owner, in a similar way as the Architect, and then also becomes the General Contractor once hard bids are received; because the **CMR** is a part of the planning team, the adversarial nature is greatly reduced.

The biggest benefit of **CMR** on public projects, is the ability to select that company based on Qualification, through a **QBS/RFQ** system, early in the process, to assist with systems analysis, construction scheduling and sequencing, cost estimating, and budget control.

CMR can be most beneficial on medium and larger more complex projects, and/or multiple site projects (like MCPL's Cap-I plan), and projects with complex sequencing and/or fast-track scheduling.

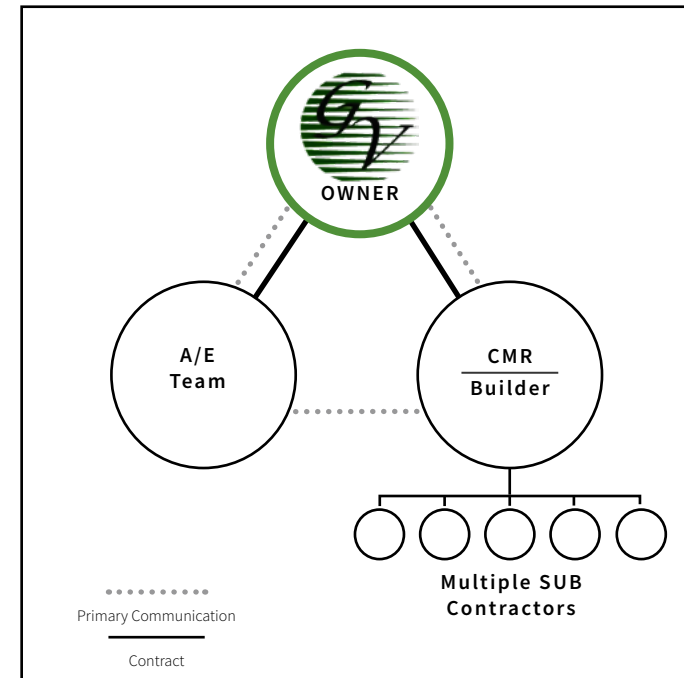

CONSTRUCTION MANAGER AGENCY is often employed for larger more complex projects with complex scheduling and fast-track requirements. The **CMA** is a manager/broker only, and does not build anything, but does provide on-site supervision and scheduling of all the trade contractors or "subs". Those contractors each have a direct contract with the owner, similar to a "multi-prime" arrangement. One key drawback is that the final cost is often not known until the project is complete, and the **CMA** does not take on the risk of guaranteeing a maximum price, as a **CMR** would do. This method also lacks the overall single point responsibility of other methods

DESIGN-BUILD (DB) works well in cases where the Owner can define a select set of a limited number of key performance requirements, and can allow the Builder more flexibility in the specific solution and methods. The more specificity a owner requires, and the more involved the Owner's design Architect is involved, the closer to **DBB** or **CMR** the process becomes. The new law limits **DB** to projects of \$7M or more for public agencies, and requires that the Owner hire an independent Construction Advisor, because of the potential risks with **DB**.

