 - Chair Saffell asked if there will be gas on-site like oxygen or nitrogen? Mr. Black responded that there will be CO₂, but at a limited level.
 - Chair Saffell said that she was sure that the applicant met with Central Jackson County Fire Protection District but asked that in case of an emergency inside the building, can fire department access the facility. Mr. Black responded yes.
 - Mr. Loving asked if inventory control system is computerized. Mr. Black said that the state tracks the plants throughout the process by a tag.
 - Mr. Browning asked if this site was in a floodplain. Mr. Black responded yes. Director Trosen explained that part of the site is in the floodway fringe which would require a building's lowest floor to be one foot above the determined base flood elevation. At the time of building, the applicant will need to provide a certified elevation certificate at pre-construction and post development. The proposed development is not in the floodway.
