WATER BILLING CUSTOMER

RE: 2019 Water Quality Report

The Grain Valley Community Development Department is pleased to inform the community the quality of our drinking water meets and surpasses all state and federal drinking water regulations. The 2019 Water Quality Report is provided to all customers and is a requirement of the Environmental Protection Agency's Safe Drinking Water Act.

The City of Grain Valley supplies quality drinking water to more than 5,300 customers. 65% of our water supply comes from the City of Independence and 35% of our water comes from Tri-County Water Authority. For more information about these water suppliers, you may contact the City of Independence at 816-325-7930, or Tri-County Water Authority at 816-796-4100.

Please contact the Grain Valley Public Works Department at 847-0091 for more information about the 2019 Grain Valley Water Quality Report.

Respectfully,  
Grain Valley Community Development &  
Grain Valley Public Works Department