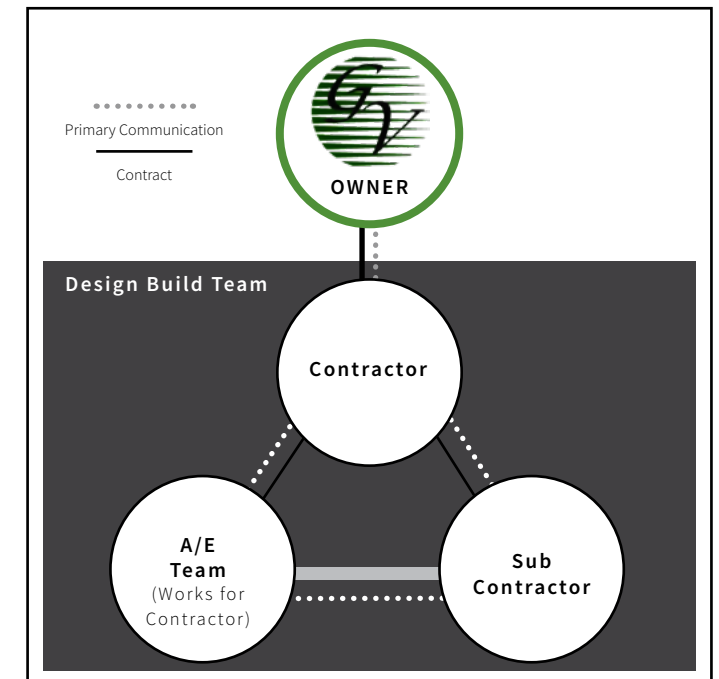

Smaller projects, and/or projects where the Owner requires a high degree of specificity, or a high degree of involvement in the process, and where the ultimate design solution is highly critical to the Owner, are usually not well suited for **DB**, in our experience.

For example, at the simple end of the scale, **DB** would work well for a simple Warehouse, where the Owner would not even need an Architect to write the RFP, and allow the Builder to hire a production Architect; but conversely, for example, **DB**, works less well for a complex medical facility on multiple sites.

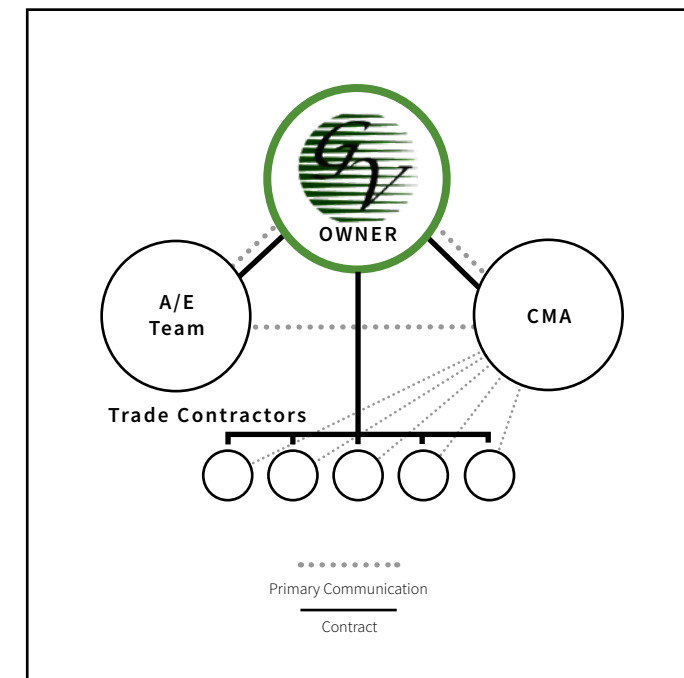

Construction Manager at Risk (CMR)

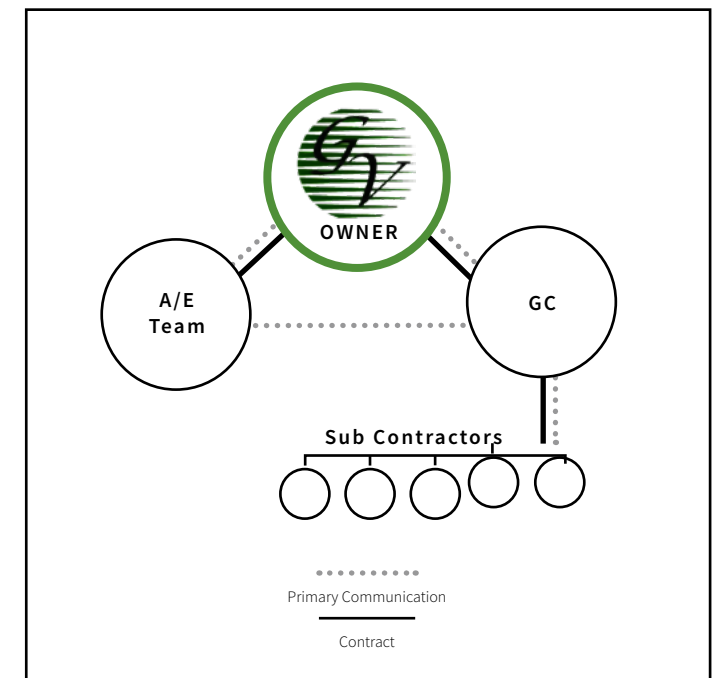

Design Build (DB)

