- (e) **Service Requests not Subject to Response and Resolution Parameters.** Service requests satisfying the following conditions are not subject to the Response and Resolution Parameters defined above: service requests that are waiting on parts or services from other vendors (including hardware and software manufacturers and their associated support resources); service requests that are waiting on Customer to make decisions related to scope, cost or any other consideration; service requests that are designated as “On Hold” for any reason mutually agreed to by Customer and Company. Service requests described in this section are re-entered into SLA response and resolution requirements when they are removed from such a status and given another active status.

MEMORANDUM

TO: MARK TROSEN, DIRECTOR OF COMMUNITY DEVELOPMENT

FROM: PATRICK MARTIN, MAINTENANCE SUPERINTENDENT

SUBJECT: BLUE BRANCH STORM DRAINAGE REPAIR

DATE: JULY 26TH, 2021

As a core responsibility of Public Works: infrastructure must be maintained and kept in working condition. Public Works identified a failing storm water swell located between SW Blue Branch Drive and SW Dean Drive. It got reported for flooding after heavy rains: Public Works investigated the situation to find the swell had silted in over the years. The silt causes the water to back up and back up significantly in heavy rains. Along with silt in the ditch slowing the water and making it back up the swell has a lot of overgrowth and vegetation that needs cleared. This past spring during heavy rains for several days in a row it caused the road to be temporarily flooded until water slowly receded.

Public Works began to reach out to contractors to get quotes to repair the area. Public Works received 3 bids total after talking with 4 vendors. The best bid was determined to be Earl Madison Company. The work to be completed is to remove silt, debris, and dead trees from the drainage swell. Followed by regrading the swell to properly flow. After grading the swell, the contractor will install weed guard and rip rap stone to help prevent erosion from happening again. The total footage for the area of work is approximately 1000 liner ft.

The funds for this project have been identified in the 2021 budget. The fund balance is part of the Capital Projects Fund.

PURPOSE	Requesting approval for the Term and Supply Vendor, Summit General Contracting, LLC. for Building Contracting and Maintenance to demo the ceiling and install a new drop-down ceiling with all new grids, insulation, tiles, and vent diffusers in the Public Works Maintenance Facility. The BOA approved Summit General Contracting, LLC as the Term and Supply Vendor by R20-34 on 5/27/2024.	

BACKGROUND	During routine maintenance check of HVAC system, Stanger found poor air conditioning performance because of the condition of the ceiling. Some of the tee bars are distorted/ no longer original shape, sagging mains, missing tiles because of sagging grids and grids being held together by tape. The ceilings condition is increasing infiltration (heat from the attic coming into the office space) which makes maintaining the space temperature difficult and more expensive.

Mike

During the service call regarding poor air conditioning performance at the Public Works Building I notice the ceiling is in very poor condition.

Some of the tee bars are distorted / no longer their original shape, sagging mains, missing ceiling tiles (likely due to mis-shaped and sagging grid), missing insulation, ceiling tiles and grid being held together with tape, etc. The attached pictures should help document the current condition of the ceiling.

The ceilings condition is increasing infiltration (heat from the attic coming into the office space) which makes maintaining the space temperature difficult and more expensive.

Please consider addressing the ceiling condition. Let me know if you have any questions, thanks.