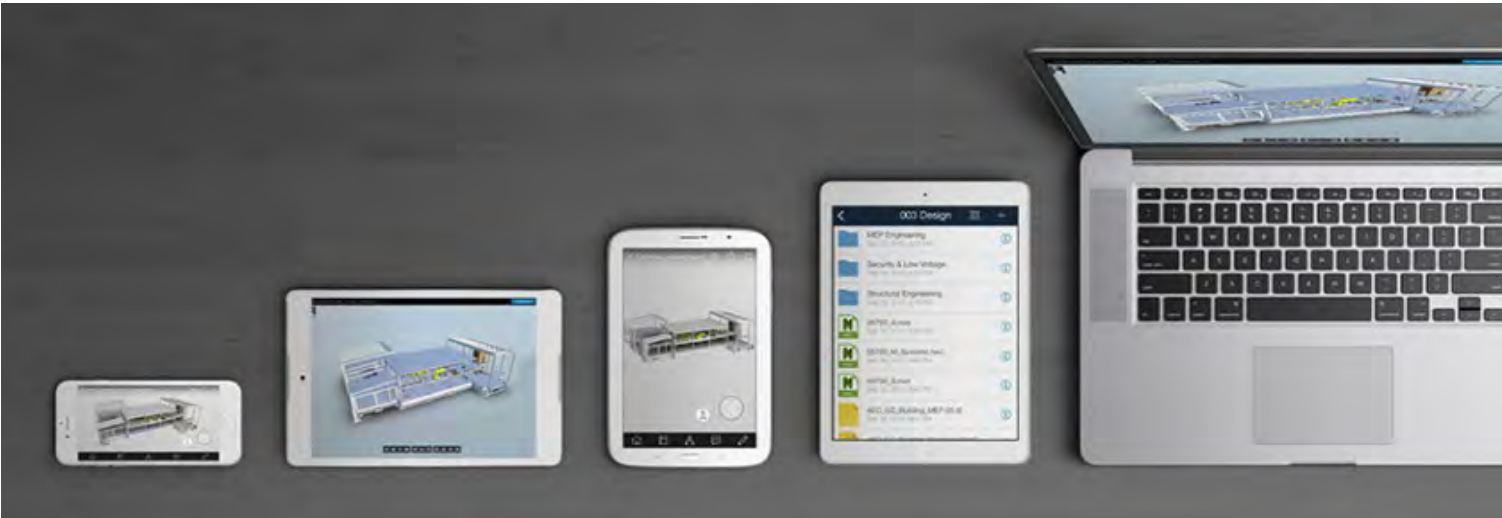

Construction Manager Agency (CMA)

Design - Bid - Build (DBB)

Quality Control is a goal that most professional organizations have, however implementing a plan to assist in reaching the goal is often talked about more than actually put into place. Over the last 30 years, our team has established a proven process that will maintain the highest degree of quality control for your project from design, construction documents, and throughout construction.

In addition we utilize Autodesk Revit where our team works in a live 3D central model that is synced (BIM 360 Design) to our consultants. With this technology we are able to quickly see issues or conflicts and resolve issues before they are discovered in the field. As a client you will have access to this model if you desire via an online viewer.

“A picture is worth a thousand words”. As we start a design process it is common to our team to use the 3D modeling capabilities of revit along with other programs to explore, validate and communicate ideas from initial concepts to our clients to assist with your visualization of your project. We find this to be a valuable tool in communicating spatial aspects of the project.

Our internal standard quality control review includes an internal review of the construction documents by other architects in our office that were not involved in the project. This puts a fresh set of eyes on the project to help vet out any small inconsistencies or omissions, this process also includes review of drawings from our consultants for coordination of their drawings to the overall scope of the project. This has proven over the years to be very successful and has generated projects with no to minimal change orders from errors or omissions.

A project contingency is always highly recommended to be included in the budget for cost overruns, omissions, unforeseen conditions. Sapp Design stands behind the quality of our work, and in the event of errors or omissions will provide the necessary services and documents to incorporate that element under our basic services, but as per industry standards the Architect is not responsible for betterment or enhancement of the project. However this is rare and we have long been known and complemented for detailed clear documents and Contractors are always happy to bid on our projects as the required scope is clear

Going Virtual!

Sapp Design has invested significant time and money in the implementation of Virtual Reality workflows into our design process with great success.

Clients are now able to put on a headset and navigate through their building model early in the design process to gain a true perspective of scale. Because the design team can see what the client sees we can take notes and/or make changes instantly to meet the clients expectations.

DESIGN

Our team’s work is not driven by a need to make a particular design statement, but by giving priority to our clients’ civic, programmatic and symbolic goals. We find design inspiration from what we learn from each community with whom we work. The best architectural solutions emerge from this close understanding of the complex and delightful ways in which your buildings shape your community. First impression, daylighting, appropriate use of materials and in depth programming can all be orchestrated to create places that will positively impact how people create, learn and engage one another. Applying experience and skill in a genuinely collaborative process can effectively incorporate design, budget, and schedule goals while fostering responsive, imaginative, personal solutions. It is important to respect and listen attentively to those who will use and maintain the new facility to create a successful building that is accepted and cared for by the people who inhabit it.

BUDGET GOALS

Good communication is the basis of our approach to management and cost control. We provide timely and accurate cost information through all phases of the project – from design to delivery – keeping in mind that it is far easier to impact the final cost of a project with decisions made early during the programming and conceptual design phases than at any other phase of a project.

Our services will include time working with a pre-selected Construction Manager at Risk hired by The City of Grain Valley in Schematic Design to deliver this project. As a means of checks and balances, we will also provide in-house our own cost estimates at two key stages of the project (at the end of Schematic Design and end of Design Development) using local Kansas City area resources for pricing feedback.

At the outset, the project schedule will be developed in as much detail as possible in order to identify all participants in the planning

process and their anticipated activities, verify established target dates and milestones, and establish and coordinate activity time lines and interface requirements. Once established and agreed upon, the schedule will serve as a baseline by which the job progress may be monitored.

Having a project that is over budget or behind schedule is bad for everyone on the project; the Owner, the architect, and our consultants. It eats into your purchasing power and erodes our profits. For this reason we place a great deal of emphasis on the budget and schedule. We will insist upon contingencies and including design alternates into the project to manage the unknowns that come with any design and construction project.

QUALITY PLAN

Our Team has established a Quality Plan to provide a disciplined approach to the achievement of quality objectives in the delivery of professional services. Elements of the Quality Plan include sound professional judgment, disciplined management techniques, adherence to professional standards of practice, and a commitment to excellence. We understand the definition of quality of “conformance to the project goals and client aspirations.” Project goals will be clearly stated by the client, clearly understood by the Project Team, and clearly communicated to the Contractor.

QUALITY CONTROL

It is the goal and responsibility of the assigned project team to ensure quality conformance during the production of documents. The primary role of the project team is to conceive, plan and provide quality professional design solutions in response to the defined goals of the project.

It is critical that the design team provides clear, concise and well-coordinated bid documents so that general contractors can provide the most accurate bids with limited addenda. In order to create a high-quality set of bid documents for construction bidding we use

the latest Revit software. We require all consultant team members work in Revit as well in order to create seamless coordination between the architecture and engineering systems. We require the same thoroughness and attention to detail to ensure the most accurate bids when bidding furniture packets. Our furniture specifications are developed to meet durability standards, warranty considerations, functionality, cost and aesthetics. They are also written in a manner that substitutions can be considered when appropriate.

CONSULTANT REPORTING STRUCTURE

Clarity of communication is critical for all architectural projects, particularly yours with this number, size and complexity. The design team will be utilizing many forms of communication. Our reporting structure with you will be simple and clear. Topics relating to the contract, overall schedule, meeting dates, and other coordination issues will be handled by Jim. During progress review meetings and workshops you will have direct access to all of our design team members and consultants, and the idea is not to limit any communication. The primary objective will be to provide a clear and simple conduit between you and your design team.

We will also be utilizing a folder structure on My Smart Plans where we can share meeting notes, drawing submittals, estimates, etc. These will be available for your viewing and downloading, and can be managed by you for further dissemination.

APPROACH FOR COORDINATION

Our project team consists of two architectural firms having clearly defined roles. SDA will manage the project on behalf of the entire design team. Effective and diligent coordination and communication among the team will be critical to the success of the project. SDA will take the lead in this effort and will establish the tools, protocols and procedures. We will be utilizing web-based, real-time meetings and file sharing, email and, of course, frequent face-to-face meetings and workshops.

Our primary information sharing tools will be two separate web-based file sharing structures, one for the internal communication among the design team, and also the previously mentioned My Smart Plans website for communication with The City of Grain Valley. On this project we’ll require all consultants to work in Revit and post their Revit models once a week on our internal website. This allows all consultants to see the other team member’s work on a regular basis to allow close coordination. We also post all meeting notes, reports and estimates so that all consultants have access to important information.

It will also be important to establish clear procedures and protocols. Problems can occur when the architect is out of the loop on a conversation between a structural engineer and a mechanical engineer, or the electrical engineer and the user group. We will establish an ordered system of meetings and workshops so that information is discussed, documented and disseminated.

90%
SUCCESS RATE!

We understand that civic projects typically include multiple user and client groups, each with their own goals and priorities. Both Sapp Design and Helix have consistently demonstrated our ability to lead our clients through a process that is inclusive and collaborative, respects all participants, and arrives at solutions that synthesize the varied inputs. We understand that specific critical elements must be determined in this interactive process, including an understanding of the population and demographics of the community to be served, a thorough knowledge of the current staff as well as future projections, activities and support functions of the facility, and clearly defined operational goals.

We recognize that this project, creating a place that your entire community is proud of and can enjoy is an important component of success. Your city staff are integral to our design process in developing a space that will best serve your community. There isn't a design team out there that brings the knowledge and expertise that each of you do about your constituents, your operations and your vision for what this building can become. We will leverage your knowledge along with our design expertise so that we can hit the ground running on planning, design and campaign planning.

Our team will take a leadership role in assisting The City of Grain Valley in developing powerful campaign and fund raising strategies. This includes computer rendering and animations along with brochure materials. We will be active and lead in community presentations to achieve buy-in from the patrons. These presentation sizes have been anywhere from a few people in a round-table setting to an auditorium of over 2,000 people. These strategies have helped gained us a 90% success rate.

Sapp and Helix are working collaboratively to bring the firms' combined expertise with 21st-century libraries, architecture and interior design to each branch. As technology has increasingly become our conduit to knowledge, public libraries are evolving into community centers and cultural hubs that offer a wide variety of services and programs. MCPL and design team members from Helix and Sapp held a series of 29 public meetings to gather input from library users. These meetings helped inform the programs, spaces, and technologies that will be most impactful for each branch and the community it serve

Our planning team collaborated extensively with as many as 23 different Joplin user groups by leading community focus sessions, surveys and panel discussions from leading library directors across the United States to develop a design that fulfilled its goal for the library to be used in new and unimagined ways.

New Covenant Academy Parents, Alums and teachers place red dots signifying importance in various categories for their master plan and gym expansion.

In Neosho, 130 people turned out at a community forum facilitated by SDA Architects to express their ideas, needs and wants for the school districts Master Plan.

In Kansas City future library patrons got to experience their new library designs in virtual reality, providing the ultimate community buy-in.

WHAT SETS US APART

Proven Expertise + Partnership: The associated Architectural team of Sapp / Helix brings a combined 55+ years of experience working with civic, community, non-profit and academic institutions to deliver architecture that is timeless in design and flexible to adapt to future changes to programming and technology. Our significant experience, depth, and capacity on a regional basis offers resources that you will not find in a single firm. Our capabilities are exemplified in our current work with Mid Continent Public Library (MCPL) delivering 31 projects in a manner that capitalizes on our combined strengths. Throughout this contract, we have demonstrated our capability to build consensus, engage the community and create spaces that don't duplicate past projects but celebrate what is unique about the community it serves. We will bring the same expertise, passion, and commitment to creating a vibrant community space for Grain Valley that we have for MCPL.

Award Winning Design: Helix and Sapp are continually recognized for design excellence locally, regionally and nationally. These awards have spanned all sizes, from large public projects to small nonprofits, demonstrating our ability to create quality spaces for the people they serve across project types and budgets. Helix has been a recipient of over 130 awards recognizing design excellence, community impact and historic preservation. In addition, the firm was named 2016 "Firm of the Year" by AIA Kansas City, the KC Police Headquarters was named as "Project of the Year" and they were named as one of the "Top 50 architecture firms" in the country for design by Architecture magazine. Sapp has been recognized for multiple public design awards, recognized as "Best Workplace" four years in a row and honored multiple times by the Contractors Association as "Best Architect" and "Best Team" of the Year. As you look to garner public support for your project this design acumen is valuable in generating excitement among stakeholders for your vision.

Delivering Projects On Time & In Budget: We understand that one of the most critical aspects of any public projects is responsible use of taxpayer dollars. As firms that have worked with public institutions for decades we have honed our ability to deliver projects on time and in budget. Equally as important, we maximize our clients' budget to get the greatest value for each dollar they invest. We highly recommend you reach out to our clients directly to hear first hand our capabilities.

Previous and Current Understanding of your Site

Analysis of Possible Community/Civic Center Campus for City of Grain Valley, Mo.

(Preliminary and Hypothetical Analysis at the request of MCPL in 2012-2015)

General:

Based on Conceptual Site Studies by SDA in 2012-2015, which indicated at the time separate buildings

All cost values below are preliminary, and hypothetical, for purpose of general comparison to other options, and to establish a potential range of magnitude, and are based on current market values. **Actual costs may vary, depending on site conditions, space needs, and final design decisions.**

CITY HALL

Assume renovation and/or expansion of existing main structure. (A small house on the site would be removed.)
Assume approx. 18,000 sf, @ approx. \$180/sf = **\$3.2M**

Complete Renovation: hvac, elec, stairs, elevator, structural upgrades, sprinklers, ADA, code issues, etc.
Project Expenses: (furniture, fixtures, equipment, soft costs, fees, etc.) @28% = **\$1.2M**

Probable Total Project Cost: \$4.4M

Includes some site work as a share of site development; based on existing building being completely renovated, and with some degree of structural modifications, elevator, stairs, electrical and mechanical systems replaced. (Saves \$10 to \$20 per sf over a new building.) Assumes public bidding, and prevailing wage rates.

LIBRARY

New Building: 25,000 sf, one story (per MCPL Master Plan, 2014.)
Projected at approx. \$7.0M per Master Plan: (including Project Expenses) **\$7.0M**
Assumes share of parking and site work as if it were a stand-alone building.

RECREATION CENTER

New Recreation/Community Center: Assume approx. 40,000 sf @ \$250/sf: **\$10.0M**
Indoor Aquatics Center (assumed): assume approx. 16,000sf @ \$350/sf: **\$5.6M**
Outdoor Aquatics Center: assume approx. 30,000 area: **\$6.0M**
Sub-Total Possible Construction Contracts: **\$21.6M**
Project Expenses: allow 28% **\$6.0M**
Possible Total Project: \$27.6M

Assumes share of parking and site work as if stand-alone building.
Does not include sports fields, (baseball, softball, soccer, etc.)

EDUCATION CENTER

New Building, approx. 20,000, one story @ \$220/sf = **\$4.4M**
Project Expenses: allow for 25% **\$1.1M**
Possible Total Project: \$5.5M
Includes meeting space, support space, display space, offices, and standard site work.

SITE AMENITIES

General site grading, detention, access drives, utility extensions, and other common components to the campus development. Depending on numerous variables yet unknown: the extent of earthwork, type of soil conditions, rock, drainage conditions, etc.

Allowance, as a placeholder; this value could vary significantly: **1.0M to \$4.0M**

TOTAL DEVELOPMENT POTENTIAL

This is a hypothetical opinion of the magnitude of total cost in the range of **\$45.0M to \$50.0M**

Assuming all projects are done at the same time and a reasonable and appropriate degree of site development. There is potential for phased development, for additional commercial lease space, and potential for lesser costs, due to any number of potential variables, of which very few are defined at this point in time.

LAST 5 YEAR VOLUME

Our five year historical experience in designing projects within an established “design-not-to-exceed” budget is shown below. This successful track record reinforces the strength of our team’s ability to balance a Client’s program and budget at an early stage. It also reflects our A/E control strategies to maintain this focus throughout each phase of planning.
